

NIOS-DDI-Expert Latest Study Materials & Verified NIOS-DDI-Expert Answers

Our ITPassLeader is a professional website to provide accurate exam material for a variety of IT certification exams. And ITPassLeader can help many IT professionals enhance their career goals. The strength of our the IT elite team will make you feel incredible. You can try to free download part of the exam questions and answers about Infoblox Certification NIOS-DDI-Expert Exam to measure the reliability of our ITPassLeader.

Sometimes if you want to pass an important test, to try your best to exercise more questions is very necessary, which will be met by our NIOS-DDI-Expert exam software, and the professional answer analysis also can help you have a better understanding, the multiple versions of free demo of NIOS-DDI-Expert Exam Materials can be offered in our website. Try to find which version is most to your taste; we believe that our joint efforts can make you pass NIOS-DDI-Expert certification exam.

Avail Newest NIOS-DDI-Expert Latest Study Materials to Pass NIOS-DDI-Expert on the First Attempt

You can practice all the difficulties and hurdles which could be faced in an actual Infoblox exam. It also assists you in boosting confidence and reducing problem-solving time. The Pass4future designs NIOS-DDI-Expert desktop-based practice software for desktops, so you can install it from a website and then use it without an internet connection. You only need an internet connection to verify the license of the products. No other plugins are required to employ it.

Infoblox Qualified NIOS DDI Expert - INE Sample Questions (Q11-Q16):

NEW QUESTION # 11

What is the destination IP address of a DHCPDISCOVER packet from a client?

- A. 255.255.255.255
- B. Broadcast address of client subnet
- C. 0.0.0.0
- D. 224.0.0.52

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:DHCPDISCOVER is the initial broadcast a client sends to find a DHCP server:

* Packet Details:

- * Source IP:0.0.0.0 (client has no IP yet).
- * Destination IP:255.255.255.255 (limited broadcast, all devices on the local network).
- * Sent via UDP (port 67 server, 68 client).
- * Why 255.255.255.255:The client doesn't know the server's IP and broadcasts to all local devices.

Relays may forward it, but the initial packet targets the universal broadcast address.

- * Options:
- * A:0.0.0.0 is the source, not destination. Incorrect.
- * B:224.0.0.52 is a multicast address, not used in DHCPDISCOVER. Incorrect.
- * C:Matches DHCP broadcast standard (RFC 2131). Correct.
- * D:Subnet-specific broadcast (e.g., 192.168.1.255) applies post-relay, not the initial packet.

Incorrect.

- * Practical Example:In an INE lab, you'd capture a DHCPDISCOVER with Wireshark, confirm 255.255.255.255, and troubleshoot relay issues.References:RFC 2131 - DHCP; Infoblox NIOS Administrator Guide - DHCP Basics; INE Course Content: NIOS DDI DHCP Troubleshooting.

NEW QUESTION # 12

You are asked to provide a support bundle while on the phone with Infoblox Technical Support. What can you do to get one?

- A. Create a database backup and extract the support bundle from it
- B. Infoblox Technical Support must generate it
- C. Use the CLI command "set support_bundle" to get it
- D. Retrieve it from the GM interface by navigating to Grid Manager and downloading from the toolbar

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:Generating a support bundle for diagnostics:

- * B:CLI command set support bundle (space, not underscore) generates and downloads a bundle (.tar.gz) with logs, configs, etc. Correct with typo adjustment.
- * A:Backup is separate (Grid > Backup)-no bundle extraction. Incorrect.
- * C:GUI offers download (Grid > Grid Manager > Toolbar > Download Support Bundle), but question specifies action-CLI fits phone context. Partially correct but not best.
- * D:Support assists but doesn't generate-user action required. Incorrect.

* Practical Example:In an INE lab, run set support bundle, transfer it via SCP, and troubleshoot with support.References:Infoblox NIOS CLI Reference Guide - Support Bundle; INE Course Content: NIOS DDI Grid Troubleshooting.

NEW QUESTION # 13

Which action can an administrator safely perform during an upgrade?

- A. Modify Member DHCP properties
- B. Setting time zone for a Grid Member
- C. Update DNS views
- D. None of the above

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation:During a NIOS software upgrade (Grid > Upgrade), the Grid enters a sensitive state where certain actions risk instability. Let's evaluate:

- * Upgrade Phases:Upload, Distribute, Test, Upgrade. Members reboot and sync, requiring database consistency.

- * Options:

- * A:Updating DNS views modifies the database, which could conflict with the upgrade's database sync or cause service interruptions. Unsafe.

- * B:Changing DHCP properties (e.g., ranges) alters live configurations, risking lease sync issues during member reboots. Unsafe.

- * C:Setting the time zone (Grid > Members > Edit > Basic) is a non-service-affecting change, stored locally and applied post-reboot. Safe during upgrades, as it doesn't impact DNS/DHCP /Grid data. Correct.

- * D:Incorrect, as C is a viable safe action.

* Practical Example: In an INE lab, you'd adjust a member's time zone during an upgrade to align logs, troubleshooting without disrupting the process. References: Infoblox NIOS Administrator Guide - Upgrade Best Practices; INE Course Content: NIOS DDI Grid Deployment.

NEW QUESTION # 14

The Infoblox WAPI/RESTful API requires the administrator to use the Perl programming language.

- A. True
- B. False

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: The Infoblox Web API (WAPI) is a RESTful API that allows administrators to interact with the NIOS system programmatically for tasks like managing DNS records, DHCP leases, and Grid configurations. Contrary to requiring Perl, WAPI is language-agnostic—it uses HTTP-based requests (GET, POST, PUT, DELETE) and returns data in JSON format. While Infoblox provides sample scripts in Perl (and historically supported a Perl API), administrators can use any programming language (e.g., Python, Java, or even tools like cURL) that supports HTTP requests. The misconception might stem from older documentation emphasizing Perl examples, but the INE course, focusing on advanced NIOS management, clarifies that WAPI is not tied to Perl. References: Infoblox NIOS Documentation - WAPI Guide; INE Course Objective: NIOS Grid Troubleshooting (covers API usage).

NEW QUESTION # 15

The standard or recommended architecture for NIOS DNS views is "one member, one view".

- A. True
- B. False

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: DNS Views in NIOS allow multiple DNS perspectives (e.g., internal vs. external):

* Architecture: NIOS supports multiple views per member—common for consolidating services (e.g., one appliance handles "Internal" and "External" views). "One member, one view" isn't a standard or recommended limit.

* Why False: Best practice is flexible—views depend on use case, not a strict 1:1 ratio. Multiple views per member is typical and efficient.

* Practical Example: In an INE lab, configure two views on one member, test split DNS, and troubleshoot view conflicts. References: Infoblox NIOS Administrator Guide - DNS Views; INE Course Content: NIOS DDI DNS Troubleshooting.

NEW QUESTION # 16

.....

These Infoblox NIOS-DDI-Expert exam questions give you an idea about the final Infoblox NIOS-DDI-Expert exam questions formats, exam question structures, and best possible answers, and you will also enhance your exam time management skills. Finally, at the end of NIOS-DDI-Expert Exam Practice test you will be ready to pass the final NIOS-DDI-Expert exam easily. Best of luck in Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) exam and professional career!!!
