

# New MTCNA Test Book, MTCNA Pass Test Guide

BTW, DOWNLOAD part of PassTestking MTCNA dumps from Cloud Storage: [https://drive.google.com/open?id=1\\_UsfJBpLt2FPHdHFtfb1VzD0J-69R\\_kz](https://drive.google.com/open?id=1_UsfJBpLt2FPHdHFtfb1VzD0J-69R_kz)

The Exams is committed to making the MikroTik MTCNA exam dumps the best MTCNA exam study material. To achieve this objective the Exams have hired a team of experienced and qualified MikroTik MTCNA Exam trainers. They work together and check all MikroTik MTCNA exam questions step by step and ensure the top standard of MikroTik MTCNA practice test material all the time.

MikroTik MTCNA certification is a valuable credential for networking professionals looking to advance their career in MikroTik routers. MTCNA exam covers various aspects of MikroTik router configuration and requires a passing score of 60% or higher. MikroTik Certified Network Associate Exam certification is recognized globally and can help individuals enhance their career opportunities in network administration, engineering, and management.

MikroTik is a Latvian company that develops and sells networking equipment and software, including routers, switches, and wireless access points. The MTCNA Certification program is designed to provide professionals with a deep understanding of MikroTik's products and how to configure and manage them effectively.

## Gives 100% Guarantee Of Success Via MikroTik MTCNA Exam Questions

The quality of our MikroTik MTCNA training material is excellent. After all, we have undergone about ten years' development. Never has our practice test let customers down. Although we also face many challenges and troubles, our company get over them successfully. If you are determined to learn some useful skills, our MikroTik MTCNA Real Dumps will be your good assistant. Then you will seize the good chance rather than others.

The MTCNA Certification is widely recognized in the networking industry and is a valuable asset for those who are looking to advance their careers in the field. MikroTik is a popular networking solution for small to medium sized businesses, and the MTCNA certification is particularly useful for those who work in this sector. MikroTik Certified Network Associate Exam certification is also a great way for networking professionals to demonstrate their expertise and knowledge to potential employers.

## MikroTik Certified Network Associate Exam Sample Questions (Q68-Q73):

### NEW QUESTION # 68

What is the address range of a Class B network address in binary?

- A. 10xxxxxx
- B. 0xxxxxxx
- C. 01xxxxxx
- D. 110xxxxx

**Answer: D**

### NEW QUESTION # 69

Select valid MAC-address:

- A. G2:60:CF:21:99:H0
- B. 192.168.0.0/16
- C. AEC8:21F1:AA44:54FF:1111:DDAE:0212:1201
- D. 00:00:5E:80:EE:B0

**Answer: D**

Explanation:

A valid MAC address must meet the following criteria:

- \* Be 6 bytes (48 bits) in length
- \* Consist of only hexadecimal digits (0-9, A-F)
- \* Written in six groups separated by colons or hyphens (e.g., 00:1A:2B:3C:4D:5E) MTCNA Course Material - RouterOS MAC Address Basics:

"MAC addresses are 48-bit identifiers written as six pairs of hexadecimal digits. Invalid characters or incorrect length disqualifies an address." Rene Meneses MTCNA Guide - MAC Addressing Section:

"Each MAC is made up of 12 hexadecimal characters (6 octets). If a character like 'G' appears, or if it's longer than 6 bytes, it is invalid." MikroTik Wiki - MAC Addressing Rules:

"Valid MAC format: XX:XX:XX:XX:XX:XX using only 0-9 and A-F. 192.168.0.0/16 is an IP subnet, not a MAC."

- \* Option A: Invalid - "G" and "H" are not hexadecimal characters
- \* Option B: Valid - proper format and hex content
- \* Option C: Invalid - Too long (appears to be IPv6 or malformed)
- \* Option D: Invalid - this is an IP network (CIDR notation), not a MAC

Only Option B is correct.

### NEW QUESTION # 70

Is action=masquerade allowed in chain=dstnat?

- A. no
- B. yes
- C. yes, but only if dst-addr is specified
- D. yes, but it works only for incoming connections

**Answer: A**

Explanation:

The action=masquerade is used exclusively in the srcnat chain. It dynamically hides internal IP addresses behind the router's public IP. It cannot be used in the dstnat chain.

- \* A.#Incorrect - masquerade is not allowed in dstnat regardless of parameters.
- \* B.#Incorrect - masquerade is not valid in the dstnat chain.
- \* C.#Incorrect - masquerade does not operate in dstnat, direction does not change this.
- \* D.#Correct - masquerade must only be used in chain=srcnat.

Extract from MTCNA Course Material - NAT Concepts:

"Masquerade is a special type of source NAT used only in the srcnat chain. It is invalid in dstnat." Extract from Rene Meneses Study Guide - NAT Actions:

"Use action=masquerade in chain=srcnat. RouterOS will not accept it in dstnat." Extract from MikroTik Wiki - NAT Rules:

"action=masquerade is not allowed in dstnat chain and will result in error if applied."

### NEW QUESTION # 71

You have 10 users plugged into a hub running 10 Mbps half-duplex. There is a server connected to the switch running 10 Mbps half-duplex as well. How much bandwidth does each host have to the server?

- A. 10 Mbps
- B. 100 kbps
- C. 1 Mbps

- D. 2 Mbps

**Answer: A**

Explanation:

When using a hub, all connected devices share the total bandwidth. Since it's a 10 Mbps half-duplex hub, all 10 users share the same collision domain and 10 Mbps. However, when calculating potential access to the server from any single host, each host can use the full 10 Mbps - as long as no other users are transmitting simultaneously.

More importantly, the connection to the server is also 10 Mbps half-duplex, so regardless of the internal collisions, each client could use the full 10 Mbps to the server - just not concurrently with others.

Cisco CCNA Curriculum - Hubs and Bandwidth Sharing:

"In a hub, all ports share bandwidth. However, each host is capable of utilizing the full bandwidth if no contention exists." Rene Meneses MTCNA Study Guide - Hub Limitations:

"A hub provides shared bandwidth, but each device can use the full rate momentarily, assuming no collisions." Hence, the correct answer is based on potential - not divided bandwidth.

## NEW QUESTION # 72

Which command is used to determine if an IP access list is enabled on a particular interface?

- A. show access-lists
- B. show interface access-lists
- C. show interface
- D. show ip interface

**Answer: C**

## NEW QUESTION # 73
