Achieve Oracle 1Z1-591 Certification Without Difficulty with the Help of TroytecDumps Exam Questions

Top choice of 1Z1-591 Help You Gain Success in Oracle Business Intelligence Foundation Suite 11g Essentials. Use Valid Oracle New Free 1Z1-591 - Oracle Business Intelligence Foundation Suite 11g Essentials. Real 1Z1-591 exam questions updates from TroytecDumps. Oracle certification test preparation journey today. Best of Luck! 1Z1-591 certification is a valuable certification that will recognize your expertise and knowledge in the modern IT world. TroytecDumps's exam preparation can enable you to pass

the Oracle Business Intelligence Foundation Suite 11g Essentials exam easily. You can get help from 1Z1-591 Practice Test.

Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q11-Q16):

NEW QUESTION # 11

Select the correct statement.

- A. Cache needs to be purged to refresh data.
- B. Cache can degrade query performance by reading data from the disk instead of the database.
- C. Cache provides fast and always up-to-date information.
- D. Cache can increase traffic to back end database.
- E. Cache is seeded by manually running PL/SQL at the back end database.

Answer: A

Explanation:

Explanation/Reference:

In a standard OBIEE implementation, we generally want to purge and re-build the cache after every ETL (extract, transform, and load) run.

Incorrect answers:

A: A cache item might be out of date.

B: Cache reduces traffic to the back end database. At worst it does not change the amount traffic.

D: The cache disk should be at faster than the disk of the database.

E: OBIEE Caching and Cache Seeding

Cache is a component that improves performance by transparently storing data such that future requests for the same criteria can be served much faster. Like other application cache is not virtual memory in OBIEE. In OBIEE cache will be stored as files on the Hard Disk of the OBIEE Server in the form of files. By Default caching is enabled in the OBIEE server configuration.

For time-consuming Dashboard Pages, we can use the concept of cache seeding in OBIEE, this can be configured as a scheduled job that will ensure that the data is cached and readily available as and when the user runs the dashboard.

NEW QUESTION # 12

What are the two types of Repository Variables?

- A. Non System
- B. Static
- C. System
- D. Dynamic

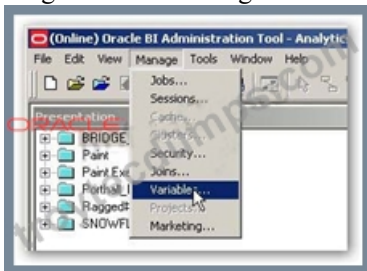

Answer: B,D

Explanation:

There are static and dynamic repository variables.

