Microsoft Power Platform Functional Consultant Sample Questions (Q145-Q150):

NEW QUESTION # 145

You are a Dynamics 365 Customer Services administrator. You have a Production instance and Sandbox instance. Users record Production instance data in the Sandbox instance.

You need to ensure that the users only record data in the Production instance.

Which security function needs to be edited to prevent access to the Sandbox? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Application area	Security function
Microsoft 365 admin center	<div>▼</div> <ul style="list-style-type: none"> Roles Groups Licenses Access rights
Dynamics 365 Sandbox instance	<div>▼</div> <ul style="list-style-type: none"> Roles Groups Access rights

Answer:

Explanation:

Application area	Security function
Microsoft 365 admin center	<div>▼</div> <ul style="list-style-type: none"> Roles Groups Licenses Access rights
Dynamics 365 Sandbox instance	<div>▼</div> <ul style="list-style-type: none"> Roles Groups Access rights

Explanation

Application area	Security function
Microsoft 365 admin center	<div>▼</div> <ul style="list-style-type: none"> Roles Groups Licenses Access rights
Dynamics 365 Sandbox instance	<div>▼</div> <ul style="list-style-type: none"> Roles Groups Access rights

NEW QUESTION # 146

You are a consultant. A client asks you to remove several solutions in one of their Microsoft Dataverse environments. The client wants to know what effect removing the solutions will have on the rest of the system.

You need to explain the results of removing the solutions.

Which components will be affected? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Solution description	Component or components removed
An unmanaged solution contains a custom table. The table is in a parent-child relationship with another table.	<div><div>The solution only.</div><div>The solution and the lookup column.</div><div>The solution, the table, and any data in the table.</div></div>
A managed solution patch contains an update to a column label. The column is used in several forms and views.	<div><div>The solution and the updated column label.</div><div>The solution, the column, and any data in the column.</div><div>The solution, the table, and the updated column label.</div></div>
A managed solution that was created by an independent solution provider (ISV) contains a custom table and changes to the site map.	<div><div>The solution only.</div><div>The solution and the site map.</div><div>The solution, the table, and any data in the table.</div></div>

Answer:

Explanation:

Solution description	Component or components removed
An unmanaged solution contains a custom table. The table is in a parent-child relationship with another table.	<div><div>The solution only.</div><div>The solution and the lookup column.</div><div>The solution, the table, and any data in the table.</div></div>
