The OGEA-101 study materials from our company can help you get the certification in a short time. Now we are willing to introduce our OGEA-101 Practice Questions to you in detail, we hope that you can spare your valuable time to have a try on our products. Please believe that we will not let you down!

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q118-Q123):

NEW QUESTION # 118

Exhibit

Consider the illustration showing an architecture development cycle Which description matches the phase of the ADM labeled as item 2?

- A. Provides architectural oversight for the implementation
- B. Operates the process of managing architecture requirements
- C. Establishes procedures for managing change to the new architecture
- D. Conducts implementation planning for the architecture defined in previous phases

Answer: A

Explanation:

Based on the illustration, the phase of the ADM labeled as item 2 is the Implementation Governance phase.

This phase provides architectural oversight for the implementation. It ensures that the implementation project conforms to the architecture. It also provides a framework for monitoring and managing the implementation.

The Implementation Governance phase involves the following activities:

Finalizing the Architecture Roadmap and the supporting Implementation and Migration Plan
Assigning an Architecture Board to oversee the implementation
Establishing Architecture Contracts with the implementation partners
Reviewing and approving the implementation project plans and deliverables
Performing Architecture Compliance reviews to ensure alignment with the architecture
Performing Architecture Audit reviews to ensure quality and performance of the architecture
Resolving any architecture issues or change requests that arise during the implementation
Maintaining the architecture lifecycle and ensuring its continuity
The Implementation Governance phase is essential for ensuring that the architecture is realized as intended and that it delivers the expected business value and outcomes.

Implementation Governance

NEW QUESTION # 119

Consider the following statements:

1. Groups of countries, governments, or governmental organizations (such as militaries) working together to create common or shareable deliverables or infrastructures
 2. Partnerships and alliances of businesses working together, such as a consortium or supply chain
- What are those examples of according to the TOGAF Standard?

- A. Architectures Scopes
- B. Business Units
- C. Organizations
- D. Enterprises

Answer: A

Explanation:

According to the TOGAF standard, the two statements provided refer to different scopes within which architecture can be developed:

Groups of countries, governments, or governmental organizations working together typically align with broader, often international, scopes of architecture that transcend individual enterprise boundaries.

Partnerships and alliances of businesses working together, such as a consortium or supply chain, refer to collaborative efforts that

can define architecture at a scope involving multiple enterprises.

In both cases, the term "Architectures Scopes" is appropriate because it reflects the varying levels and contexts in which architectures can be defined, ranging from single business units to collaborative inter-organizational efforts.

NEW QUESTION # 120

What are the following activities part of?

- * Initial risk assessment
 - * Risk mitigation and residual risk assessment
 - * Risk monitoring
-
- A. Security Architecture
 - **B. Risk Management**
 - C. Phase A
 - D. Phase C

Answer: B

Explanation:

The following activities are part of Risk Management:

Initial risk assessment

Risk mitigation and residual risk assessment

Risk monitoring

Risk Management is the process of identifying, assessing, and responding to risks that may affect the achievement of the enterprise's objectives. Risk Management involves balancing positive and negative outcomes resulting from the realization of either opportunities or threats. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.3 Risk Management.

NEW QUESTION # 121

What information does the Architecture Requirements Repository within the Architecture Repository hold?

- A. A set of guidelines, templates, and patterns to support the development of architecture requirements
- **B. The architecture requirements which have been agreed with the Architecture Board**
- C. A log of the governance activity related to architecture requirements
- D. The parameters and structures to support governance of architecture requirements

Answer: B

NEW QUESTION # 122

When considering the scope of an architecture, what dimension is about the extent of the enterprise?

- A. Depth
- B. Project
- **C. Breadth**
- D. Architecture Domains

Answer: C

Explanation:

Comprehensive and Detailed Explanation

When defining the scope of an architecture, TOGAF identifies four dimensions that need to be considered:

* Breadth - This dimension addresses the extent of the enterprise that will be impacted by the architecture. It answers the question: How much of the enterprise is covered? For example, does the scope include the entire enterprise, a business unit, a division, or just a single organizational function?

* Depth - This refers to the level of detail to be covered. For instance, will the architecture describe high-level capabilities, or will it go into detailed system design?

* Time Period - This defines the planning horizon of the architecture. It could be short-term (tactical), medium-term, or long-term (strategic).

* Architecture Domains - This refers to which domains are covered: Business, Data, Application, and Technology. The scope may include all or just a subset of these domains.

* Project Scope (sometimes discussed separately) - Focuses on which specific programs, portfolios, or projects will be impacted. Among these, the dimension that specifically relates to the extent of the enterprise is Breadth.

* A. Architecture Domains: Refers to the domains covered (Business, Data, Application, Technology), not the extent of the enterprise.

* B. Depth: Refers to the level of detail, not the enterprise extent.

* C. Project: Refers to the program or initiative focus, not enterprise coverage.

References
