NEW QUESTION # 97

Which router command allows you to view the entire contents of all access lists?

- A. show all access-lists
- B. show interface
- C. show access-lists
- D. show ip interface

Answer: C

Explanation:

The show access-lists command in Cisco IOS is used to display all configured access control entries (ACEs) in every access list, both named and numbered. This command shows the complete content, including rules and hit counters.

Cisco IOS Command Reference - Access List Monitoring:

"Use show access-lists to view the complete list of all access control entries. This includes both standard and extended lists." Other options:

- * A: Invalid command syntax
- * C: show ip interface shows interface-level IP settings and ACL applications, but not full ACL content
- * D: show interface shows status and statistics, not ACL rules
