

New WGU Managing-Cloud-Security Exam Cram & Real Managing-Cloud-Security Questions

WGU D320 MANAGING CLOUD SECURITY NEW EXAM QUESTIONS AND CORRECT ANSWERS 2025-2026!!

What type of PaaS storage would a set of Website files, or Multimedia objects use?

- A) Object
 - B) Unstructured
 - C) Volume
 - D) Structured
- B

A standard used for a common format to exchange information in a Federated Identity is in which format below?

- A) XML
 - B) SAML
 - C) HTML
 - D) JSON
- B

What does the software-defined networking abstract from the traffic forwarding?

- A) Routing
- B) Session
- C) filtering

You can download Prep4cram WGU Managing-Cloud-Security PDF dumps file on your desktop computer, laptop, tab, or even on your smartphone. Just download the Managing-Cloud-Security PDF questions file after paying affordable Prepare for your WGU Managing Cloud Security (JY02) (Managing-Cloud-Security) exam questions charges and start WGU Managing Cloud Security (JY02) (Managing-Cloud-Security) exam preparation anytime and anywhere.

In order to make sure your whole experience of buying our Managing-Cloud-Security prep guide more comfortable, our company will provide all people with 24 hours online service. The experts and professors from our company designed the online service system for all customers. If you decide to buy the Managing-Cloud-Security study braindumps from our company, we can make sure that you will have the opportunity to enjoy the best online service provided by our excellent online workers. If you purchasing the Managing-Cloud-Security Test Practice files designed by many experts and professors from our company, we can promise that our online workers are going to serve you day and night during your learning period. If you have any questions about our study materials, you can send an email to us, and then the online workers from our company will help you solve your problem in the shortest time. So do not hesitate to buy our Managing-Cloud-Security prep guide.

Real Managing-Cloud-Security Questions | Managing-Cloud-Security Latest Study Materials

You may urgently need to attend Managing-Cloud-Security certificate exam and get the Managing-Cloud-Security certificate to prove you are qualified for the job in some area. But what certificate is valuable and useful and can help you a lot? Passing the Managing-Cloud-Security test certification can help you prove that you are competent in some area and if you buy our Managing-Cloud-Security Study Materials you will pass the Managing-Cloud-Security test almost without any problems. There are many benefits after you pass the Managing-Cloud-Security certification such as you can enter in the big company and double your wage.

WGU Managing Cloud Security (JY02) Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which action should be taken to ensure that unencrypted network traffic is protected?

- A. Data should be transmitted using the secure socket layer (SSL) protocol.
- **B. Data should be transmitted using the transport layer security (TLS) protocol.**
- C. Data should be transmitted using generic routing encapsulation (GRE).
- D. Data should be transmitted after it is compressed and password protected using gunzip (GZ).

Answer: B

Explanation:

The most effective way to protect network traffic from interception is Transport Layer Security (TLS). TLS provides confidentiality, integrity, and authentication by encrypting data as it travels between client and server. Unlike older protocols like SSL, which is now deprecated due to vulnerabilities, TLS is the industry-standard protocol endorsed by modern security frameworks.

Compression and password protection through GZ is not a reliable method, as it does not offer strong encryption or resistance against sophisticated interception attacks. GRE is a tunneling protocol and does not inherently provide encryption.

By implementing TLS, organizations ensure protection against on-path attacks, replay attacks, and packet sniffing. TLS also supports features such as forward secrecy and certificate-based authentication, ensuring both secure data transmission and mutual trust between endpoints. In compliance-driven industries like healthcare and finance, TLS is explicitly mandated for protecting sensitive information in transit.

NEW QUESTION # 60

An organization designing a data center wants the ability to quickly create and shut down virtual systems based on demand. Which concept describes this capability?

- A. High availability
- **B. Ephemeral computing**
- C. Maintenance mode
- D. Resource scheduling

Answer: B

Explanation:

The capability to rapidly create and destroy virtual systems as demand fluctuates is known as ephemeral computing. These short-lived resources are provisioned automatically when needed and decommissioned when demand subsides.

Resource scheduling helps allocate resources but does not imply temporary lifespans. High availability ensures continuous service, and maintenance mode is used for administrative tasks.

Ephemeral computing is central to elasticity in cloud environments, reducing costs and improving scalability.

For example, containers or serverless functions may run only while needed and then disappear. This model optimizes utilization, lowers expenses, and supports modern application architectures that demand agility.

NEW QUESTION # 61

An engineer has been given the task of ensuring all of the keys used to encrypt archival data are securely stored according to industry standards. Which location is a secure option for the engineer to store encryption keys for decrypting data?

- A. A repository that is made public
- B. A repository that is made private
- **C. An escrow that is kept separate from the data it is tied to**
- D. An escrow that is kept local to the data it is tied to

Answer: C

Explanation:

Industry best practice requires that encryption keys are stored separately from the data they protect. This ensures that if the data storage system is compromised, attackers cannot immediately decrypt sensitive information. The use of a secure escrow system is a recognized approach.

An escrow provides controlled storage for encryption keys, ensuring they are only accessible by authorized processes and not co-located with the protected data. Keeping keys "local" to the data creates a single point of failure. A public or private repository without specialized protection mechanisms would also be insufficient due to risks of insider threats or misconfiguration.

