With our NGFW-Engineer learning materials, what you receive will never be only the content of the material, but also our full-time companionship and meticulous help. After you have successfully paid, we will send all the NGFW-Engineer information to your email within 10 minutes. During your installation, our NGFW-Engineer study guide is equipped with a dedicated staff to provide you with free remote online guidance.

Practicing with Palo Alto Networks NGFW-Engineer Exam questions will help you to become an expert in and acquire the Palo Alto Networks NGFW-Engineer. Palo Alto Networks NGFW-Engineer Exam Questions allow you to verify your skills as a professional. You have to pass the Palo Alto Networks NGFW-Engineer to achieve the associate-level certification.

>> NGFW-Engineer Exam Preparation <<

Excellent Palo Alto Networks NGFW-Engineer Practice Material's 3 formats

The service of NGFW-Engineer test guide is very prominent. It always considers the needs of customers in the development process. There are three versions of our NGFW-Engineer learning question, PDF, PC and APP. Each version has its own advantages. You can choose according to your needs. Of course, you can use the trial version of NGFW-Engineer Exam Training in advance. After you use it, you will have a more profound experience. You can choose your favorite our study materials version according to your feelings. When you use NGFW-Engineer test guide, you can also get our services at any time.

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which statement applies to the relationship between Panorama-pushed Security policy and local firewall Security policy?

- A. The order of policy evaluation can be configured differently in different device groups.
- **B. Local firewall rules are evaluated after Panorama pre-rules and before Panorama post-rules.**
- C. Panorama post-rules can be configured to be evaluated before local firewall policy for the purpose of troubleshooting.
- D. When a policy match is found in a local firewall policy, if any Panorama shared post-rule is configured, it will still be evaluated.

Answer: B

Explanation:

Local firewall rules are evaluated after Panorama pre-rules (those applied before the firewall's local policies) and before Panorama post-rules (those applied after the firewall's local policies). This ensures that the local firewall rules do not override the central Panorama policy and are only applied in the appropriate order within the policy evaluation sequence.

NEW QUESTION # 43

In an active/active high availability (HA) configuration with two PA-Series firewalls, how do the firewalls use the HA3 interface?

- **A. To perform session cache synchronization among all HA peers having the same cluster ID**
- B. To exchange hellos, heartbeats, HA state information, and management plane synchronization for routing and User-ID information
- C. To synchronize sessions, forwarding tables, IPSec security associations, and ARP tables between firewalls in an HA pair
- D. To forward packets to the HA peer during session setup and asymmetric traffic flow

Answer: A

Explanation:

In an active/active HA configuration with two PA-Series firewalls, the HA3 interface is used primarily for the exchange of HA state information between the firewalls. This includes:

Hellos and heartbeats to monitor the status of the HA peer.

Synchronization of management plane data, which includes critical routing and User-ID information.

NEW QUESTION # 44

How does a Palo Alto Networks firewall choose the best route when it receives routes for the same destination from different routing protocols?

- **A. It compares the administrative distance and chooses the one with the lowest value.**
- B. The route that was received first will be entered into the forwarding table, and all subsequent routes will be rejected.
- C. It compares the administrative distance and chooses the one with the highest value.
- D. It will attempt to load balance the traffic across all routes.

Answer: A

Explanation:

When a Palo Alto Networks firewall receives routes for the same destination from different routing protocols, it uses the administrative distance (AD) to determine the best route. The administrative distance is a measure of the trustworthiness of a route, with a lower value indicating higher preference. The firewall will choose the route with the lowest administrative distance to populate its forwarding table.

NEW QUESTION # 45

Which statement describes the role of Terraform in deploying Palo Alto Networks NGFWs?

- A. It manages threat intelligence data synchronization with NGFWs.
- B. It acts as a logging service for NGFW performance metrics.
- **C. It provides Infrastructure-as-Code (IaC) to automate NGFW deployment.**
- D. It orchestrates real-time traffic inspection for network segments.

