

New Study NCA-6.10 Questions & NCA-6.10 Real Exam Answers

DOWNLOAD the newest TestKingFree NCA-6.10 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=10_KuPQ0QigP9YZq9ATMsjsBRTIrsAoBv

By contrasting with other products in the industry, our NCA-6.10 test guide really has a higher pass rate, which has been verified by many users. As long as you use our NCA-6.10 exam training I believe you can pass the exam. If you fail to pass the exam, we will give a full refund. NCA-6.10 learning guide hopes to progress together with you and work together for their own future. The high passing rate of Nutanix Certified Associate v6.10 exam training guide also requires your efforts. If you choose NCA-6.10 test guide, I believe we can together contribute to this high pass rate.

Although our company has designed the best and most suitable NCA-6.10 learn prep, we also do not stop our step to do research about the study materials. All experts and professors of our company have been trying their best to persist in innovate and developing the NCA-6.10 test training materials all the time in order to provide the best products for all people and keep competitive in the global market. We believe that the study materials will keep the top selling products. We sincerely hope that you can pay more attention to our NCA-6.10 study questions.

Nutanix NCA-6.10 Real Exam Answers | Latest NCA-6.10 Test Fee

We learned that a majority of the candidates for the NCA-6.10 exam are office workers or students who are occupied with a lot of things, and do not have plenty of time to prepare for the NCA-6.10 exam. Taking this into consideration, we have tried to improve the quality of our NCA-6.10 training materials for all our worth. Now, I am proud to tell you that our NCA-6.10 Training Materials

are definitely the best choice for those who have been yearning for success but without enough time to put into it. There are only key points in our NCA-6.10 training materials.

Nutanix Certified Associate v6.10 Sample Questions (Q70-Q75):

NEW QUESTION # 70

An administrator needs to create a VM Template from an existing VM.
What is required for this action to be successful?

- A. Windows OS is installed.
- B. Sysprep or Cloud-init script.
- **C. The VM is powered off.**
- D. The VM is powered on.

Answer: C

Explanation:

To create a VM template from an existing VM in Nutanix, the VM must be powered off. This ensures that the template is consistent and does not include any transient data or activity from the VM. Once the VM is powered off, the administrator can use the Prism UI to take a snapshot and designate it as a template.

* A. Sysprep or Cloud-init script: These are optional for post-deployment configuration, not mandatory for creating a template.

* B. The VM is powered on: This is incorrect, as the VM must be powered off.

* C. Windows OS is installed: The OS type is irrelevant for creating a template.

* D. The VM is powered off: Correct, as creating a template requires the VM to be in a powered-off state.

NEW QUESTION # 71

How many copies of the metadata are maintained within a Redundancy Factor 3 cluster?

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

In a Redundancy Factor 3 (RF3) cluster, 5 copies of the metadata are maintained to ensure data durability and cluster resiliency. RF3 provides fault tolerance against up to two simultaneous failures (e.g., node or disk failures) and requires more metadata copies to achieve this level of protection.

Other redundancy factors:

* RF2 maintains 3 copies of metadata.

* RF3 requires at least 5 metadata copies to protect against additional failures.

NEW QUESTION # 72

Which option is supported by Nutanix for Data-at-Rest encryption?

- A. Data-only Encryption
- **B. Software-only Encryption**
- C. Cluster-only Encryption
- D. Storage Pool-only Encryption

Answer: B

Explanation:

The correct answer is D. Software-only Encryption.

Nutanix supports Data-at-Rest Encryption (DARE) through both hardware-based and software-based methods. Among the supported solutions, software-only encryption is a widely used and officially supported method, especially when Self-Encrypting Drives (SEDs) are not in use.

Key facts about Nutanix DARE:

- * Enables encryption of data written to physical media.
- * Works at the CVM and controller layer, ensuring all I/O is encrypted before being persisted.
- * Software-based encryption can be enabled via Prism Central or command-line using Native Key Management (NKM) or external KMIP-compliant key managers.
- * Hardware encryption (SED) is optional and not required for DARE.

Clarifications:

- * A. Storage Pool-only Encryption: Not valid; encryption applies at the cluster level, not only to storage pools.
- * B. Data-only Encryption: Ambiguous and not a Nutanix-supported term.
- * C. Cluster-only Encryption: Misleading; encryption is applied to data at rest, not to the "cluster" object.

Prism UI Navigation Path:

Settings > Security > Encryption

Official Reference:

- * Nutanix Security Guide - Data-at-Rest Encryption
- * Nutanix Bible - Encryption Section
- * Excerpt: "Nutanix supports software-only data-at-rest encryption using Native Key Management or external KMIP key managers, without requiring self-encrypting drives."

NEW QUESTION # 73

At what time does LCM auto-inventory run by default?

- A. 2:00am
- B. 1:00am
- C. 4:00am
- D. 3:00am

Answer: A

Explanation:

By default, Nutanix Lifecycle Manager (LCM) auto-inventory runs at 2:00 AM local cluster time. LCM performs a daily check to gather information about available updates for firmware, software, and other components to ensure the cluster remains up-to-date. This operation is non-disruptive and does not impact cluster performance.

NEW QUESTION # 74

Which statement best describes the Storage Pool?

- A. Group of physical disks
- B. Group of boot drives
- C. Group of vDisks
- D. Group of Storage Containers

Answer: A

Explanation:

The correct answer is B. Group of physical disks.

In Nutanix architecture:

- * A Storage Pool is the aggregation of physical storage devices (SSD, HDD) across all nodes in a cluster.
- * Each storage pool backs one or more Storage Containers, which are logical partitions used for data placement.
- * Storage pools cannot span clusters and are always confined to the cluster in which they are defined.

Clarifications:

- * A (Storage Containers): These are logical groupings within storage pools.

* C (Boot Drives): These are not part of the pool.

* D (vDisks): These exist within VMs and are backed by containers, not pools directly.

Prism UI Navigation Path:

Storage > Storage Pools

Official Reference:

* Nutanix Bible - Storage Pool Definition

* Nutanix Storage Admin Guide

* Excerpt: "A storage pool is made up of physical disks from one or more nodes and serves as the physical storage foundation for containers."

NEW QUESTION # 75

.....

The pass rate is 98% for NCA-6.10 exam bootcamp, if you choose us, we can ensure you that you can pass the exam just one time. In addition, we offer you free demo to have a try before buying, so that you can know what the complete version is like. In order to strengthen your confidence for NCA-6.10 training materials, we are pass guarantee and money back guarantee, and we will refund your money if you fail to pass the exam. We have a professional service team and they have the professional knowledge for NCA-6.10 Exam Bootcamp, if you have any questions, you can contact with them.