By placing keys in an independent escrow system, the organization enforces separation of duties, strengthens defense-in-depth, and aligns with cryptographic standards from NIST and ISO. This practice is vital when dealing with archival data, where long-term confidentiality must be preserved even as systems evolve.

NEW QUESTION # 62

An organization is conducting an external audit of the IT policies governing its production environment after moving all of its production systems to the cloud. Which IT policy will have a low priority in this environment?

- A. Hardware management
- B. Acceptable use
- C. Software procurement
- D. Data classification

Answer: A

Explanation:

In a cloud environment, responsibility for hardware management shifts primarily to the cloud provider.

Customers no longer manage servers, storage devices, or physical networks directly. As a result, hardware management policies are less critical for customer audits compared to data classification, procurement, or acceptable use.

Data classification remains essential to secure sensitive information. Software procurement policies are important to control licensing and compliance. Acceptable use policies govern employee behavior in cloud environments.

While organizations may still need high-level oversight of hardware through contracts and SLAs, detailed hardware policies have a reduced role. Instead, emphasis shifts to managing the shared responsibility model, ensuring cloud provider controls complement customer governance.

NEW QUESTION # 63

Which threat modeling process would a security analyst use to test a new application from a malicious actor's perspective?

- A. Architecture, Threats, Attack Surfaces, and Mitigation (ATASM)
- B. Process for Attack Simulation and Threat Analysis (PASTA)
- C. Spoofing, Tampering, Repudiation, Information Disclosure, Denial of Service, and Elevation of Privileges (STRIDE)
- D. Damage, Reproducibility, Exploitability, Affected Users, and Discoverability (DREAD)

Answer: B

Explanation:

The Process for Attack Simulation and Threat Analysis (PASTA) is a risk-centric threat modeling methodology that explicitly focuses on simulating real-world attacks from an adversary's perspective. Unlike STRIDE or DREAD, which classify threats and rate severity, PASTA evaluates how an attacker would exploit vulnerabilities step by step.

PASTA has seven stages, including defining objectives, decomposing applications, and simulating attacks.

This methodology helps organizations understand both technical and business risks by looking at the application as an attacker would.

STRIDE categorizes threats, DREAD provides scoring, and ATASM emphasizes architecture and mitigation.

While valuable, they are not primarily attack-simulation frameworks. PASTA enables proactive testing of defenses against realistic adversary behaviors, making it especially relevant in modern cloud and DevSecOps environments.

NEW QUESTION # 64

.....

Are you planning to crack the WGU WGU Managing Cloud Security (JY02) Managing-Cloud-Security certification test in a short

time and don't know how to prepare for it? Prep4cram has updated Managing-Cloud-Security Dumps questions for the applicants who want to prepare for the WGU Managing-Cloud-Security Certification test successfully within a few days. This study material is available in three different formats that you can trust to crack the WGU Managing-Cloud-Security certification test with ease.

Real Managing-Cloud-Security Questions: https://www.prep4cram.com/Managing-Cloud-Security_exam-questions.html

Success in the WGU Managing-Cloud-Security certification exam gives a huge boost to your career in the sector, WGU New Managing-Cloud-Security Exam Cram There are thousands of customers have passed their exam successfully and get the related certification, Moreover, you will receive free Real Managing-Cloud-Security Questions - WGU Managing Cloud Security (JY02) exam questions updates if there are any updates in the content of the Real Managing-Cloud-Security Questions - WGU Managing Cloud Security (JY02) test, WGU New Managing-Cloud-Security Exam Cram When some candidates trying to overcome an exam, they will all first think of choosing a good study material to prepare for their exam.

Thousands of them, globally sourced from a hundred different Managing-Cloud-Security manufacturers and suppliers around the world, were brought together to a central location for assembly.

You will notice that although I am normally Real Managing-Cloud-Security Questions a Macintosh user, I choose to run Lightroom via the Windows XP operating system when shooting tethered, Success in the WGU Managing-Cloud-Security Certification Exam gives a huge boost to your career in the sector.

Correct New Managing-Cloud-Security Exam Cram Offers Candidates Accurate Actual WGU WGU Managing Cloud Security (JY02) Exam Products

There are thousands of customers have passed their exam successfully and get the Real Managing-Cloud-Security Questions related certification, Moreover, you will receive free WGU Managing Cloud Security (JY02) exam questions updates if there are any updates in the content of the WGU Managing Cloud Security (JY02) test.

When some candidates trying to overcome an exam, they will all first Managing-Cloud-Security Latest Study Materials think of choosing a good study material to prepare for their exam, We are pass guarantee and money back guarantee for our customers.

- Managing-Cloud-Security Accurate Study Material - Managing-Cloud-Security Valid Practice Questions - Managing-Cloud-Security Latest Training Material ✓ □ Go to website □ www.prep4pass.com □ open and search for “Managing-Cloud-Security” to download for free □ Managing-Cloud-Security Valid Exam Camp Pdf
- Perfect New Managing-Cloud-Security Exam Cram Help You to Get Acquainted with Real Managing-Cloud-Security Exam Simulation □ Enter ▷ www.pdfvce.com ◁ and search for □ Managing-Cloud-Security □ to download for free □ □ Managing-Cloud-Security Latest Exam Notes