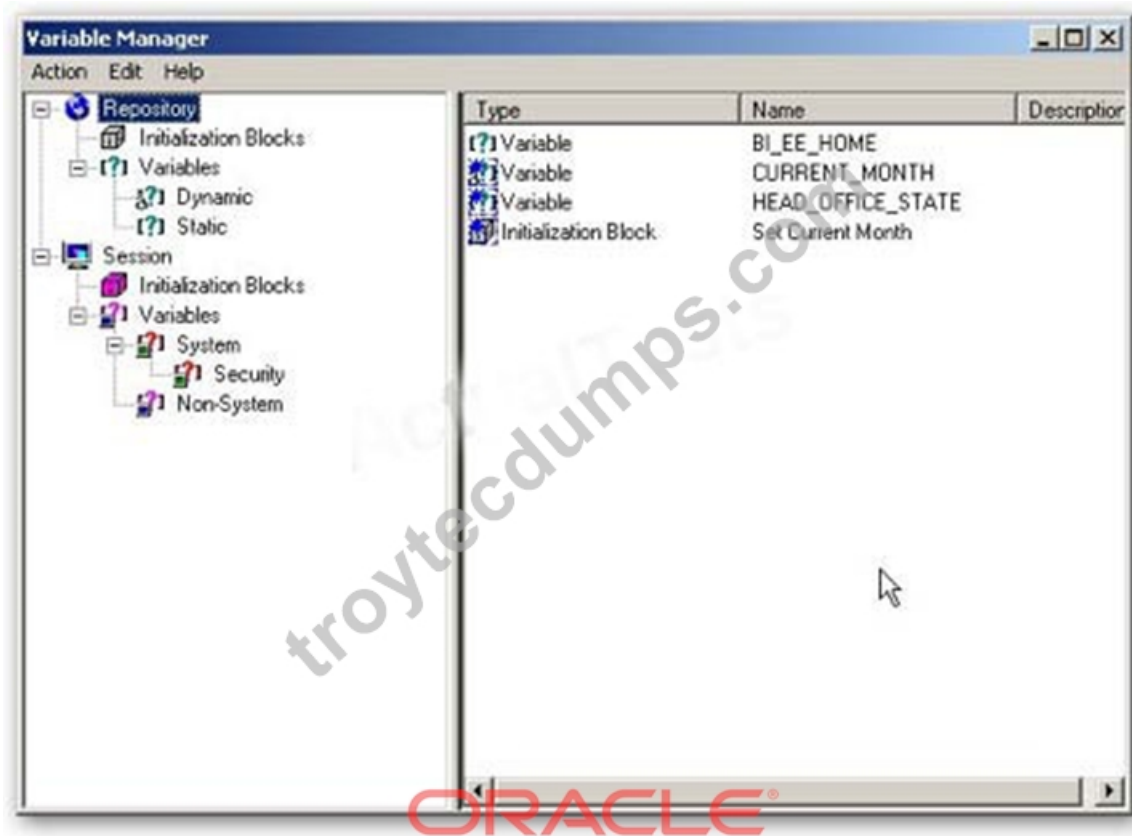

Note:

Variables in the Oracle BI Server can be either repository or session variables, and are defined using the Variable Manager within the Oracle BI Administrator (Manage > Variables).

Variable1

This brings up the Variable Manager, that divides variables out into repository and session variables, with a further subdivision into static and dynamic repository ones and system and non-system session ones. You can also define variables at the Presentation Server level, these are scoped to individual dashboards and are used amongst other things for setting dashboard prompt values and integrating the dashboard with BI Publisher parameters. Here's a screenshot of a typical Variable Manager screen.

Variable2

NEW QUESTION # 13

Which two steps are needed to set up Failover support for an OBIEE deployment?

- A. Employ WebLogic Enterprise Edition, licensed separately
- B. Apply OBIEE Clustering option
- C. Use Installer to affect Horizontal scale out of an existing instance
- D. Use Installer to set up separate single instances, then apply Horizontal scale out clustering
- E. Leverage spare hardware capacity of single machine by using Vertical scale out option

Answer: B,C

Explanation:

Horizontal Scaleout of System Components

- * Used for adding additional managed servers (Java components) and system components to an existing cluster
- * Used for scalability and failover
- * Set up via the Universal Installer > Scale Out BI System option

NEW QUESTION # 14

A customer frequently queries multiple dimension tables without a measure. What needs to be defined in the presentation layer?

- A. Logical Column Name
- B. Implicit Fact Column
- C. Logical Key
- D. Custom Display Name
- E. Alias

Answer: A

Explanation:

Explanation

You can define calculations in either of the following ways:- Before the aggregation, in the logical table source. For example: `sum(col_A *( col_B))`- After the aggregation, in a logical column derived from two other logical columns. For example: `sum(col A) * sum(col B)`

NEW QUESTION # 15

A customer would like to create a change and a % Change for Revenue at the same time. How would they accomplish this?

- A. Using the Expression Builder
- B. Defining them in the Presentation Layer
- C. Using the Calculation Wizard
- D. Defining them in the physical data model

Answer: C

Explanation:

Explanation

After creating your base metrics, try using the Calculation Wizard to automate the process of creating time-series metrics or comparison metrics such as: Change, Percent Change, Index, and Percent. The Wizard may save you many hours of time and frustration, especially if you have to create more than a handful of these metrics. In addition, the Wizard allows you to include customized logic to handle nulls in the base metrics.

You may refer to the Oracle documentation for further detail.

NEW QUESTION # 16

.....

If you choose our 1Z1-591 study torrent, you can make the most of your free time, without using up all your time preparing for your exam. We believe that using our 1Z1-591 exam prep will help customers make good use of their fragmentation time to study and improve their efficiency of learning. It will be easier for you to pass your exam and get your certification in a short time. If you decide to use our 1Z1-591 Test Torrent, we are assured that we recognize the importance of protecting your privacy and safeguarding the confidentiality of the information you provide to us. We hope you will use our 1Z1-591 exam prep with a happy mood, and you don't need to worry about your information will be leaked out.
