New SC-401 Test Camp - Valid SC-401 Test Preparation

In order to make the SC-401 exam easier for every candidate, PassLeader compiled such a wonderful SC-401 study materials that allows making you test and review history performance, and then you can find your obstacles and overcome them. In addition, once you have used this type of SC-401 Exam Question online for one time, next time you can practice in an offline environment. It must be highest efficiently exam tool to help you pass the SC-401 exam.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 2	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 3	• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 4	• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q29-Q34):

NEW QUESTION # 29

You have a Microsoft 365 subscription.

You create and run a content search from the Microsoft Purview portal.

You need to download the results of the content search.

What should you obtain first?

- A. a pin
- B. a password
- **C. an export key**
- D. a certificate

Answer: C

Explanation:

When you run a Content Search in the Microsoft Purview compliance portal and want to download/export the search results, you must:

Select Export results in the Content Search tool.

Purview generates an Export key.

Use the eDiscovery Export Tool (ClickOnce application) to download the results.

The Export key is required to authenticate the export process.

Certificate # Not used in this process.

Password # Not required for export.

PIN # Not relevant here.

Export Key # # Mandatory to export search results.

Export Content Search results - Microsoft Learn

NEW QUESTION # 30

You have a Microsoft 365 E5 subscription that contains two users named User1 and User2.

You create the audit retention policies shown in the following table.

Priority	Policy name	Record type	Activities	Users	Duration
10	AuditRetention1	ExchangeItem	MailboxLogin	None	90 Days
20	AuditRetention2	ExchangeItem	Send, MailItemsAccessed	User1	9 Months
30	AuditRetention3	Sharepoint	None	User1	6 Months
40	AuditRetention4	Sharepoint	SiteRenamed	User1	9 Months
50	AuditRetention5	Sharepoint	SiteRenamed	None	10 Years

The users perform the following actions:

*User1 renames a Microsoft SharePoint Online site.

*User2 sends an email message.

How long will the audit log records be retained for each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

User1 renames a SharePoint site:

- 90 days
- 6 months
- 9 months
- 1 year
- 10 years

User2 sends an email message:

- 90 days
- 6 months
- 9 months
- 1 year
- 10 years

Answer:

Explanation:

Answer Area

User1 renames a SharePoint site:

- 90 days
- 6 months
- 9 months
- 1 year
- 10 years

User2 sends an email message:

- 90 days
- 6 months
- 9 months
- 1 year
- 10 years

NEW QUESTION # 31

You have a Microsoft 365 subscription.

You have a Microsoft SharePoint Online site named Site1. Site1 has a document library that contains the files shown in the following table.

Name	File type	Created on
File1	DOCX	December 1, 2023
File2	XLSX	February 5, 2024
File3	PNG	May 4, 2023

From the Microsoft Purview compliance portal, for Site1 you create a content search named Search1 that has the date in the YYYY-MM-DD format as shown in the following exhibit.

The screenshot shows the 'Define your search conditions' page in the Microsoft Purview compliance portal. The 'Query language-country/region' is set to 'None'. The 'Query builder' is selected. Under 'Created', the date range is set to 'Before' 2024-01-01. Under 'File type', the 'Exclude none of' option is selected, and 'docx' is entered in the text box.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

The screenshot shows the 'Answer Area' with three statements and two columns: 'Yes' and 'No'. Each statement has a radio button next to each column.

Statements	Yes	No
File1 is included in the Search1 results.	☐	☐
File2 is included in the Search1 results.	☐	☐
File3 is included in the Search1 results.	☐	☐

Answer:

Explanation:

The screenshot shows the 'Answer Area' with the correct answers selected. File1 is 'Yes', File2 is 'No', and File3 is 'No'.

Statements	Yes	No
File1 is included in the Search1 results.	☒	☐
File2 is included in the Search1 results.	☐	☒
File3 is included in the Search1 results.	☐	☒

Explanation:

The screenshot shows the 'Answer Area' with the correct answers selected. File1 is 'Yes', File2 is 'No', and File3 is 'No'.

Statements	Yes	No
File1 is included in the Search1 results.	☒	☐
File2 is included in the Search1 results.	☐	☒
File3 is included in the Search1 results.	☐	☒

NEW QUESTION # 32

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1. You need to implement Microsoft Purview data lifecycle management. What should you create first?

- A. an auto-labeling policy
- **B. a retention label**
- C. a data loss prevention (DLP) policy
- D. a sensitivity label policy

Answer: B

Explanation:

To implement Microsoft Purview Data Lifecycle Management for SharePoint Online (Site1), you need to create a retention label first. Retention labels define how long content should be retained or deleted based on compliance requirements. Once a retention label is created, it can be manually or automatically applied to content in SharePoint Online, Exchange, OneDrive, and Teams. After creating a retention label, you can configure label policies to apply them to Site1 and other locations.

NEW QUESTION # 33

You are implementing Microsoft Purview Advanced Message Encryption for a Microsoft 365 tenant named contoso.com. You need to meet the following requirements:

- * All email to a domain named fabrikam.com must be encrypted automatically.
- * Encrypted emails must expire seven days after they are sent.

What should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

All email to a domain named fabrikam.com must be encrypted automatically.

Encrypted emails must expire seven days after they are sent.

Options for Requirement 1:

- A data connector in the Microsoft Purview portal
- A data loss prevention (DLP) policy in the Microsoft Purview portal
- A mail flow connector in the Exchange admin center
- A mail flow rule in the Exchange admin center

Options for Requirement 2:

- A custom branding template in Microsoft Exchange Online PowerShell
- A label policy in the Microsoft Purview portal
- A mail flow rule in the Exchange admin center
- A sensitive info type in the Microsoft Purview portal

Answer:

Explanation:

Answer Area

All email to a domain named fabrikam.com must be encrypted automatically.

Encrypted emails must expire seven days after they are sent.

Options for Requirement 1:

- A data connector in the Microsoft Purview portal
- A data loss prevention (DLP) policy in the Microsoft Purview portal
- A mail flow connector in the Exchange admin center
- A mail flow rule in the Exchange admin center

Options for Requirement 2:

- A custom branding template in Microsoft Exchange Online PowerShell
- A label policy in the Microsoft Purview portal
- A mail flow rule in the Exchange admin center
- A sensitive info type in the Microsoft Purview portal

Explanation:

Answer Area

All email to a domain named fabrikam.com must be encrypted automatically.

Encrypted emails must expire seven days after they are sent.

Options for Requirement 1:

- A mail flow rule in the Exchange admin center

Options for Requirement 2:

- A custom branding template in Microsoft Exchange Online PowerShell

Requirement 1 - Encrypt all email to fabrikam.com automatically

Correct choice: A label policy in the Microsoft Purview portal
