2025 100% Free HPE7-A01 –Newest 100% Free New Soft Simulations | HPE7-A01 Latest Exam Format

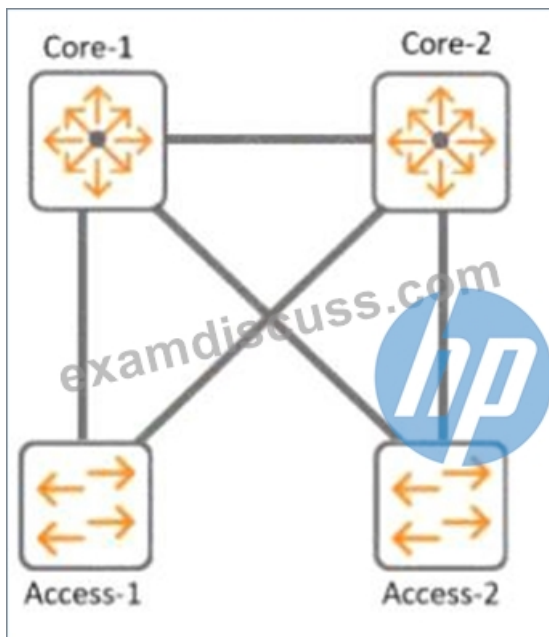

Our HPE7-A01 preparation exam have assembled a team of professional experts incorporating domestic and overseas experts and scholars to research and design related exam bank, committing great efforts to help the candidates to pass the HPE7-A01 exam. Most of the experts have been studying in the professional field for many years and have accumulated much experience in our HPE7-A01 Practice Questions. Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills to help you get the dreaming HPE7-A01 certification.

With the increasing demand for wireless networking solutions in today's businesses, the HPE7-A01 Certification has become essential for IT professionals who want to advance their careers or demonstrate their expertise in the field. Aruba Certified Campus Access Professional Exam certification attests to a professional's ability to configure and optimize wireless networks, implement security policies and protocols, and resolve technical issues related to wireless networking.

HP Aruba Certified Campus Access Professional Exam Sample Questions (Q86-Q91):

NEW QUESTION # 86

Refer to the exhibit.

With Core-1, what is the default value for config-revision?

- A. 0. 0
- B. 1-0
- C. 0
- D. 1

Answer: D

Explanation:

The default value for config-revision on Core-1 is 0. Config-revision is a parameter that indicates the configuration version of a VSX pair. It is used to synchronize the configuration between the VSX peers and to detect any configuration mismatch. The config-revision value is set to 0 by default on both VSX peers and is incremented by 1 every time a configuration change is made on either peer. The other options are incorrect because they do not reflect the default value of config-revision. References:

NEW QUESTION # 87

Which component is used by the Aruba Network Analytics Engine (NAE)?

- A. Lisp-based agents
- B. JSON-based scripts
- C. Ruby-based scripts
- D. Current State Database

Answer: B

Explanation:

JSON-based scripts are the components used by the Aruba Network Analytics Engine (NAE).

NAE is a feature that provides network monitoring and troubleshooting capabilities using JSON- based scripts called agents. Agents collect data from various sources, such as switch CLI commands, SNMP queries, REST APIs, etc., and analyze them using predefined rules and thresholds. Agents can also generate alerts, notifications, actions, or reports based on the analysis results.

NEW QUESTION # 88

Which statement best describes QoS?

- A. Identifying specific traffic for special treatment
- B. Scoring traffic based on the quality of the contents
- C. Determining which traffic passes specified quality metrics
- D. Identifying the quality of the connection

Answer: A

Explanation:

Explanation

QoS stands for Quality of Service and is a mechanism that allows network devices to prioritize and differentiate traffic based on certain criteria, such as application type, source, destination, etc³. QoS involves identifying specific traffic for special treatment and applying policies and actions to improve its performance or meet certain service level agreements (SLAs)³. QoS can help network devices to manage congestion, delay, jitter, packet loss, bandwidth allocation, etc., for different types of traffic³. QoS can be implemented at various layers of the network stack and across different network domains. References: 3

NEW QUESTION # 89

You are building a configuration in Central that will be used for a standardized network design for small sites for your company, you want to use GUI configuration for gateways and Aps, while template configuration for switches. You need to align with Aruba best practices.

Which set of actions will satisfy these requirements?

- **A. Create a single group in Central. Create a unique site for each location, and assign devices to the appropriate site.**
- B. Create a single group in Central. Create a unique site for each type of device, and assign devices to the appropriate site.
- C. Create one group in Central for switches a second group for APs. and a third group for gateways Create a unique site for each location, and assign devices to the appropriate site.
- D. Create one group in Central for switches and a second group for APs and gateways. Create a unique site for each location, and assign devices to the appropriate site.

Answer: A

Explanation:

Explanation

This is because option C shows how to create a single group in Central with different configuration methods defined for each device type. For example, you can create a group with the name Group1, and within this group, you can enable template-based configuration method for switches and UI-based configuration method for Instant APs and Gateways. Aruba Central identifies both these groups under a single name (Group1). If a device type in the group is marked for template-based configuration method, the group name is prefixed with TG (TG Group1). You can use Group1 as the group ID for workflows such as user management, monitoring, reports, and audit trail².

NEW QUESTION # 90

You are proposing new CX 8360 VSX switches to replace a customer's existing core switches.

The customer is concerned about the possibility of a split-brain scenario between the VSX pair.

How is the VSX pair affected when the ISL is down and keepalive is up?

- A. The VSX LAGs are in a degraded state.
- B. The VSX pair nodes are still forwarding traffic.
- C. The VSX pair is out-of-sync.
- **D. The VSX pair is not at risk.**

Answer: D

NEW QUESTION # 91

.....

If you must complete your goals in the shortest possible time, our HPE7-A01 exam materials can give you a lot of help. For our HPE7-A01 study guide can help you pass you exam after you study with them for 20 to 30 hours. And our products are global, and you can purchase our HPE7-A01 training guide is wherever you are. Believe us, our products will not disappoint you. Our global users can prove our strength.
