100% Pass Quiz Cisco - 200-901 - DevNet Associate Exam –Reliable Vce File

If you are curious or doubtful about the proficiency of our 200-901 practice materials, we can explain the painstakingly word we did behind the light. By abstracting most useful content into the 200-901 practice materials, they have help former customers gain success easily and smoothly. The most important part is that all contents were being sifted with diligent attention. No errors or mistakes will be found within our 200-901 practice materials. We stress the primacy of customers' interests, and make all the preoccupation based on your needs.

Cisco DevNet Associate Exam Sample Questions (Q230-Q235):

NEW QUESTION # 230
Drag and drop the Dockerfile instructions from the left onto the descriptions on the right. Not at options are used.

FROM ubuntu:12.04	informs Docker that the container listens on the specified network port(s) at runtime
VOLUME["/var/www","/var/log/apache2","/etc/apache2"]	creates a mount point with the specified name
RUN apt-get update && apt-get install –y –force-yes apache2	configures a container that runs as an executable
ENTRYPOINT["/usr/sbin/apache2ctl","-D","FOREGROUND"]	must be the first instruction in the Docker file
EXPOSE 1521	

Answer:

Explanation:

FROM ubuntu:12.04	EXPOSE 1521
VOLUME["/var/www","/var/log/apache2","/etc/apache2"]	VOLUME["/var/www","/var/log/apache2","/etc/apache2"]
RUN apt-get update && apt-get install –y –force-yes apache2	ENTRYPOINT["/usr/sbin/apache2ctl","-D","FOREGROUND"]
ENTRYPOINT["/usr/sbin/apache2ctl","-D","FOREGROUND"]	FROM ubuntu:12.04
EXPOSE 1521	

Explanation:

	EXPOSE 1521
	VOLUME ["/var/www", "/var/log/apache2", "/etc/apache2"]
RUN apt-get update && apt-get install -y --force-yes apache2	ENTRYPOINT ["/usr/sbin/apache2ctl", "-D", "FOREGROUND"]
	FROM ubuntu:12.04

NEW QUESTION # 231
Which type of threat occurs when an attacker can send hostile data to an interpreter within an application?

- A. broken authentication
- B. injection
- C. cross-site scripting
- D. sensitive data exposure

Answer: B

Explanation:
Explanation/Reference:
Reference: https://owasp.org/www-project-top-ten/OWASP_Top_Ten_2017/Top_10-2017_A1-Injection

NEW QUESTION # 232
An engineer must investigate the problems on a web application and address them to related teams. The engineer verifies the

application reachability from the single public IP dress with port and discovers that HTTPS access works to three servers of a network farm with IP 172.16.50.1 .2 and .4. but HTTPS access to the server with IP 172.16.50.3 does : work. Which problem type must be addressed as the cause for the case?

- A. blocked transport port
- B. proxy
- C. NAT
- D. VPN connectivity

Answer: A

Explanation:
The issue described indicates that HTTPS (port 443) access is not working for one specific server (172.16.50.3) in the network farm, while it works for the others. This suggests that the transport port (port 443) might be blocked or filtered for this particular server.
Transport Port Blocking: Network firewalls or security groups might block specific ports for certain IP addresses.
Server Configuration: The server might not have the necessary configuration to accept HTTPS connections on port 443.
Troubleshooting: Verifying firewall rules, security group settings, and server configurations can help identify and resolve the issue.

NEW QUESTION # 233
Refer to the exhibit. Which function does the EXPOSE line perform when building an image from this Dockerfile?

```
# base image
FROM alpine

# Install python and pip
RUN apk add --update py2-pip

# Install python modules needed by the python app
COPY requirements.txt /usr/src/app/
RUN pip install --no-cache-dir -r /usr/src/app/requirements.txt

#copy local files for the app to run
COPY app.py /usr/src/app/
COPY templates/index.html /usr/src/app/templates/

EXPOSE 8080

#run the application
CMD ["python", "/usr/src/app/app.py"]
```

- A. Local port 8080 of the container that launched with this docker image is accessible to external clients.
- B. Local port 8080 is not reachable at all because no IP address is specified along with the EXPOSE command of the Dockerfile.
- C. Local port 8080 of the container that launched with this docker image is accessible from co- hosted containers and external clients.
- D. Local port 8080 is accessible from other containers running on the same docker host as the container that launched with this docker image.

Answer: D

Explanation:
The EXPOSE instruction informs Docker that the container listens on the specified network ports at runtime.
The EXPOSE instruction does not actually publish the port. It functions as a type of documentation between the person who builds the image and the person who runs the container, about which ports are intended to be published. To actually publish the port when running the container, use the -p flag on docker run to publish and map one or more ports, or the -P flag to publish all exposed ports and map them to high-order ports.
Regardless of the EXPOSE settings, you can override them at runtime by using the -p flag.

NEW QUESTION # 234
Which task is performed because the test-driven development approach is being used?

- A. testing existing software before developing new code
- B. writing code without committing any coding violations
- C. creating test scenarios based on continuous development
- D. refactoring code that is covered by existing tests

Answer: D

NEW QUESTION # 235

......

The DevNet Associate Exam (200-901) practice test is being offered in three different formats. These Cisco 200-901 exam questions formats are PDF dumps files, web-based practice test software, and desktop practice test software. All these Cisco 200-901 Exam Dumps formats contain real, updated, and error-free DevNet Associate Exam (200-901) exam questions that prepare you for the final 200-901 exam.
