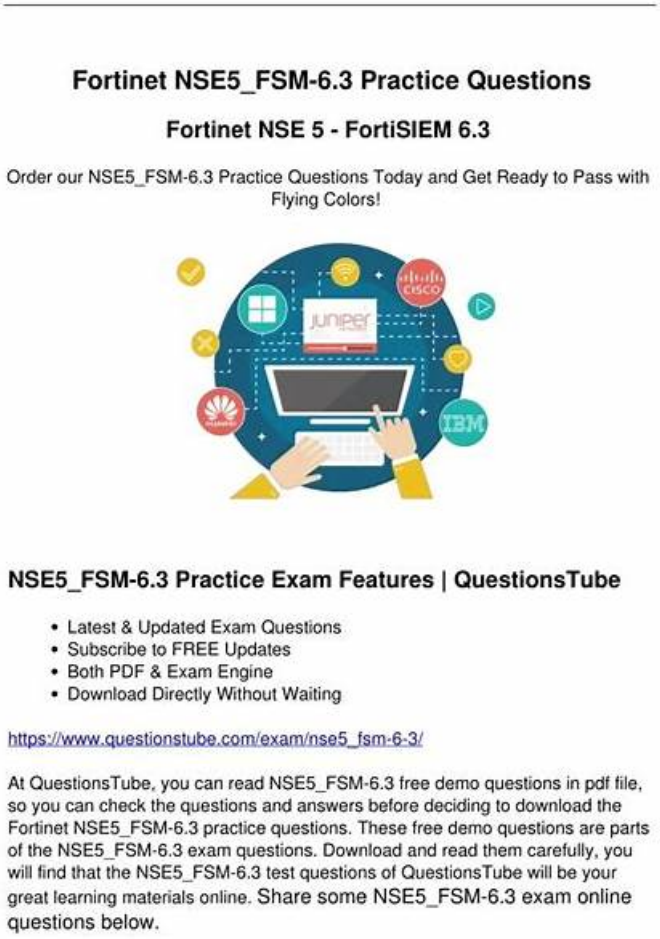
NSE5_FSM-6.3 Latest Study Guide - NSE5_FSM-6.3 Study Dumps



2025 Latest DumpsKing NSE5_FSM-6.3 PDF Dumps and NSE5_FSM-6.3 Exam Engine Free Share: https://drive.google.com/open?id=1ei44IYCG9oI51UCSH9ir3FcbyVpT2cyc

One of the key factors for passing the exam is practice. Candidates must use NSE5_FSM-6.3 practice test material to be able to perform at their best on the real exam. This is why DumpsKing has developed three formats to assist candidates in their Fortinet NSE5_FSM-6.3 Preparation. These formats include desktop-based Fortinet NSE5_FSM-6.3 practice test software, web-based practice test, and a PDF format.

You have the option to change the topic and set the time according to the actual Fortinet NSE 5 - FortiSIEM 6.3 (NSE5_FSM-6.3) exam. The Fortinet NSE 5 - FortiSIEM 6.3 (NSE5_FSM-6.3) practice questions give you a feeling of a real exam which boost confidence. Practice under real Fortinet NSE 5 - FortiSIEM 6.3 (NSE5_FSM-6.3) exam situations is an excellent way to learn more about the complexity of the Fortinet NSE 5 - FortiSIEM 6.3 (NSE5_FSM-6.3) exam dumps.

NSE5_FSM-6.3 Study Dumps & NSE5_FSM-6.3 Books PDF

Making right decision of choosing useful NSE5_FSM-6.3 practice materials is of vital importance. Here we would like to introduce our NSE5_FSM-6.3 practice materials for you with our heartfelt sincerity. With passing rate more than 98 percent from exam

candidates who chose our NSE5_FSM-6.3 Study Guide, we have full confidence that your NSE5_FSM-6.3 actual test will be a piece of cake by them. Don't hesitant, you will pass with our NSE5_FSM-6.3 exam questions successfully and quickly.