Answer: C

Explanation:

Terraform is an Infrastructure-as-Code (IaC) tool that automates the provisioning and management of infrastructure resources, including Palo Alto Networks Next-Generation Firewalls (NGFWs). By using Terraform configuration files, administrators can define and deploy NGFW instances across cloud environments (such as AWS, Azure, and GCP) efficiently and consistently.

Terraform enables:

Automated firewall deployment in cloud environments.

Configuration of security policies and networking settings in a declarative manner.

Scalability and repeatability, reducing manual intervention in firewall provisioning.

NEW QUESTION # 46

An organization has configured GlobalProtect in a hybrid authentication model using both certificate-based authentication for the pre-logon stage and SAML-based multi-factor authentication (MFA) for user logon.

How does the GlobalProtect agent process the authentication flow on Windows endpoints?

- A. The GlobalProtect agent uses the machine certificate to establish a pre-logon tunnel; upon user sign-in, it prompts for SAML-based MFA credentials, ensuring both device and user identities are validated before granting full access.
- B. GlobalProtect requires the user to log in first for SAML-based MFA before establishing the pre-logon tunnel, rendering the pre-logon certificate authentication (CA) flow redundant.
- C. The GlobalProtect agent uses the machine certificate during pre-logon for initial tunnel establishment, and then seamlessly reuses the same machine certificate for user-based authentication without requiring MFA.
- D. Once the machine certificate is validated at pre-logon, the Windows endpoint completes MFA on behalf of the user by passing existing Windows Credential Provider details to the GlobalProtect gateway without prompting the user.

Answer: A

Explanation:

In a hybrid authentication model with both certificate-based authentication for pre-logon and SAML-based multi-factor authentication (MFA) for user logon, the GlobalProtect agent processes the flow as follows:

During the pre-logon stage, the agent uses the machine certificate to authenticate and establish the initial VPN tunnel.

Once the user logs in (after the machine is connected), the agent then triggers SAML-based MFA to ensure the user is authenticated with multi-factor authentication, validating both the device and the user identity before granting full access.

This method ensures that both the device and user are properly authenticated and validated in the hybrid authentication model.

NEW QUESTION # 47

.....

We have a large number of regular customers exceedingly trust our NGFW-Engineer training materials for their precise content about the exam. You may previously have thought preparing for the NGFW-Engineer preparation materials will be full of agony, actually, you can abandon the time-consuming thought from now on. Our NGFW-Engineer Exam Questions are famous for its high efficiency and high pass rate as 98% to 100%. Buy our NGFW-Engineer study guide, and you will pass the exam easily.

NGFW-Engineer Updated CBT: <https://www.actualtests4sure.com/NGFW-Engineer-test-questions.html>

Palo Alto Networks NGFW-Engineer Exam Preparation Anyone who studies in this field knows that a certificate is significant for their job, Palo Alto Networks NGFW-Engineer Exam Preparation Besides, our company also provides considerate aftersales services with accessible staff for your consult 24/7, We hope our NGFW-Engineer valid test collection can help more ambitious people to pass NGFW-Engineer actual test, The matter is that you have no time to prepare the NGFW-Engineer test dump and you will suffer great loss if you failed.

Check for vaginal bleeding, Office XP lets you work with NGFW-Engineer files over a network or on the Web in much the same way that you access files and folders on a standalone PC.

Anyone who studies in this field knows that a certificate is significant NGFW-Engineer Test Guide for their job, Besides, our company also provides considerate aftersales services with accessible staff for your consult 24/7.

Fantastic NGFW-Engineer Exam Preparation & Leading Offer in Qualification Exams & Complete NGFW-Engineer Updated CBT

We hope our NGFW-Engineer valid test collection can help more ambitious people to pass NGFW-Engineer actual test, The matter is that you have no time to prepare the NGFW-Engineer test dump and you will suffer great loss if you failed.

In the whole time we have a lot of success stories about Palo Alto Networks Next-Generation Firewall Engineer NGFW-Engineer Certifications exam.
