The software is compatible with Windows so you can run it easily on your computer.

Google Associate-Google-Workspace-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	- Managing Endpoints: This section measures the proficiency of Endpoint Security Engineers and Mobility Managers in applying mobile device policies (BYOD company-owned), Chrome browser enrollment - extension management, and troubleshooting synchronization issues across Workspace services.
Topic 2	Managing Security Policies and Access Controls: Validating skills of Security Architects and IAM Specialists, this domain enforces password policies, 2SV methods (Authenticator, passkeys), and context-aware access rules. It covers security group management, admin role delegation (super admins), Security Center risk analysis, and third-party app controls (Marketplace allowlists, SAML integration).
Topic 3	- Managing User Accounts, Domains, and Directory: This section measures the skills of Identity Administrators and Directory Managers, covering user lifecycle processes like automated provisioning - de-provisioning, SAML SSO configuration, and GCDS integration. It includes designing OU hierarchies aligned with organizational structures, managing dynamic - security groups, domain verification (MX records), and resource booking permissions for rooms - equipment.
Topic 4	- Managing Data Governance and Compliance: Designed for Data Governance Analysts and Compliance Officers, this section addresses Vault eDiscovery, DLP rule creation for sensitive data protection (credit cards, PII), Drive trust rules for external sharing restrictions, data location controls, and classification via Drive - Gmail labels. It evaluates strategies for Takeout management and regulatory alignment.

Exam Associate-Google-Workspace-Administrator Success - Associate-Google-Workspace-Administrator Unlimited Exam Practice

The Google Associate-Google-Workspace-Administrator Exam Dumps is easy to use and very easy to understand, ensuring that it is student-oriented. You can choose from 3 different formats available according to your needs. The 3 formats are desktop Associate-Google-Workspace-Administrator Practice Test software, web-based Associate Google Workspace Administrator (Associate-Google-Workspace-Administrator) practice exam, and Associate-Google-Workspace-Administrator dumps PDF format.

Google Associate Google Workspace Administrator Sample Questions (Q58-Q63):

NEW QUESTION # 58

The names and capacities of several conference rooms have been updated. You need to use the most efficient way to update these details.

What should you do?

- A. Delete the existing resources and recreate the resources with the updated information.
- B. Edit each resource in the Google Admin console.
- C. Export the resource list to a CSV file, make the changes, and re-import the updated file.
- D. Add the modified rooms as new resources. Tell employees not to use old rooms.

Answer: C

Explanation:

Exporting the resource list to a CSV file, making the necessary updates, and then re-importing the file is the most efficient method for updating multiple conference rooms at once. This approach allows you to make bulk updates quickly without needing to edit each resource individually or delete and recreate rooms. It also ensures that the updated information is applied to all affected rooms at once.

NEW QUESTION # 59

You are investigating a potential data breach. You need to see which devices are accessing corporate data and the applications used. What should you do?

- A. Analyze the User Accounts section in the Google Admin console.
- B. Analyze the security investigation tool to access device log data.
- C. Analyze the Google Workspace reporting section of the Admin console.
- D. Analyze the audit log in the Admin console for device and application activity.

Answer: D

NEW QUESTION # 60

A user in your organization received a spam email that they reported for further investigation. You need to find out more details and the scope of this incident as quickly as possible. What should you do?

- A. Conduct a search in the security investigation tool to find this email, and identify whether additional users were affected.
- B. Conduct a search to find all emails sent by the sender by using the Gmail API.
- C. Conduct an Email reports search to find this email and all of the email's recipients.
- D. Conduct a Vault search to find this email and identify if additional users were affected.

Answer: A

Explanation:

The security investigation tool is specifically designed for investigating security incidents like spam and phishing emails. It allows you to search for emails, review their details, and determine the scope of the incident, including identifying whether other users were affected. This tool is the most appropriate and efficient way to respond to the incident.

NEW QUESTION # 61

Your company wants to start using Google Workspace for email. Your domain is verified through a third-party provider. You need to route the email to Google Workspace. What should you do?

- A. Create a CNAME record that maps your domain to "gmail.com."
- **B. Update your domain's MX records to the Google Workspace MX records provided in the setup instructions.**
- C. Change your domain's A record to point to Google's mail servers.
- D. Configure a forwarding rule in your current email system to redirect all messages to Gmail.

Answer: B

Explanation:

To route your email to Google Workspace, you need to update your domain's MX (Mail Exchange) records to point to Google's mail servers. This step ensures that emails sent to your domain are delivered to your Google Workspace Gmail accounts. The MX records are provided in the setup instructions during the Google Workspace configuration process.

NEW QUESTION # 62

You've received multiple reports about a suspicious email from someone who is pretending to be from your organization's human resources department. The email is prompting employees to click a link for a password update. You want to remediate this sender's emails. What should you do?

- **A. Use the security investigation tool to search for users who received the suspicious email, and select Mark message as phishing.**
- B. Create an activity rule to alert administrators to similar emails from that sender.
- C. Use the security investigation tool to action the suspicious email and select Mark message as spam.
- D. Notify all employees and request that they report this email as spam.

Answer: A

Explanation:

The security investigation tool allows you to search for and take action on suspicious emails within your organization. Marking the email as phishing helps to flag the email as malicious and prevents further emails from the same sender from being delivered to users' inboxes. This also ensures that the email is properly categorized for review and investigation by your security team.

NEW QUESTION # 63

.....
