

NIOS-DDI-Expert Exam Engine, Latest Real NIOS-DDI-Expert Exam

In informative level, we should be more efficient. In order to take the initiative, we need to have a strong ability to support the job search. And how to get the test NIOS-DDI-Expert certification in a short time, which determines enough NIOS-DDI-Expert qualification certificates to test our learning ability and application level. Our NIOS-DDI-Expert Exam Questions are specially designed to meet this demand for our worthy customers. As long as you study with our NIOS-DDI-Expert learning guide, you will pass the exam and get the certification for sure.

For the Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) web-based practice exam no special software installation is required. Because it is a browser-based Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) practice test. The web-based Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) practice exam works on all operating systems like Mac, Linux, iOS, Android, and Windows.

Tips to Crack the NIOS-DDI-Expert Exam

Though there always exists fierce competition among companies in the same field. Our NIOS-DDI-Expert study materials are always the top sellers in the market and our website is regarded as the leader in this career. Because we never stop improve our NIOS-DDI-Expert practice guide, and the most important reason is that we want to be responsible for our customers. So we create the most effective and accurate NIOS-DDI-Expert Exam Braindumps for our customers and always consider carefully for our worthy customer.

Infoblox Qualified NIOS DDI Expert - INE Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which system provides database synchronization to the passive node of an HA pair Grid Member?

- **A. The Active Node of the HA pair**
- B. The Grid Master
- C. The Grid Master Candidate
- D. The DNS Primary

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation: In an Infoblox High Availability (HA) pair, the active node maintains the live database and services (DNS, DHCP, etc.), while the passive node remains on standby, ready to take over if needed. Database synchronization between the active and passive nodes is handled directly by the active node using the `thebloxSync` mechanism over a secure connection (typically SSL). The Grid Master oversees Grid-wide synchronization, but within an HA pair, the active node is responsible for keeping the passive node's database up-to-date. The Grid Master Candidate (GMC) and DNS Primary are unrelated to this specific HA pair sync process. This is a key troubleshooting point in the INE course. References: Infoblox NIOS Documentation - HA Configuration; INE Course Content: NIOS DDI Grid Troubleshooting.

NEW QUESTION # 14

The DHCP server has assigned an address, but the client did not renew before the lease timer ended. What status will be listed for this address?

- **A. Expired**
- B. Released
- C. Active
- D. Abandoned

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation: DHCP lease states in NIOS:

* Scenario: Client gets IP (e.g., 192.168.1.10, 1-hour lease), doesn't renew, and timer expires.

* C (Expired): Lease times out, marked "Expired" in NIOS (Data Management > DHCP > Leases), available for reassignment. Correct.

* A: Active is for current, unexpired leases. Incorrect.

* B: Released requires client action (DHCPRELEASE). Incorrect.

* D: Abandoned is for declined or conflicting leases, not timeouts. Incorrect.

* Practical Example: In an INE lab, set a 5-minute lease, wait for expiry, check "Expired" status, and troubleshoot lease reuse. References: Infoblox NIOS Administrator Guide - DHCP Leases; INE Course Content: NIOS DDI DHCP Troubleshooting.

NEW QUESTION # 15

In the DHCPv4 failover NORMAL state, leases are only stored on the primary peer.

- A. True
- **B. False**

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: In NORMAL state:

* Lease Storage: Both primary and secondary peers store leases via sync (TCP 647). Each manages its pool share (e.g., 50/50), but all leases are replicated for redundancy.

* Why False: "Only primary" contradicts failover's design—both peers maintain a full lease database for failover readiness.

* Practical Example: In an INE lab, check leases on both peers (Data Management > DHCP > Leases), simulate primary failure, and troubleshoot secondary takeover. References: Infoblox NIOS Administrator Guide - DHCP Failover; INE Course Content: NIOS DDI DHCP Troubleshooting.

NEW QUESTION # 16

Which action can an administrator safely perform during an upgrade?

- A. None of the above
- B. Update DNS views
- C. Modify Member DHCP properties
- **D. Setting time zone for a Grid Member**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation: During a NIOS software upgrade (Grid > Upgrade), the Grid enters a sensitive state where certain actions risk instability. Let's evaluate:

* Upgrade Phases: Upload, Distribute, Test, Upgrade. Members reboot and sync, requiring database consistency.

* Options:

* A: Updating DNS views modifies the database, which could conflict with the upgrade's database sync or cause service interruptions. Unsafe.

