We can promise that our OmniStudio-Developer training guide will be suitable for all people, including students and workers and so on. You can use our OmniStudio-Developer study materials whichever level you are in right now. And we can promise you will get success by our products.

Salesforce Certified OmniStudio Developer Sample Questions (Q83-Q88):

NEW QUESTION # 83

When launching an OmniScript from an action on a FlexCard, the OmniScript displays, but no Salesforce data is populated: Which two errors could cause this behavior?

Choose 2 answers

Choose 2 answers

- A. The Id Field for Actions in the FlexCard is blank.
- B. In the DataRaptor Extract Action, the Input Parameters Filter Value is misspelled.
- C. There is no active version of the Data Raptor Extract.
- D. There is no active version of the OmniScript

Answer: A,B

NEW QUESTION # 84

Refer to the exhibit below. A developer has configured an Integration Procedure element with SEND/RESPONSE TRANSFORMATIONS as shown.

Alternatively, how could the developer configure Additional Input to send exactly the same data? Assume that the developer checked Send Only Additional Input.

▼ SEND/RESPONSE TRANSFORMATIONS

Send JSON Path ⓘ DRExtractAction:Account	Send JSON Node ⓘ SecondaryAccount
Response JSON Path ⓘ 	Response JSON Node ⓘ salesforce

- Key Value
- A.

DRExtractAction:Account	SecondaryAccount
-------------------------	------------------
 - B.

SecondaryAccount	%DRExtractAction:Account%
------------------	---------------------------
 - C.

%DRExtractAction:Account%	SecondaryAccount
---------------------------	------------------
 - D.

%DRExtractAction:Account%	SecondaryAccount
---------------------------	------------------

Answer: C

Explanation:

The Additional Input property allows the developer to specify additional input parameters to be sent to the Integration Procedure element. The input parameters can be specified as a JSON object or as a list of key-value pairs. If the developer checked Send Only Additional Input, then only the input parameters specified in Additional Input are sent, and the SEND/RESPONSE TRANSFORMATIONS are ignored. Therefore, the developer needs to specify the same input parameters as in the SEND/RESPONSE TRANSFORMATIONS in Additional Input. Option C shows how to do this using a JSON object with two properties:

"DBExtractAction:Account" and "DBExtractAction:SecondaryAccount". The values of these properties are the same as in the SEND/RESPONSE TRANSFORMATIONS.

NEW QUESTION # 85

Refer to the exhibit.

Account		Contact		Contact	
Name	Acme	Name	Edward Starks	Name	Howard Jones
Phone	(222) 154-6450	Cell Phone	(212) 154-8562	Cell Phone	(650) 158-1102

The card layout uses an integration Procedure as a data source. The cards use the layout data source.

Which JSON data structure supports this card layout and follows best practices?

```

{
  "contact": [
    {
      "CellPhone": "(212) 154-8562",
      "Name": "Edward Stamos"
    },
    {
      "CellPhone": "(650) 156-1102",
      "Name": "Howard Jones"
    }
  ],
  "AccountPhone": "2221546450",
  "AccountName": "Acme"
}

```

• A.

```

{
  "Contact": [
    {
      "CellPhone": "(212) 154-8562",
      "Name": "Edward Stamos"
    },
    {
      "CellPhone": "(650) 156-1102",
      "Name": "Howard Jones"
    }
  ],
  "Account": {
    "Phone": "2221546450",
    "Name": "Acme"
  }
}

```

• B.

```

[
  {
    "Account": {
      "Phone": "2221546450",
      "Name": "Acme"
    },
    "ContactCellPhone": "(212) 154-8562",
    "ContactName": "Edward Stamos"
  },
  {
    "Phone": "2221546450",
    "Name": "Acme"
  },
  {
    "ContactCellPhone": "(650) 156-1102",
    "ContactName": "Howard Jones"
  }
]

```

• C.

Answer: C

Explanation:

The JSON data structure in option C supports the card layout and follows best practices. It has a list of objects, each representing a product, with the properties "ProductCode", "ProductName", "ProductDescription", and "ProductPrice". These properties match the fields in the card layout. The JSON data structure also follows the naming convention of using camel case for property names. The JSON data structures in options A and B do not match the fields in the card layout and do not follow the naming convention.

NEW QUESTION # 86

A customer has a new Engagement Manager who is going to be the new Primary Contact for the Account. What type of mapping does a DataRaptor Load use to create the new contact and then add it as the new Primary Contact?

- A. Lookup Mapping
- B. Lookup Key
- **C. Linked Mapping**
- D. Relationship Query

Answer: C

Explanation:

According to the DataRaptor Load Overview page, a Linked Mapping is used to "create or update multiple records in different objects that are related by lookup fields".

NEW QUESTION # 87

When launching an OmniScript from an action on a FlexCard, the OmniScript displays, but no Salesforce data is populated: Which two errors could cause this behavior?

Choose 2 answers

Choose 2 answers

- **A. The Id Field for Actions in the FlexCard is blank.**
- **B. In the DataRaptor Extract Action, the Input Parameters Filter Value is misspelled.**
- C. There is no active version of the Data Raptor Extract.
- D. There is no active version of the OmniScript

Answer: A,B

Explanation:

The Id Field for Actions in the FlexCard specifies which field from the FlexCard data source will be used as the record ID for the OmniScript. If this field is blank, the OmniScript will not receive any record ID and will not be able to retrieve any Salesforce data. In the DataRaptor Extract Action, the Input Parameters Filter Value determines how to filter the data based on the record ID. If this value is misspelled, the DataRaptor Extract will not be able to match the record ID and will not return any data.

NEW QUESTION # 88

.....

It is an important process that filling in the correct mail address in order that it is easier for us to send our OmniStudio-Developer study guide to you after purchase, therefore, this personal message is particularly important. We are selling virtual OmniStudio-Developer learning dumps, and the order of our OmniStudio-Developer training materials will be immediately automatically sent to each purchaser's mailbox according to our system. It is very fast and convenient to have our OmniStudio-Developer practice questions.
