# New PCCP Test Bootcamp | New PCCP Exam Dumps

P.S. Free & New PCCP dumps are available on Google Drive shared by RealValidExam: https://drive.google.com/open?id=18xYqzEue-eLpvgOUV5YJ5KWxRAc6g1mS

After decades of hard work, our PCCP exam questions are currently in a leading position in the same kind of education market, our PCCP learning materials, with their excellent quality and constantly improved operating system, In many areas won the unanimous endorsement of many international customers. Advanced operating systems enable users to quickly log in and use, in constant practice and theoretical research, our PCCP qualification question has come up with more efficient operating system to meet user needs on the PCCP exam.

Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details
Topic 1	• Cloud Security: This section targets a Cloud Security Specialist and addresses major cloud architectures and topologies. It discusses security challenges like application security, cloud posture, and runtime security. Candidates will learn about technologies securing cloud environments such as Cloud Security Posture Management (CSPM) and Cloud Workload Protection Platforms (CWPP), as well as the functions of a Cloud Native Application Protection Platform (CNAPP) and features of Cortex Cloud.
Topic 2	• Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xpanse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.

Topic 3	• Cybersecurity:This section of the exam measures skills of a Cybersecurity Practitioner and covers fundamental concepts of cybersecurity, including the components of the authentication, authorization, and accounting (AAA) framework, attacker techniques as defined by the MITRE ATT&CK framework, and key principles of Zero Trust such as continuous monitoring and least privilege access. It also addresses understanding advanced persistent threats (APT) and common security technologies like identity and access management (IAM), multi-factor authentication (MFA), mobile device and application management, and email security.
Topic 4	• Secure Access: This part of the exam measures skills of a Secure Access Engineer and focuses on defining and differentiating Secure Access Service Edge (SASE) and Secure Service Edge (SSE). It covers challenges related to confidentiality, integrity, and availability of data and applications across data, private apps, SaaS, and AI tools. It examines security technologies including secure web gateways, enterprise browsers, remote browser isolation, data loss prevention (DLP), and cloud access security brokers (CASB). The section also describes Software-Defined Wide Area Network (SD-WAN) and Prisma SASE solutions such as Prisma Access, SD-WAN, AI Access, and enterprise DLP.
Topic 5	• Endpoint Security: This domain is aimed at an Endpoint Security Analyst and covers identifying indicators of compromise (IOCs) and understanding the limits of signature-based anti-malware. It includes concepts like User and Entity Behavior Analytics (UEBA), endpoint detection and response (EDR), and extended detection and response (XDR). It also describes behavioral threat prevention and endpoint security technologies such as host-based firewalls, intrusion prevention systems, device control, application control, disk encryption, patch management, and features of Cortex XDR.

Quiz 2025 Palo Alto Networks PCCP Latest New Test Bootcamp

There are several pages we have set a special module to answer the normal question on our PCCP exam braindumps that most candidates may pay great attention to. If you come across questions about our PCCP training materials, you can browser the module. Also, we have a chat window below the web page. You can write down your questions on the PCCP Study Guide and send to our online workers. You will soon get a feedback and we will give you the most professional guidance.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q22-Q27):

NEW QUESTION # 22
What type of attack redirects the traffic of a legitimate website to a fake website?

- A. Spear phishing
- B. Pharming
- C. Whaling
- D. Watering hole

Answer: B

Explanation:
Pharming is an attack that redirects traffic from a legitimate website to a malicious fake website, typically by corrupting the DNS system or modifying host files, with the intent of stealing user credentials or sensitive data.

NEW QUESTION # 23
What are two common lifecycle stages for an advanced persistent threat (APT) that is infiltrating a network? (Choose two.)

- A. Privilege escalation
- B. Communication with covert channels
- C. Lateral movement
- D. Deletion of critical data

Answer: A,C

Explanation:
Lateral movement is a key stage where the attacker moves across the network to find valuable targets.
Privilege escalation involves gaining higher access rights to expand control within the compromised environment.
Communication with covert channels is a tactic used during persistence or exfiltration, while deletion of critical data is not a standard APT lifecycle stage - it's more characteristic of destructive attacks.

NEW QUESTION # 24
What is the function of an endpoint detection and response (EDR) tool?

- A. To integrate data from different products in order to provide a holistic view of security posture
- B. To monitor activities and behaviors for investigation of security incidents on user devices
- C. To ingest alert data from network devices
- D. To provide organizations with expertise for monitoring network devices

Answer: B

Explanation:
Endpoint Detection and Response (EDR) tools monitor, record, and analyze endpoint activity to detect suspicious behavior, investigate incidents, and respond to threats on user devices such as laptops and desktops.

NEW QUESTION # 25
Which feature of cloud-native security platforms (CNSPs) focuses on protecting virtual machine (VM), container, and serverless deployments against application-level attacks during runtime?

- A. Configuration assessment
- B. Data security
- C. Workload security
- D. Asset inventory

Answer: C

Explanation:
Workload security in a Cloud-Native Security Platform (CNSP) focuses on protecting VMs, containers, and serverless deployments against application-level attacks during runtime. It ensures that workloads remain secure by monitoring behavior, enforcing policies, and detecting threats in real time.

NEW QUESTION # 26
What is an event-driven snippet of code that runs on managed infrastructure?

- A. Hypervisor
- B. Serverless function
- C. Docker container
- D. API

Answer: B

Explanation:
A serverless function is an event-driven snippet of code that runs on managed infrastructure, typically as part of a Function as a Service (FaaS) model. It is executed in response to events such as HTTP requests or database changes, and the cloud provider handles the underlying infrastructure.

NEW QUESTION # 27
......

Our PCCP questions answers study guide is the best option for you to pass exam easily. Our experts are busy in providing the most

updated content that could ensure your 100% success in PCCP actual test. The up-to-date Palo Alto Networks exam dumps consist of latest practice questions answers and explanations. We are devoted to take appropriate steps in improving our products like PCCP Pass Guide.
