2025 Trustable NIS-2-Directive-Lead-Implementer – 100% Free Valid Test Pass4sure | Valid Braindumps PECB Certified NIS 2 Directive Lead Implementer Sheet

NIS-2-Directive-Lead-Implementer materials trends are not always easy to forecast, but they have predictable pattern for them by ten-year experience who often accurately predict points of knowledge occurring in next NIS-2-Directive-Lead-Implementer preparation materials. Our professional experts can give you the latest and the most accurate NIS-2-Directive-Lead-Implementer Training Material for that they have been in this field for so many years and know every aspect of the change of NIS-2-Directive-Lead-Implementer practice questions. You can trust in our NIS-2-Directive-Lead-Implementer learning braindump for sure.

PECB NIS-2-Directive-Lead-Implementer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Cybersecurity controls, incident management, and crisis management: This domain focuses on Security Operations Managers and Incident Response Coordinators and involves implementing cybersecurity controls, managing incident response activities, and handling crisis situations. It ensures organizations are prepared to prevent, detect, respond to, and recover from cybersecurity incidents effectively.
Topic 2	<ul style="list-style-type: none">Planning of NIS 2 Directive requirements implementation: This domain targets Project Managers and Implementation Specialists focusing on how to initiate and plan the rollout of NIS 2 Directive requirements. It includes using best practices and methodologies to align organizational processes and cybersecurity programs with the directive's mandates.
Topic 3	<ul style="list-style-type: none">Testing and monitoring of a cybersecurity program: This domain assesses the abilities of Security Auditors and Compliance Officers in testing and monitoring the effectiveness of cybersecurity programs. Candidates learn to design and conduct audits, continuous monitoring, performance measurement, and apply continual improvement practices to maintain NIS 2 Directive compliance.
Topic 4	<ul style="list-style-type: none">Fundamental concepts and definitions of NIS 2 Directive: This section of the exam measures the skills of Cybersecurity Professionals and IT Managers and covers the basic concepts and definitions related to the NIS 2 Directive. Candidates gain understanding of the directive's scope, objectives, key terms, and foundational requirements essential to lead implementation efforts effectively within organizations.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q52-Q57):

NEW QUESTION # 52

Scenario 7: CleanHydro is a forward-thinking company operating in the wastewater industry. Based in Stockholm, Sweden, the company is dedicated to revolutionizing wastewater treatment processes using advanced automated technology aiming to reduce environmental impact.

Recognizing the paramount importance of robust cybersecurity measures to protect its advanced technologies, CleanHydro is committed to ensuring compliance with the NIS 2 Directive. In line with this commitment, the company has initiated a comprehensive employee training program. To do so, the company adheres to Sweden's national cybersecurity strategy, which includes objectives, governance frameworks to guide strategy implementation and define roles and responsibilities at the national level, risk assessment mechanism, incident preparedness measures, a list of involved authorities and stakeholders, and coordination policies.

In addition, CleanHydro engaged GuardSecurity, an external cybersecurity consultancy firm, to evaluate and potentially improve the cybersecurity infrastructure of the company to ensure compliance with the NIS 2 Directive. GuardSecurity focused on strengthening the risk management process of the company.

The company started determining competence development needs by considering competence levels, comparing them with required competence levels, and then prioritizing actions to address competence gaps found based on risk-based thinking. Based on this determination, the company planned the competence development activities and defined the competence development program type and structure. To provide the training and awareness programs, the company contracted CyberSafe, a reputable training provider, to provide the necessary resources, such as relevant documentation or tools for effective training delivery. The company's top management convened a meeting to establish a comprehensive cybersecurity awareness training policy. It was decided that cybersecurity awareness training sessions would be conducted twice during the onboarding process for new employee to instill a culture of cybersecurity from the outset and following a cybersecurity incident.

In line with the NIS 2 compliance requirements, CleanHydro acknowledges the importance of engaging in communication with communities consisting of other essential and important entities. These communities are formed based on industry sectors, critical infrastructure sectors, or other relevant classifications. The company recognizes that this communication is vital for sharing and receiving crucial cybersecurity information that contributes to the overall security of wastewater management operations.

When developing its cybersecurity communication strategy and setting objectives, CleanHydro engaged with interested parties, including employees, suppliers, and service providers, to understand their concerns and gain insights. Additionally, the company identified potential stakeholders who has expressed interest in its activities, products, and services. These activities aimed to contribute to the achievement of the overall objectives of its cybersecurity communication strategy, ensuring that it effectively addressed the needs of all relevant parties.

Based on scenario 7, the training provider was responsible for providing the necessary resources for training, such as relevant documentation or tools. Is this alignment with best practices?

- A. No, it is the responsibility of the GuardSecurity to provide the necessary resources, such as relevant documentation or tools
- **B. Yes, it is the responsibility of the training provider to provide the necessary resources, such as relevant documentation or tools**
- C. No, it is the responsibility of the CleanHydro to provide the necessary resources, such as relevant documentation or tools

Answer: B

NEW QUESTION # 53

Which of the following disaster recovery phases places significant emphasis on training employees to effectively respond and recover from a disaster?

- A. Mitigation
- **B. Preparedness**
- C. Response

Answer: B

NEW QUESTION # 54

Which of the following teams continuously manages existing threats by establishing rules, identifying exceptions, and detecting emerging risks?

- A. Crisis management team
- B. Incident response team
- **C. Security operations center team**

Answer: C

NEW QUESTION # 55

Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

Based on scenario 2, in order to avoid creating additional processes that do not fit with the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. Is this in accordance with best practices?

- A. No, organizations should create other processes in addition to the existing processes to ensure full compliance with the NIS 2 Directive
- **B. Yes, organizations should incorporate the NIS 2 Directive into their existing processes**
- C. No, organizations should disregard existing processes completely and create new ones to ensure full compliance with the NIS 2 Directive

Answer: B

NEW QUESTION # 56

During which phase of the key management life cycle can keys be manually adjusted to implement alternative algorithms?

- **A. Key rotation**
- B. Key generation
- C. Key backup or recovery

Answer: A

NEW QUESTION # 57

.....

According to the needs of all people, the experts and professors in our company designed three different versions of the NIS-2-Directive-Lead-Implementer certification training materials for all customers. The three versions are very flexible for all customers to operate. You can choose the version for yourself which is most suitable, and all the NIS-2-Directive-Lead-Implementer Training Materials of our company can be found in the three versions. It is very flexible for you to use the three versions of the NIS-2-Directive-Lead-Implementer latest questions to preparing for your NIS-2-Directive-Lead-Implementer exam.