* B: Changing DHCP properties (e.g., ranges) alters live configurations, risking lease sync issues during member reboots. Unsafe.

* C: Setting the time zone (Grid > Members > Edit > Basic) is a non-service-affecting change, stored locally and applied post-reboot. Safe during upgrades, as it doesn't impact DNS/DHCP /Grid data. Correct.

* D: Incorrect, as C is a viable safe action.

* Practical Example: In an INE lab, you'd adjust a member's time zone during an upgrade to align logs, troubleshooting without disrupting the process. References: Infoblox NIOS Administrator Guide - Upgrade Best Practices; INE Course Content: NIOS DDI Grid Deployment.

NEW QUESTION # 17

You accidentally deleted several DNS entries from the Grid. How can you recover from this mistake with the least service disruption?

- A. Promote a GMC to be the new GM
- B. Force HA failover on the GM, if it is an HA pair
- **C. Restore the records from the recycle bin**
- D. Restore the database from the last backup

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation: Accidentally deleting DNS entries (e.g., A records) in NIOS requires a recovery method that minimizes downtime and complexity. Here's the analysis:

* Recycle Bin Feature: NIOS includes a Recycle Bin (Data Management > DNS > Recycle Bin) that temporarily stores deleted objects (e.g., zones, records) unless permanently purged or the bin is disabled. Restoring from here is instantaneous and doesn't interrupt services.

* Options:

* A: Restoring from a backup (Grid > Grid Manager > Backup > Restore) replaces the entire database, requiring service restarts and potentially losing post-backup changes. High disruption.

Incorrect.

* B: Promoting a Grid Master Candidate (GMC) to Grid Master (GM) shifts control but doesn't recover deleted records—it's for GM failure, not data loss. Irrelevant. Incorrect.

* C: Forcing HA failover on the GM switches active/passive nodes but doesn't restore data, as both share the same database. No effect. Incorrect.

* D: Restoring from the Recycle Bin (select records > Restore) reverts the deletion with no service impact, assuming the bin is enabled (default in NIOS). Correct.

* Practical Example: In an INE lab, you'd delete an A record, navigate to the Recycle Bin, restore it, and verify DNS resolution—all without downtime, testing troubleshooting skills.

* Caveat: If the Recycle Bin is disabled or entries are purged, backup restoration (A) becomes necessary, but the question implies least disruption, favoring D. References: Infoblox NIOS Administrator Guide - Recycle Bin; INE Course Content: NIOS DDI DNS Troubleshooting.

NEW QUESTION # 18

.....

Entering a strange environment, we will inevitably be very nervous. And our emotions will affect our performance. That is why some of the candidates fail in their real exam. But if you buy our NIOS-DDI-Expert exam questions, then you won't worry about this problem. Our NIOS-DDI-Expert study guide has arranged a mock exam to ensure that the user can take the exam in the best possible state. We simulated the most realistic examination room environment so that users can really familiarize themselves with the examination room. And our NIOS-DDI-Expert Practice Engine can give you 100% pass guarantee.

Latest Real NIOS-DDI-Expert Exam: <https://www.it-tests.com/NIOS-DDI-Expert.html>

They are relevant to the exam standards and are made on the format of the actual NIOS-DDI-Expert exam. Since all of cciedump.It-Tests Latest Real NIOS-DDI-Expert Exam.net Infoblox Latest Real NIOS-DDI-Expert Exam products are of Latest version we feel confident about the quality of products, Infoblox NIOS-DDI-Expert Exam Engine. We sincerely hope that you can enjoy the good service of our products. Please rest assured to buy our Exam Collection Latest Real NIOS-DDI-Expert Exam - Infoblox Qualified NIOS DDI Expert - INE PDF, the founding principles of our company have never changed-business integrity, first class service and a commitment to people.

It is important to know when a variable is a pointer, because pointers can easily wreak havoc in a program, Rogers, Karen L, They are relevant to the exam standards and are made on the format of the actual NIOS-DDI-Expert Exam.

Unbeatable NIOS-DDI-Expert Practice Prep Offers You the Most Precise Exam Braindumps - It-Tests

Since all of cciedump.It-Tests.net Infoblox products are of Latest NIOS-DDI-Expert Exam Engine version we feel confident about the quality of products, We sincerely hope that you can enjoy the good service of our products.

Please rest assured to buy our Exam Collection Infoblox Qualified NIOS DDI Expert - INE PDF, NIOS-DDI-Expert the founding principles of our company have never changed-business integrity, first class service and a commitment to people.
