Avaya IP Office™ Platform Support Online Test Sample Questions (Q92-Q97):

NEW QUESTION # 92

There is a recommended order to powering up the Avaya IP Office™ 500V2.

Why is the first step to power up the expansion modules before powering up the control unit?

- A. The expansion units take longer to power up.
- B. It is easier to start with the expansion unit at the top and then work your way down.
- **C. All expansion units need to be powered for the control unit to discover them.**
- D. The configuration files from the expansion units SD cards need to be loaded before the control unit is started.

Answer: C

Explanation:

The reason to power up the expansion modules before the control unit is that the control unit needs to discover the expansion units during the startup process. If the expansion units are not powered on first, the control unit may fail to detect and configure them properly.

NEW QUESTION # 93

A customer wants to ensure that a warning message is heard by the participants of the call when call recording is enabled. To enable this warning message, which setting needs to be set?

- A. From the Voicemail Pro Client go to Administration > Preferences > General and enable 'Play advice on Call Recording' on the General tab
- B. From the Web Manager, go to Applications > Media Manager and enable 'Play advice on Call Recording'.
- C. In the Manager application, go to the system settings and enable 'Play advice on Call Recording' on the Voicemail tab.
- **D. Edit the applicable user on either the Manager Application or the Web Manager, and enable 'Play advice on Call Recording' on the Voice Recording tab.**

Answer: D

Explanation:

To ensure that a warning message is heard by participants when call recording is enabled, you need to edit the applicable user either in the Manager Application or Web Manager. On the Voice Recording tab, enable the option 'Play advice on Call Recording'. This setting ensures that a warning message is played to the call participants when recording starts.

NEW QUESTION # 94

You have changed the default port numbers for UDP, TCP and TLS in the Avaya IP Office™ to support a SIP Remote Worker. On which two additional items do you need to change the port numbers as well? (Choose two.)

- **A. Internet Router/Firewall**
- B. Network topology
- C. Manager PC
- **D. Client device**

Answer: A,D

Explanation:

Internet Router/Firewall: The ports on the router/firewall need to be updated to allow traffic through the new port numbers for SIP communication.

Client device: The client device (such as a SIP phone or softphone) also needs to be configured to use the new port numbers for communication with the Avaya IP Office™ system.

NEW QUESTION # 95

After a failure of the original Primary Avaya IP Office™ server, a restore needs to be applied to a replacement Avaya IP Office™ server.

To generate a successful restore of the backup made of the original server, which two criteria should the replacement server have? (Choose two.)

- A. a temporary IP address that does not match the IP of the original server
- B. the same system name as the original server
- **C. the same IP address as the original server**

- D. the same software version installed on it as the original server

Answer: C,D

Explanation:

The same IP address as the original server: The replacement server needs to have the same IP address as the original server for the system to recognize and apply the backup correctly.

The same software version installed on it as the original server: The replacement server must have the same software version as the original server to ensure compatibility with the backup, as the restore process might fail if there is a version mismatch.

NEW QUESTION # 96

Which two statements correctly describe the mandatory requirements to set up a Small Community Network (SCN) consisting of four IP500v2 control units, which must adhere to specific guidelines for seamless integration? (Choose two.)

- A. The user and group names on each system must be unique for easy identification.
- B. The extension, user, and group numbering on each system must be unique to avoid conflicts.
- C. The total number of users within the Small Community Network must not exceed 500 for efficient management.
- D. The underlying network must be configured as a flat layer 2 subnet for optimal performance.
- E. Combo Cards are required in all systems to ensure compatibility.

Answer: A,B

NEW QUESTION # 97

.....
