

Newest New JN0-253 Exam Cram - Win Your Juniper Certificate with Top Score

BONUS!!! Download part of Prep4pass JN0-253 dumps for free: <https://drive.google.com/open?id=1oaAdDeNqzpXyC7IIIMswQWvQ5ns2LeQb>

There are three versions of Mist AI, Associate (JNCIA-MistAI) test torrent—PDF, software on pc, and app online, the most distinctive of which is that you can install JN0-253 test answers on your computer to simulate the real exam environment, without limiting the number of computers installed. Through a large number of simulation tests, you can rationally arrange your own JN0-253 exam time, adjust your mentality in the examination room, find your own weak points and carry out targeted exercises. But I am so sorry to say that JN0-253 Test Answers can only run on Windows operating systems and our engineers are stepping up to improve this. In fact, many people only spent 20-30 hours practicing our JN0-253 guide torrent and passed the exam. This sounds incredible, but we did, helping them save a lot of time.

There are many benefits after you pass the JN0-253 certification such as you can enter in the big company and double your wage. Our JN0-253 study materials boost high passing rate and hit rate so that you needn't worry that you can't pass the test too much. We provide free tryout before the purchase to let you decide whether it is valuable or not by yourself. To further understand the merits and features of our JN0-253 Practice Engine, you should try it first!

New JN0-253 Exam Cram - 100% Realistic Questions Pool

Our JN0-253 exam materials have plenty of advantages. For example, in order to meet the needs of different groups of people, we provide customers with three different versions of JN0-253 actual exam, which contain the same questions and answers. They are the versions of the PDF, Software and APP online. You can choose the one which is your best suit of our JN0-253 Study Materials according to your study habits.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q32-Q37):

NEW QUESTION # 32

By default, how long does an Installer role have access to a site for initial configuration before expiration?

- A. 48 hours
- B. 24 hours
- C. unlimited
- D. 7 days

Answer: D

NEW QUESTION # 33

Which users have rights to invite new administrators to a Mist organization?

- A. any user with an organization account
- B. network admin user only
- C. super user only
- D. users with the "Invite Admin" permission

Answer: C

NEW QUESTION # 34

Which statement about microservices is correct?

- A. Microservices are developed as a complete application set, and updates require the modification of the entire application.
- B. Microservices communicate with each other using Network Configuration Protocol (NETCONF).
- C. Microservices must share a common database to ensure data integrity.
- D. Microservices are designed to be independent to ensure that if one process fails, the remaining processes will continue to operate.

Answer: D

Explanation:

The Juniper Mist Cloud architecture is built on a microservices-based design, which enhances reliability, scalability, and operational efficiency. Each microservice performs a specific function—such as authentication, telemetry ingestion, analytics, or AI inference—independently of other components.

According to the Juniper Mist Cloud Architecture and Operations Guide:

"Mist Cloud leverages a microservices architecture where each service operates independently. This design ensures that a failure in one service does not impact the functionality or availability of others." This modular approach provides several key advantages:

* Fault isolation: One component can fail or restart without affecting the rest of the system.

* Independent scaling: Services can scale dynamically based on demand.

* Continuous updates: New features and patches can be deployed without downtime.

Options B, C, and D are incorrect because Mist microservices do not rely on NETCONF for internal communication, are not monolithic, and do not share a single common database—each maintains its own data model as required.

Therefore, the correct answer is A. Microservices are designed to be independent to ensure that if one process fails, the remaining processes will continue to operate.

NEW QUESTION # 35

Click the Exhibit button. The exhibit displays the connection flow for an API interaction sequence.

Which API type is displayed?

- A. RESTful
- B. SOAP
- C. Webhook
- D. WebSocket

Answer: C

Explanation:

The diagram displays the concept of a webhook interaction.

The client sends an initial request to the server (Step 1: Request/Response).

After that, the server asynchronously sends events or updates to the client (Steps 2 and 3: Event notifications), without requiring the client to poll for updates continuously.

This asynchronous "push" behavior is characteristic of webhooks, where the server pushes updates to the client.

NEW QUESTION # 36

Which two statements correctly describe the encryption of traffic using Mist? (Choose two.)

- A. By default, the communication between a Wi-Fi client and an AP is encrypted.
- B. By default, the communication between an AP and a RADIUS server is not encrypted.
- C. By default, the communication between a Wi-Fi client and an AP is not encrypted.
- D. By default, the communication between an AP and a RADIUS server is encrypted.

Answer: A,B

Explanation:

AP and RADIUS Server Communication: By default, the communication between an Access Point (AP) and a RADIUS server is not encrypted. This can be configured to be encrypted, but it is not the default setting.

Wi-Fi Client and AP Communication: By default, the communication between a Wi-Fi client and an AP is encrypted, typically using WPA2 or WPA3, which ensures the data exchanged over the wireless network is secure.

NEW QUESTION # 37

.....

Prep4pass assists people in better understanding, studying, and passing more difficult certification exams. We take pride in successfully servicing industry experts by always delivering safe and dependable JN0-253 exam preparation materials. For your convenience, Prep4pass has prepared authentic Mist AI, Associate (JNCIA-MistAI) (JN0-253) exam study material based on a real exam syllabus to help candidates go through their JN0-253 exams.
