Juniper JN0-105 Valid Test Cost Spend Your Little Time and Energy to Pass JN0-105 exam

The JN0-105 certification is the best proof of your ability. However, it's not easy for those work officers who has less free time to prepare such an JN0-105 exam, and people always feel fear of the unknown thing and cannot handle themselves with a sudden change. However, our JN0-105 Exam Questions can stand by your side. And we are determined to devote ourselves to serving you with the superior JN0-105 study materials. You can have a try on the free demo of our JN0-105 exam questions, you can understand in detail and make a choice.

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	• Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.
Topic 2	• Junos OS Fundamentals: It covers concepts, benefits, and functionality of the core elements of the Junos OS.

Topic 3	Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.
Topic 4	Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q54-Q59):

NEW QUESTION # 54

When considering routing tables and forwarding tables, which two statements are correct? (Choose two.)

- A. The forwarding table stores all routes and prefixes from all protocols.
- B. The routing table stores all routes and prefixes from all protocols.
- C. The forwarding table is used by the RE to select the best route.
- D. The routing table is used by the RE to select the best route.

Answer: B,D

Explanation:

The routing table and forwarding table play distinct roles in a Junos OS device. The correct answers are A and D: The routing table (A) is used by the Routing Engine (RE) to select the best route among all the learned routes, while the routing table (D) stores all routes and prefixes learned from all routing protocols. The forwarding table, in contrast, contains only the active routes chosen by the RE and is used by the Packet Forwarding Engine for actual packet forwarding.

NEW QUESTION # 55

Which two actions happen when multiple users issue the configure exclusive command to enter configuration mode on a Junos device? (Choose two.)

- A. The candidate configuration is locked.
- B. Other users cannot enter configuration mode.
- C. Other users can enter configuration mode.
- D. The candidate configuration is unlocked.

Answer: B

Explanation:

When a user enters configuration mode using the `configure exclusive` command on a Junos device, the candidate configuration is locked for that user, preventing other users from making concurrent configuration changes. This exclusive lock ensures that only one user can make changes at a time, preventing conflicts and potential errors from simultaneous modifications. Other users attempting to enter configuration mode while it is locked will receive a notification that the configuration is currently being edited by another user.

NEW QUESTION # 56

You received a new Junos device and are configuring the system-related settings. You must configure this device for the current date and time on the US West coast. You have set the time zone to `America/Los_Angeles`. however the time and date did not change. In this scenario, which two additional actions would satisfy this requirement? (Choose two.)

- A. Reboot the device.
- B. Configure a DNS server.
- C. Set the date and time setting manually.
- D. Configure an NTP server.

Answer: C,D

Explanation:

When configuring the system-related settings for the current date and time on a Junos device, especially for a specific time zone like `America/Los_Angeles`, and the time does not automatically adjust, two effective actions can be taken. Firstly, setting the date and time manually allows for immediate correction of the system clock. This can be done via the CLI with the appropriate `set date` and `set time` commands.

time command. Secondly, configuring the device to use an NTP server can provide ongoing synchronization with an accurate time source, ensuring that the device maintains the correct time and date automatically in the future, even in the case of restarts or minor drifts in the internal clock.

NEW QUESTION # 57

Which two addresses are included in an Ethernet frame header? (Choose two.)

- A. source IP address
- B. destination IP address
- C. destination MAC address
- D. source MAC address

Answer: C,D

Explanation:

An Ethernet frame header includes the source MAC address (B) and the destination MAC address (D). These addresses are used to deliver the frame from one Ethernet device to another directly connected Ethernet device on the same network segment. Ethernet frames do not include IP addresses, as those are part of the IP packet encapsulated within the Ethernet frame.

NEW QUESTION # 58

You received a new Junos device and are configuring the system-related settings. You must configure this device for the current date and time on the US West coast. You have set the time zone to America

/Los_Angeles, however the time and date did not change.

In this scenario, which two additional actions would satisfy this requirement? (Choose two.)

- A. Reboot the device.
- B. Configure a DNS server.
- C. Set the date and time setting manually.
- D. Configure an NTP server.

Answer: C,D

Explanation:

When configuring the system-related settings for the current date and time on a Junos device, especially for a specific time zone like America/Los_Angeles, and the time does not automatically adjust, two effective actions can be taken. Firstly, setting the date and time manually allows for immediate correction of the system clock. This can be done via the CLI with the appropriate set date and time command. Secondly, configuring the device to use an NTP server can provide ongoing synchronization with an accurate time source, ensuring that the device maintains the correct time and date automatically in the future, even in the case of restarts or minor drifts in the internal clock.

NEW QUESTION # 59

.....

The language in our JN0-105 test guide is easy to understand that will make any learner without any learning disabilities, whether you are a student or a in-service staff, whether you are a novice or an experienced staff who has abundant experience for many years. Our JN0-105 Exam Questions are applicable for everyone in all walks of life which is not depends on your educated level. Therefore, it should be a great wonderful idea to choose our JN0-105 guide torrent for sailing through the difficult test and pass it.
