These 4A0-113 certification exam's benefits assist the 4A0-113 exam dumps to achieve their career objectives. To do this you just need to pass the Nokia OSPF Routing Protocol Exam (4A0-113) exam which is quite challenging and demands complete 4A0-113 exam questions preparation. For the quick and complete Nokia 4A0-113 PDF Questions preparation you can get help from Prep4King. The Prep4King is a leading platform that offers valid, updated, and real 4A0-113 Questions that are particularly designed for quick and complete 4A0-113 exam preparation.

To prepare for the Nokia 4A0-113 exam, candidates should have a strong foundation in IP network technologies and routing protocols, as well as experience working with Nokia IP network devices. A passing score on the exam demonstrates proficiency in OSPF routing protocol configuration, management, and optimization on Nokia IP networks, which can be beneficial for a range of IT roles. The Nokia 4A0-113 Exam is part of Nokia's certification program, which provides recognition for IT professionals who demonstrate mastery in Nokia IP network technologies.

2025 Nokia The Best 4A0-113 Dumps Download

The Prep4King team is updating the Nokia 4A0-113 study material according to the changes in the syllabus on daily basis. The users will receive 4A0-113 updates for 365 days so they can prepare according to the updated content. The 24/7 support system has been made for customers to solve their problems and serve them in the best possible ways in order to pass the Nokia OSPF Routing Protocol Exam (4A0-113) certification exam on the first try!

Nokia OSPF Routing Protocol Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which of the following statements best describes the function of an OSPF Type 4 LSA?

- A. A Type 4 LSA is originated by an ABR that is connected to a stub area. The LSA is injected into the backbone area to provide routing information.
- B. A Type 4 LSA is originated by an ASBR to describe a route to itself to routers outside the area.
- **C. A Type 4 LSA is originated by an ABR to describe a route to an ASBR to routers outside the area.**
- D. A Type 4 LSA is originated by an ABR that is connected to a stub area. The LSA is injected into the stub area to provide routing information.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF ASBR Summary LSA):

Type 4 LSAs (ASBR Summary LSAs) are originated by ABRs.

They inform routers in other areas about how to reach the ASBR (not about external prefixes, but about the ASBR's router ID).

Thus, correct answer: A.

-

NEW QUESTION # 46

What is the protocol number for OSPF in the IP header?

- A. OSPF uses UDP, so the protocol number is 17.
- **B. OSPF has its own protocol number of 89.**
- C. OSPF does not use IP.
- D. OSPF uses TCP, so the protocol number is 6.

Answer: B

NEW QUESTION # 47

Which of the following is NOT a characteristic of RIPv1?

- **A. Classless routing**
- B. Broadcast advertisement
- C. Poison Reverse
- D. 30 second network updates

Answer: A

NEW QUESTION # 48

Click the exhibit button.

*A:R1# show router ospf neighbor

Interface-Name	Rtr Id	State	Pri	RetxQ	TTL
toR2	10.10.10.2	Full	1	0	39
toR3	10.10.10.3	Full	1	0	31
toR5	10.10.10.5	Full	1	0	39

No. of Neighbors: 3

*A:R1#

The following command sequence is executed on router R2:

- A. R2# configure router ospf router-id 10.10.10.99
- B. 10.10.10.99
- C. R2# configure router router-id 10.10.10.66

On router R1, what router ID appears for router R2 directly after these commands are executed?

- D. 10.10.10.2
- E. 10.10.10.66
- F. 10.10.10.1

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (Router ID Selection):

"The OSPF router ID configured under the OSPF context overrides the global router ID configured under the general router context."

Since "configure router ospf router-id 10.10.10.99" was applied, this takes precedence for OSPF operation, even though "configure router router-id 10.10.10.66" was configured globally.

Thus, router R1 will see router R2's OSPF router ID as 10.10.10.99.

-

NEW QUESTION # 49

What is the default preference value for a static route in the Nokia 7750 SR?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to Nokia 7750 SR OS Routing Protocols Guide (Static Routes, Chapter: Route Preference and Administrative Distance):

"Static routes are assigned a default preference value of 10. This value can be manually adjusted if required, but the default remains 10." Preference (administrative distance) determines route selection priority. A lower preference value is more preferred. The Nokia SR OS default preference values for major protocols are:

Direct: 0

Static: 10

OSPF: 150

BGP: 170

Therefore, the correct answer is C.

-

NEW QUESTION # 50

.....

If you start to prepare for the 4A0-113 exam from books, then you will find that the content is too broad for you to cope with the exam questions. So, we just pick out the most important knowledge to learn. Through large numbers of practices, you will soon master the core knowledge of the 4A0-113 Exam. It is important to review the questions you always choose mistakenly. You should concentrate on finishing all exercises once you are determined to pass the 4A0-113 exam. And you will pass for sure as long as you study with our 4A0-113 study guide carefully.
