

New Oracle 1Z1-591 Test Questions, 1Z1-591 Reliable Dumps Free

DOWNLOAD the newest ValidDumps 1Z1-591 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=15G6qqMjFr1NdIEuJ6sV3IO2kbU3cvWqO>

We take responses from thousands of experts globally while updating the 1Z1-591 content of preparation material. Their feedback and reviews of successful applicants enable us to make our Oracle 1Z1-591 dumps material comprehensive for exam preparation purposes. This way we bring dependable and latest exam product which is enough to pass the Oracle 1Z1-591 certification test on the very first take.

Oracle 1Z1-591 certification exam is designed to test the skills and knowledge of professionals who use the Oracle Business Intelligence Foundation Suite (OBIEE) 11g. Oracle Business Intelligence Foundation Suite 11g Essentials certification is intended for individuals who work with data analytics, business intelligence, and reporting. 1Z1-591 exam covers topics such as data modeling, report creation, and dashboard development using the OBIEE 11g platform.

The Oracle 1Z1-591 Exam is ideal for IT professionals who work with business intelligence tools and applications. It tests knowledge and skills related to Oracle Business Intelligence Foundation Suite 11g, including concepts such as creating reports, dashboards, and analyses. It also assesses candidates' knowledge of key features such as publishing BI reports, security, and mobile BI.

Oracle 1Z1-591 Reliable Dumps Free & Latest 1Z1-591 Exam Vce

ValidDumps has designed ValidDumps which has actual exam Dumps questions, especially for the students who are willing to pass the Oracle 1Z1-591 exam for the betterment of their future. The study material is available in three different formats. Oracle 1Z1-591 Practice Exam are also available so the students can test their preparation with unlimited tries and pass Oracle Business Intelligence Foundation Suite 11g Essentials (1Z1-591) certification exam on the first try.

Oracle Business Intelligence Foundation Suite 11g Essentials exam is a multiple-choice test that covers various topics including Oracle BI architecture, data modeling, security, and report creation. It is a comprehensive exam that evaluates your understanding of Oracle BI concepts and your ability to apply them to real-world scenarios. 1Z1-591 Exam is designed to test your knowledge of the Oracle BI Suite and your ability to work with its components effectively.

Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q107-Q112):

NEW QUESTION # 107

What are the two types of Session Variables?

- A. Dynamic
- B. Non System
- C. System
- D. Static

Answer: B,C

Explanation:

There are two types of session variables:

System - A session variable that the Oracle BI Server and Oracle BI Presentation Services use for specific purposes.

System session variables have reserved names that cannot be used for other kinds of variables (such as static or dynamic repository variables and non-system session variables).

Non-system - A system variable that the administrator creates and names. For example, the administrator might create a SalesRegion non-system variable that initializes the name of a user's sales region.

The administrator creates non-system session variables using the Oracle BI Administration Tool.

Note: Session Variables

A session variable is a variable that is initialized at login time for each user. When a user begins a session, the Oracle BI Server creates a new instance of a session variable and initializes it.

There are as many instances of a session variable as there are active sessions on the Oracle BI Server. Each instance of a session variable could be initialized to a different value.

NEW QUESTION # 108

Content that is saved in personal and shared folders can be browsed by using which view?

- A. New -> Analysis
- B. Dashboard
- C. Home
- D. Catalog
- E. Favorites

Answer: D

Explanation:

Explanation

The Catalog Manager workspace enables you to view and work with catalog objects. It displays the following folders for an open catalog:

The shared folder- Contains content that is shared among catalog users. This includes the preconfigured dashboards and analyses that are distributed with prebuilt applications, and other objects such as shared filters.

The system folder - Contains administrative elements of Presentation Services. Some of these elements are distributed with the product, and others are configured by you as the administrator, such as privileges. Avoid modifying any files in this folder.

Presentation Services uses these files internally and modifying them might cause unexpected results.

The users folder - Contains content that catalog users with the appropriate permissions have saved to their personal folders, such as individual analyses.

NEW QUESTION # 109

A customer has a requirement for rolling period calculations. What two additional steps will need to be done to enable this in the repository?

- A. Designating a chronological key for every logical column in the Logical Table Source
- **B. Designating a chronological key for every level of every dimension hierarchy**
- C. Specifying a sort order in the Logical Table dialog
- D. Clicking the "Time" option in the Logical Table Source Dialog
- **E. Clicking the "Time" option in the Logical Dimension Dialog**

Answer: B,E

Explanation:

Creating Logical Time Dimensions

Compared to modeling an ordinary dimension, the time dimension requires just two additional steps: selecting the Time option in the Logical Dimension dialog, and designating a chronological key for every level of every dimension hierarchy.

Note: Time dimensions and chronological keys. You can identify a dimension as a time dimension. At least one level of a time dimension must have a chronological key. The following is a list of some guidelines you should use when setting up and using time dimensions:

* At least one level of a time dimension must have a chronological key.

* All time series measures using the AGO, TODATE, and PERIODROLLING functions must be on time levels. AGO, TODATE, and PERIODROLLING aggregates are created as derived logical columns.

NEW QUESTION # 110

Identify the two types of storage for Essbase.

- **A. Aggregate Storage Option and Block Storage Option**
- B. Aggregate Storage and Cell Storage
- C. OLAP Storage and Cell Storage
- D. Aggregate Storage and Hybrid Columnar Compression

Answer: A

Explanation:

Oracle Essbase developers creating planning and budgeting applications have been keenly aware of the advantages and disadvantages of the two different storage types available to them:

*Block storage option (BSO) databases support a wide range of calculations, including forecasts, allocations, and aggregations through procedural calculation scripts. The results of these calculations can be written back to the database, but applications that use BSO storage are limited to about 10 dimensions and member counts in the low hundreds of thousands.

*Aggregate storage option (ASO) databases can support about 20 dimensions and member counts in the millions. ASO databases use multidimensional functions rather than procedural scripts to perform calculations, but the results of queries cannot be stored back in the database, making ASO unsuitable for most financial management applications.

NEW QUESTION # 111

Initialization Blocks are never used to initialize which option?

- A. Dynamic Repository Variables
- **B. rpd file**
- C. System Session Variables
- D. Non System Session Variables

Answer: B

Explanation:

Initialization blocks are used to initialize dynamic repository variables, system session variables, and nonsystem session variables.
