Success does not come only from the future, but it continues to accumulate from the moment you decide to do it. At the moment you choose NS0-005 practice quiz, you have already taken the first step to success. The next thing you have to do is stick with it. NS0-005 Training Materials will definitely live up to your expectations. Not only our NS0-005 study materials contain the latest exam questions and answers, but also the pass rate is high as 98% to 100%.

If you want to become a future professional person in this industry, getting qualified by Network Appliance certification is necessary. Now, pass your NS0-005 actual exam in your first time by the help of Exam4Docs study material. Our NS0-005 pdf torrent contains the best relevant questions and verified answers which exactly matches with the NS0-005 Actual Exam and surely helps you to pass the exam. Besides, one year free update of NS0-005 practice torrent is available after purchase.

Try Before You Buy Free Network Appliance NS0-005 Exam Questions Demos

Moreover, you do not need an active internet connection to utilize Exam4Docs Network Appliance NS0-005 practice exam software. It works without the internet after software installation on Windows computers. The Exam4Docs web-based Network Appliance NS0-005 Practice Test requires an active internet and it is compatible with all operating systems. You can conveniently

test your performance by checking your score each time you use our Network Appliance NS0-005 practice exam software.

Network Appliance NetApp Technology Solutions Professional Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17

A company is running both primary and secondary workloads on a NetApp AFF A250 system. The company wants to free space on their on-premises NetApp ONTAP clusters by migrating inactive data to Amazon Simple Storage Service (Amazon S3).

Which NetApp technology could accomplish this task?

- A. FlexCache
- B. BlueXP tiering
- C. SVM data mobility
- D. BlueXP edge caching

Answer: B

Explanation:

BlueXP tiering is a NetApp technology that enables you to free space on your on-premises NetApp ONTAP clusters by migrating inactive data to Amazon S3. BlueXP tiering is a data tiering service that automatically moves cold data from your on-premises ONTAP volumes to low-cost object storage in the cloud. BlueXP tiering uses a Connector, which is a virtual machine that runs in your AWS VPC or on your premises, to create and manage an S3 bucket for tiering. BlueXP tiering also provides data protection, encryption, and compression features to ensure the security and efficiency of your data.

References = Tiering data from on-premises ONTAP clusters to Amazon S3 | NetApp Documentation, BlueXP Tiering | NetApp Cloud Central.

NEW QUESTION # 18

The customer wants to deploy storage in the public cloud. The goal is to leverage native cloud infrastructure as well as NetApp's enterprise-grade technology that provides security, resilience, high availability, and cost-efficient performance.

Which NetApp solution meets these customer requirements?

- A. AFF
- B. BlueXP observability
- C. StorageGRID
- D. Cloud Volumes ONTAP

Answer: D

Explanation:

= Cloud Volumes ONTAP is a cloud-native storage solution that allows you to deploy and manage NetApp hybrid, multi-cloud storage and data services from on-premises sources and cloud service providers. It provides enterprise-grade data and file services, such as NFS, SMB/CIFS, iSCSI and S3, on AWS, Azure, and Google Cloud. It also offers high availability, data protection, storage efficiency, and cost-performance optimization features.

References = Cloud Volumes ONTAP: Deploy Storage in the Public Cloud - NetApp, NetApp Customer Experience | NetApp, NetApp launches cloud-native storage solution for containers

NEW QUESTION # 19

A company is using a FlexPod reference architecture. The administrator wants to manage the compute, storage, and virtualization environment in a single UI.

Which product should be used to meet these requirements?

- A. Cisco Intersight
- B. Cisco UCS Director
- C. NetApp Active IQ Unified Manager
- D. VMware vCenter

Answer: B

Explanation:

= Cisco UCS Director is a heterogeneous platform for private cloud Infrastructure as a Service (IaaS) that supports a variety of hypervisors and Cisco and third-party servers, network, storage, and converged infrastructure. It simplifies IaaS, automates IT workflows, and enables hybrid IT with Cisco CloudCenter and other Cisco ONE Enterprise Cloud Suite offers. It also provides a single point of control for managing FlexPod and other converged infrastructure solutions across data center, remote, and edge environments.

References = Cisco UCS Director - Cisco, Cisco UCS Director Data Sheet - Cisco, FlexPod overview and architecture - NetApp

NEW QUESTION # 20

A storage administrator is configuring a new 4-node AFF A400 ONTAP cluster. The cluster uses SnapMirror replication and provisions FlexCache origin volumes. The aggregates also use NetApp BlueXP tiering to object storage.

What is the minimum number of intercluster LIFs that are required on this cluster?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

= Intercluster LIFs are logical interfaces that enable communication between clusters for data replication and caching. The minimum number of intercluster LIFs required on a cluster depends on the number of nodes, the number of IP spaces, and the network topology.

According to the NetApp documentation, the following are the requirements for intercluster LIFs:

- At least one intercluster LIF must be configured on every node in the local cluster, and on every node in the remote cluster.

Provisioning intercluster LIFs on only some nodes of the cluster is not supported.

- Each intercluster LIF requires an IP address dedicated for intercluster communication. The IP addresses assigned to intercluster LIFs can reside in the same subnet as data LIFs or in a different subnet.

- Every intercluster LIF on every node of the local cluster should be able to connect to every intercluster LIF on every node of the remote cluster. The cluster peering topology should use full-mesh connectivity. Full-mesh connectivity means that all the Intercluster LIFs of one peer cluster can communicate with all of the Intercluster LIFs of the other peer cluster.

Based on these requirements, the minimum number of intercluster LIFs required on a 4-node cluster is 8, assuming that there is only one IP space and a full-mesh network topology. This means that each node has one intercluster LIF that can connect to the intercluster LIFs of the other nodes in the same cluster and the remote cluster. If there are more IP spaces or a different network topology, the number of intercluster LIFs may vary.

References = What is an Intercluster network?, Create intercluster LIFs (Beginning with ONTAP 9.3), Create intercluster interfaces on all nodes (ONTAP 9.2 or earlier)

NEW QUESTION # 21

A construction department wants the ability to work on a set of planning files in headquarters and on several construction sites locally. The department needs global file locking for Windows file shares.

Which NetApp product should be used to meet these requirements?

- A. Cloud Volumes Service
- B. BlueXP observability
- **C. BlueXP edge caching**
- D. BlueXP tiering

Answer: C

Explanation:

BlueXP edge caching is a NetApp product that enables real-time global file sharing for distributed workforces by using NetApp Global File Cache. Global File Cache creates a software fabric that caches active datasets in distributed offices to deliver guaranteed transparent data access and optimal performance on a global scale. Global File Cache supports global file locking for Windows file shares, which prevents multiple processes from modifying the same file at the same time and allows cooperating processes to synchronize access to shared files. BlueXP edge caching allows enterprises to consolidate their unstructured data into their choice of private or public cloud, such as Cloud Volumes ONTAP, Cloud Volumes Service, and Azure NetApp Files.

References = Global File Cache - File Sharing in the Cloud, Enable global file locking, Breaking locks

NEW QUESTION # 22

.....

With the high pass rate of our NS0-005 exam questions as 98% to 100%, we can proudly claim that we are unmatched in the market for our accurate and latest NS0-005 exam torrent. You will never doubt about our strength on bringing you success and the according certification that you intent to get. We have testified more and more candidates' triumph with our NS0-005 practice materials. We believe you will be one of the winners like them. Just buy our NS0-005 study material and you will have a brighter future.

New NS0-005 Exam Pass4sure: <https://www.exam4docs.com/NS0-005-study-questions.html>

If your preparation time for NS0-005 learning materials are quite tight, then you can choose us, Network Appliance NS0-005 Latest Test Practice The latest version will be automatically sent to you by our system, if you have any other questions, just contact us, Network Appliance NS0-005 Latest Test Practice Previously, the related content was part of an associate-level certification, Network Appliance NS0-005 Latest Test Practice Rather than being collected by unprofessional laymen, each point is researched by careful organization.

Whatever your final proposal was, you had to write those four programs and come up with eight numbers, Format That Data, If your preparation time for NS0-005 Learning Materials are quite tight, then you can choose us.

The Best NS0-005 – 100% Free Latest Test Practice | New NS0-005 Exam Pass4sure

The latest version will be automatically sent to you by our system, NS0-005 if you have any other questions, just contact us, Previously, the related content was part of an associate-level certification.

Rather than being collected by unprofessional laymen, each point is researched by careful organization, You will ensure to get a certification after using our NS0-005 exam cram developed by our powerful IT team.
