2025 Test ISTQB-CTAL-TA Simulator Free & Unparalleled Certification (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Book Torrent

To do this you just need to pass the ISTQB ISTQB-CTAL-TA certification exam. Are you ready to accept this challenge? Looking for the proven and easiest way to crack the ISTQB ISTQB-CTAL-TA certification exam? If your answer is yes then you do not need to go anywhere. Just download ISTQB-CTAL-TA exam practice questions and start (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) (ISTQB-CTAL-TA) exam preparation without wasting further time. The ExamsReviews ISTQB ISTQB-CTAL-TA Dumps will provide you with everything that you need to learn, prepare and pass the

challenging ISTQB-CTAL-TA exam with flying colors. You must try ExamsReviews ISTQB ISTQB-CTAL-TA exam questions today.

ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which of the following statements about defect-based techniques is TRUE?

SELECT ONE OPTION

- A. Defect-based techniques are mainly used by developers at the component test level
- **B. In defect-based testing, the type of defect sought is used as the basis for test design**
- C. The coverage criteria for black-box test techniques tend to be less systematic than for defect-based test techniques
- D. Defect-based testing is a technique that identifies defects in requirements early in the lifecycle

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

* Defect-based techniques use the knowledge of defects that have occurred in the past to develop test cases that target similar types of issues.

* Option C correctly states that defect-based testing focuses on using known defect types as the basis for designing tests.

* Option A is incorrect because defect-based testing can be applied at various levels, not just the component level.

* Option B is incorrect since defect-based techniques do not necessarily guarantee more systematic coverage than black-box techniques.

* Option D is incorrect because defect-based testing focuses on detecting specific defect types rather than verifying requirements early.

Hence, the correct answer is C (In defect-based testing, the type of defect sought is used as the basis for test design).

NEW QUESTION # 22

A game component calculates a player's trophy level based on Points Earned and Level of Difficulty.

The total score is calculated as (Points Earned * Level of Difficulty). Trophy levels are as follows:

* Blue: # 40

* Silver: > 40

* Gold: > 70

* Diamond: > 80

* Platinum: > 90

Test cases:

* Player 1: Points earned 25, level of difficulty 2 # Total Score = 50 (Silver)

* Player 2: Points earned 20, level of difficulty 3 # Total Score = 60 (Silver)

* Player 3: Points earned 30, level of difficulty 1 # Total Score = 30 (Blue) What percentage of output partitions have been exercised by the following suite of test cases?

SELECT ONE OPTION

- A. 20%
- B. 40%
- C. 10%
- **D. 60%**

Answer: D

Explanation:

Comprehensive and Detailed in Depth Explanation:

Equivalence Partitioning divides input or output data into partitions that are treated similarly by the system.

* Output Partitions:

* Blue (# 40)

* Silver (> 40 and # 70)

* Gold (> 70 and # 80)

* Diamond (> 80 and # 90)

* Platinum (> 90)

Test Case Coverage:

- * Player 1: Silver (covered)
 - * Player 2: Silver (covered)
 - * Player 3: Blue (covered)
 - * The test cases cover 2 out of 5 partitions (Blue and Silver).
 - * Coverage Percentage: $2 \times 100 = 40 \times \frac{2}{5} \times 100 = 40\%$
- Therefore, the correct answer is A (40%).

NEW QUESTION # 23

You are testing a hospital patient management system that has undergone a release including an improved user interface and changes to meet new regulatory requirements. You are a Test Analyst working with a Technical Test Analyst.

Which of the following requirements MOST align with your responsibilities as a Test Analyst?

- * R01: New and amended patient data can be successfully read and processed by receiving hospital department systems
 - * R02: Patient data will be transmitted and received by hospital department systems within ten seconds of entry
 - * R03: Patient data transmitted to other hospital department systems will remain secure and cannot be accessed by unauthorized third parties
 - * R04: High volumes of data can be successfully received and processed while the user interface is being used
 - * R05: The new user interface is appropriate for the needs of all hospital administrator roles
- SELECT ONE OPTION

- A. R01, R05
- B. R01, R02
- C. R02, R03
- D. R03, R04

Answer: A

Explanation:

Comprehensive and Detailed in Depth Explanation:

As a Test Analyst, the focus is primarily on functional and usability aspects:

- * R01: Validates that the new or amended data can be correctly read and processed - this is a functional requirement.
- * R05: Evaluates whether the new user interface meets the needs of hospital administrators - this is related to usability.
- * The remaining requirements (R02, R03, R04) involve performance, security, and load testing, which are more suited for the Technical Test Analyst.

Therefore, the correct answer is D (R01, R05).

NEW QUESTION # 24

Which TWO of the following BEST explain why stakeholders should review and understand test conditions and test cases?

- a) To make sure that the requirements have been understood by the testers
 - b) To ensure that adequate coverage of the test basis has been achieved by the tests
 - c) To ensure that the project remains on schedule, as testing is a key activity
 - d) To assess the skills and talent of the test analysts
 - e) To enable the test manager to select the best test approaches in the project test plan
- SELECT ONE OPTION

- A. a and b
- B. c and d
- C. b and e
- D. c and e

Answer: A

Explanation:

Comprehensive and Detailed in Depth Explanation:

- * a) To make sure that the requirements have been understood by the testers: Stakeholder review helps validate that the test conditions and cases reflect the requirements correctly.
- * b) To ensure that adequate coverage of the test basis has been achieved by the tests: Stakeholders confirm that the tests cover all relevant aspects of the requirements and risk areas.
- * c) To ensure that the project remains on schedule, as testing is a key activity: While important, this is not a primary reason for stakeholders to review test conditions.
- * d) To assess the skills and talent of the test analysts: This is not the purpose of reviewing test conditions.
- * e) To enable the test manager to select the best test approaches in the project test plan: This is a test planning activity, not a reason

for stakeholder review.
Therefore, the correct answer is B (a and b).

NEW QUESTION # 25

In the recent past, you have learned that test automation just using capture & playback tooling, possibly enhanced with some test programming, has limitations. For the next banking project, that will be run using Agile methods, you want to implement a keyword-driven test automation approach. You have already started to define some high-level test cases for the account transfer user story:

TC 1 transfer € 150 from Lars to Ann, verify Ann's balance to be € 150

TC 2 transfer € 300 from Tim to Ann, verify Ann's balance to be € 450

In the context of implementing the keyword-driven test automation approach, which of the following activities should now be conducted by the Test Analyst?

- A. Select a tool to support keyword-driven testing
- B. Work together with a developer to define a test automaton architecture
- C. Define keywords to be implemented, eg, check balance.
B Design test navigation scripts.

Answer: C

Explanation:

The activity that should now be conducted by the Test Analyst in the context of implementing the keyword-driven test automation approach is to define keywords to be implemented, e.g., check balance. A keyword-driven test automation approach is an approach that uses keywords to represent actions or data in a test case.

The keywords are then interpreted by a test execution tool or framework that performs the corresponding actions or data manipulation. The Test Analyst is responsible for defining the keywords that are relevant and meaningful for the test cases, such as check balance, transfer money, verify message, etc. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 6.1.1, page 73.

NEW QUESTION # 26

.....

The remarkably distinguished results ISTQB-CTAL-TA are enough to provide a reason for ExamsReviews's huge clientele and obviously the best proof of its outstanding products. This is the reason that professionals find our ISTQB-CTAL-TA exam questions and answers products worthier than exam collection's or ExamsReviews's dumps. Above all, it is the assurance of passing the exam with ExamsReviews 100% money back guarantee that really distinguishes our Top ISTQB-CTAL-TA Dumps.
