Microsoft Power Platform Fundamentals Sample Questions (Q197-Q202):

NEW QUESTION # 197

You build a flow using a template. You want to add support for additional business scenarios.

You need to ensure that the new workflow does not break existing functionality.

Which flow editing utilities should you use? To answer, drag the appropriate tools to the correct requirements.

Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Test	Check the new flow for any errors or warnings.	Tool
Flow Checker	Run the flow using previously processed data.	Tool
	Monitor the flow as it is running.	Tool

Answer:

Explanation:

Tools	Requirement	Tool
Test	Check the new flow for any errors or warnings.	Flow Checker
Flow Checker	Run the flow using previously processed data.	Test
	Monitor the flow as it is running.	Test

Explanation

Requirement	Tool
Check the new flow for any errors or warnings.	Flow Checker
Run the flow using previously processed data.	Test
Monitor the flow as it is running.	Test

Box 1: Flow Checker

The Flow checker feature will promote higher quality flows by ensuring you follow best practices. By running the checker, you will be able to get answers to questions like: which areas of my flow implementation pose a performance or reliability risk?

For each issue identified, the Flow checker points to specific occurrences within the flow where improvements may be required.

And more importantly, you learn how to implement these improvements by following detailed guidance.

Box 2: Test

Box 3: Test

NEW QUESTION # 199

Users within a company use Flow for personal productivity.

Users often overwrite their working flows by editing the definitions and are unable to undo changes after saving a flow.

You need to ensure that users can revert a flow to the current state.

Which two options can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Share
- B. Save As
- C. Export
- D. Rename

Answer: B,C

Explanation:

A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.

C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.

Here's how:

Go to your My flows page. Click on the More (...) menu item next to the flow that you want to create a copy of. Click on the Save As command.

NEW QUESTION # 200

You are creating a model-driven Power Apps app. You want to ensure that the app can be used by individuals who have vision impairments.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
Power Apps apps can be built with hot key support and designed so they do not require a touch screen or mouse.	☐	☐
Only model-driven Power Apps have support for using a screen reader without the need for a connector.	☐	☐
The accessibility checker can be run for your Power Apps app to provide notifications of accessibility violations as well as tips for making it even more user friendly.	☐	☐

Answer:

Explanation:

Statement	Yes	No
You can use the prebuilt Postal Code entity to recommend plants that will work within a customer's growing zone.	☐	☐
You can create a custom entity to offer color and plant choices for landscaping options that can be made available for customer orders.	☐	☐

Explanation

Statement	Yes	No
Power Apps apps can be built with hot key support and designed so they do not require a touch screen or mouse.	☐	☐
Only model-driven Power Apps have support for using a screen reader without the need for a connector.	☐	☐
The accessibility checker can be run for your Power Apps app to provide notifications of accessibility violations as well as tips for making it even more user friendly.	☐	☐

Box 1: Yes

You can use keyboard shortcuts in PowerApps. Keyboard shortcuts give you an alternate way to do common tasks instead of using your mouse or tapping with your finger. They help in seamless navigation of the interface.

Box 2: No

The following software combinations are the supported recommendations for consuming PowerApps with a screen reader:

Windows: Microsoft Edge / Narrator

macOS: Safari / VoiceOver

Android: PowerApps app / Talkback

iOS: PowerApps app / VoiceOver

Box 3: Yes

Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the Accessibility checker in PowerApps Studio. This tool not only finds potential accessibility issues but also explains why each might be a potential problem for users who have a specific disability and offers suggestions on how to resolve each issue. The Accessibility checker detects screen-reader and keyboard issues for you, and you can find information about how to fix color-contrast issues by using accessible colors.
