Get 1 year Of Updated Network Appliance NS0-005 Exam Question Dumps

If you have a strong desire to get the Network Appliance certificate, our NS0-005 study materials are the best choice for you. At present, the certificate has gained wide popularity. So the official test syllabus of the NS0-005 exam begins to become complicated. So you must accept professional guidance. After all, lots of people are striving to compete with many candidates. Powerful competitiveness is crucial to pass the NS0-005 Exam. Our company has mastered the core technology of the NS0-005 study materials. What's more, your main purpose is to get the certificate quickly and easily. Our goal is to aid your preparation of the NS0-005 exam. Our study materials are an indispensable helper for you anyway. Please pay close attention to our NS0-005 study materials.

Network Appliance NetApp Technology Solutions Professional Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

A customer wants to have their MetroCluster IP automatically switch over in the event of a site disaster. Which two NetApp features can the customer use to automate switchover? (Choose two.)

- A. Active IQ Unified Manager
- **B. MetroCluster TieBreaker**
- C. Data Broker
- **D. ONTAP Mediator service**
- E. BlueXP observability

Answer: B,D

Explanation:

C). ONTAP Mediator service: The ONTAP Mediator is specifically designed for use with MetroCluster IP configurations. It acts as an external tiebreaker between the two MetroCluster sites. In the event of a site disaster, the Mediator service helps to determine whether a switchover is necessary and can initiate this process automatically. This is crucial for ensuring data availability and consistency, especially in scenarios where one of the sites becomes isolated or goes offline.

D). MetroCluster TieBreaker: The MetroCluster TieBreaker is another tool that serves a similar purpose to the ONTAP Mediator. It monitors the health and connectivity of the MetroCluster sites and can automate the switchover process in case of a site failure. By acting as an independent observer, the TieBreaker ensures that the decision to failover is made accurately, preventing split-brain scenarios and data inconsistencies.

NEW QUESTION # 57

Which option provides a flexible payment option for on-premises and hybrid cloud NetApp solutions?

- **A. Keystone**
- B. ONTAP Select
- C. Cloud Volumes ONTAP PAYGO
- D. Cloud Volumes ONTAP BYOL

Answer: A

Explanation:

= Keystone is the option that provides a flexible payment option for on-premises and hybrid cloud NetApp solutions. Keystone is a portfolio of payment solutions and storage-as-a-service offerings for hybrid cloud environments that deliver greater agility, financial flexibility, and reduced financial risk¹. Keystone offers various payment options, including creative financing, leasing, and fixed or variable solutions to fit your cash flow¹². Keystone also offers cloud storage services that enable you to pay as you grow, pay per use, or pay for a single subscription for on-premises and cloud services¹².

References = 1: NetApp Keystone - Flexible Payment Solutions & Storage-as-a-service Offerings | NetApp, 2: NetApp Keystone frequently asked questions (FAQs).

NEW QUESTION # 58

A company has a large data set that is used at many branch offices worldwide. An administrator needs a solution to save frequently used data locally and centrally lock files for real-time collaboration.

Which two NetApp solutions can be used to meet these requirements? (Choose two.)

- A. SnapLock Enterprise
- B. Cloud Volumes Service
- C. BlueXP copy and sync
- **D. FlexCache**
- **E. BlueXP edge caching**

Answer: D,E

Explanation:

B). BlueXP edge caching: Similar to FlexCache, BlueXP edge caching is designed to extend data fabric by caching data from a centralized data store to edge locations, such as branch offices. It allows for efficient access to frequently used data and can help improve performance for users at remote sites by caching data closer to where it's used.

C). FlexCache: FlexCache is a feature in NetApp ONTAP that enables the creation of a cache volume on a secondary system to provide faster access to a subset of data. This is particularly useful for scenarios where there is a need to access frequently used data

across multiple locations. FlexCache can help in reducing latency and bandwidth costs by caching data locally at each branch office while maintaining a central source of truth.

NEW QUESTION # 59

When using NetApp ONTAP software, which role is predefined for cluster administrators?

- A. backup
- B. provision
- C. recovery
- D. support

Answer: D

Explanation:

B). support: The 'support' role is a predefined role in NetApp ONTAP designed for cluster administrators. This role typically has permissions that allow for various administrative tasks required for supporting and maintaining the health and performance of the ONTAP cluster. These tasks can include monitoring system health, managing configurations, troubleshooting, and other support-related activities.

NEW QUESTION # 60

Which StorageGRID feature enables a compliant information lifecycle management (ILM) policy to prevent object deletion?

- A. S3 Object Lock
- B. S3 bucket access policy
- C. SnapLock Compliance
- D. Cloud Storage Pool

Answer: A

Explanation:

S3 Object Lock is a StorageGRID feature that enables a compliant information lifecycle management (ILM) policy to prevent object deletion. S3 Object Lock allows you to apply a retention period and a legal hold to individual objects or object versions in buckets with S3 Object Lock enabled. During the retention period, objects cannot be overwritten or deleted unless the legal hold is in effect. If an object is under a legal hold, it cannot be deleted even after the retention period expires. S3 Object Lock helps you to meet regulatory compliance, privacy, and data protection requirements for your object data.

References = Manage objects with S3 Object Lock, Example 7: Compliant ILM policy for S3 Object Lock, NetApp StorageGRID ILM on tape

NEW QUESTION # 61

.....

The Web-Based Network Appliance NS0-005 practice test evaluates your NetApp Technology Solutions Professional Exam exam preparation with its self-assessment features. With this computer-based program, you may automate the entire Network Appliance exam testing procedure. The web-based Network Appliance NS0-005 practice test elegantly designed interface is compatible with all browsers, including Internet Explorer, Safari, Opera, Google Chrome, and Mozilla Firefox. It will make practice and preparation for the Network Appliance NS0-005 Exam more intelligent, quick, and simple. So, you can be confident that you will find all you need to know to pass the Network Appliance NS0-005 exam questions on the first try.
