- A. Durations of all sprints for the full release are defined based on planned complexity.
- B. Scope and duration of testing are finalized.
- **C. User Stories are in Ready state for only the first 2 to 3 sprints.**
- D. Project scope and planning are completed and final.

Answer: C

NEW QUESTION # 30

What are the SAP Cloud ALM Implementation capabilities? Note: There are 2 correct answers to this question.

- **A. Natively built in test automation**
- B. Monitor project performance centrally
- **C. Perform implementation activities**
- D. Check data quality prior to migration

Answer: A,C

Explanation:

SAP Cloud ALM (Application Lifecycle Management) provides a comprehensive set of capabilities to support the implementation and operations of SAP solutions. Among the options provided:

* B. Perform implementation activities: This is a core capability of SAP Cloud ALM, allowing project teams to plan, execute, and

monitor various tasks associated with implementing SAP solutions. This includes managing the project scope, timeline, resources, and deliverables.

* D. Natively built-in test automation: SAP Cloud ALM includes built-in test automation features which facilitate the automated testing of processes, thereby reducing manual testing efforts and accelerating the overall project timeline. Options A (Check data quality prior to migration) and C (Monitor project performance centrally) are not specifically mentioned as part of the implementation capabilities within the context of SAP Cloud ALM, but they could be associated with broader SAP tools or other specific management features. NEW QUESTION # 31

When does the product owner accept or reject the user stories included in the Sprint?

- A. During the daily Scrum meeting
- B. During the Quality Gate
- C. During the Sprint Review
- D. During the user acceptance test

Answer: C

Explanation:

In Agile project delivery, the product owner accepts or rejects the user stories included in the Sprint:

* A. During the Sprint Review. This meeting at the end of each sprint is where the development team demonstrates what they have accomplished during the sprint, and the product owner reviews the completed work and decides whether to accept or reject the user stories based on whether they meet the agreed-upon criteria.

The Sprint Review is essential as it ensures that the delivered increment meets the business needs and provides an opportunity for immediate feedback before the next sprint begins. References:
