NEW QUESTION # 122

The CTO of AW Computing has defined a new policy for cases to improve customer satisfaction. All cases submitted with a Case

Reason of Installation must be acknowledged immediately via email and assigned to the appropriate agents. Any cases that are still in the New status after 4 hours must be escalated to support management.

What case management tools need to be utilized for this requirement?

- A. Auto-response rules, Macros, Entitlements
- B. Auto-response rules, Entitlements, Escalation Rules
- **C. Auto-response rules, Queues, Macros**
- D. Auto-response rules, Queues, Escalation Rules

Answer: C

Explanation:

Explanation

To advertise on TV, radio, print, and social under one banner called New Runners and aggregate total statistics for this marketing effort, an administrator should use Parent campaign field on Campaign object. This field allows creating hierarchical relationships between campaigns by specifying one campaign as parent of another campaign. Parent campaigns roll up statistics from child campaigns such as number of leads generated, amount of revenue won etc. For example, an administrator can create four child campaigns for TV, radio, print and social ads respectively and link them to one parent campaign called New Runners using Parent campaign field. Junction object, lookup relationship, and master-detail relationship are not features related to Campaign object or hierarchy.

New leads need to be routed to the correct Sales person based on the lead address.

- A. Assign with an escalation rule
- B. Create a formula field
- C. Configure validation rule
- **D. Use lead assignment rule**

Answer: D

Explanation:

Explanation

Lead assignment rule is a feature that can be used to route new leads to the correct sales person based on the lead address. Lead assignment rule can assign leads to users or queues based on certain criteria, such as lead source, industry, or location. Lead assignment rule can also send email notifications to the new lead owners or other recipients.

Clod Kicks has a screen flow with two questions on the same screen, but only one is necessary at a time. The administrator has been asked to show only the questions that is needed.

How should an administrator complete this?

- A. Use a new version of the flow for each scenario.
- B. Use a decision element and a new screen to show the proper question
- **C. Use a conditional visibility to hide the unnecessary question**
- D. Use branching in the flowscreen to show the proper scenario

Answer: C

Explanation:

Explanation

Conditional visibility is a feature that allows administrators to show or hide screen components in a flow based on certain conditions or criteria. For example, conditional visibility can show only one question on a screen depending on the value of another field or variable. Conditional visibility consists of one or more rules that define when to show or hide a component based on an expression that evaluates to true or false. In this case, the administrator can use conditional visibility to hide the unnecessary question on the screen flow based on the scenario.