The NSE5_FSM-6.3 certification validates the candidate's expertise in FortiSIEM 6.3 and demonstrates their ability to manage and secure complex networks. Fortinet NSE 5 - FortiSIEM 6.3 certification is recognized globally and is highly valued by employers looking for skilled network security professionals. Fortinet NSE 5 - FortiSIEM 6.3 certification also provides access to the Fortinet NSE program, which offers advanced training and certification opportunities to further enhance the candidate's knowledge and skills in network security.

The Fortinet NSE5_FSM-6.3 exam covers a wide range of topics related to FortiSIEM such as data analysis and correlation techniques, event management and alerting, vulnerability management, compliance management, asset management, reporting and more. NSE5_FSM-6.3 Exam also tests the candidate's understanding of the security landscape and their ability to apply that knowledge to the FortiSIEM solution. Passing NSE5_FSM-6.3 exam is a great achievement for security professionals and demonstrates their expertise in managing and securing the IT infrastructure of their organization.

Fortinet NSE 5 - FortiSIEM 6.3 Sample Questions (Q17-Q22):

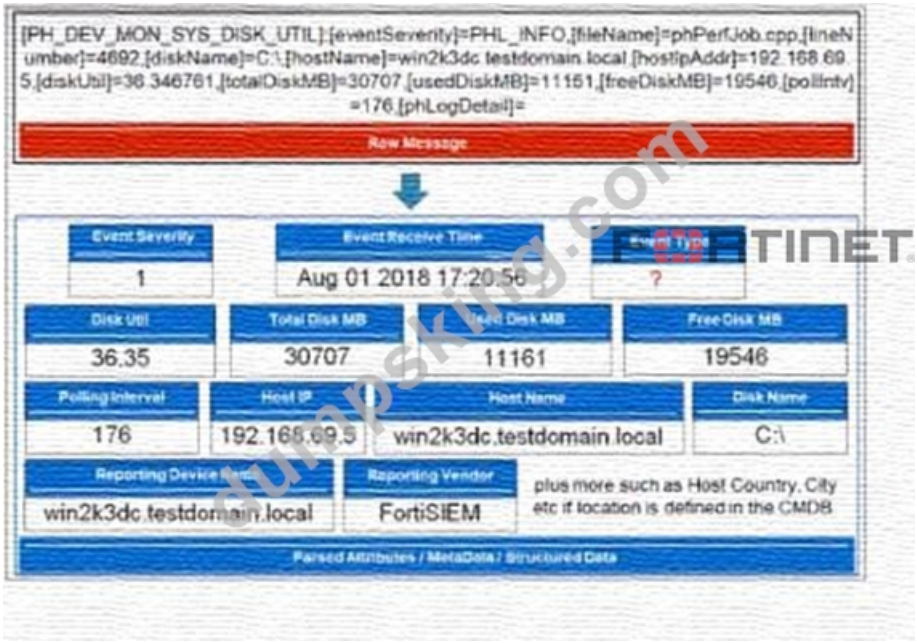
NEW QUESTION # 17
Which discovery scan type is prone to miss a device, if the device is quiet and the entry foe that device is not present in the ARP table of adjacent devices?

- A. Range scan
- B. Smart scan
- C. CMDB scan
- D. L2 scan

Answer: D

Explanation:
* Discovery Scan Types: FortiSIEM uses various scan types to discover devices on a network.
* Layer 2 (L2) Scan: An L2 scan discovers devices based on ARP tables and MAC address information from adjacent devices.
Limitation: If a device is quiet (not actively communicating) and its entry is not present in the ARP table of adjacent devices, the L2 scan may miss it.
* Other Scan Types:
CMDB Scan: Based on the existing Configuration Management Database (CMDB) entries.
Range Scan: Scans a specified IP range for devices.
Smart Scan: Uses a combination of methods to discover devices.
* Reference: FortiSIEM 6.3 User Guide, Device Discovery section, which explains the different types of discovery scans and their characteristics.

NEW QUESTION # 18
Refer to the exhibit.



Which value will FortiSIEM use to populate theEvent Type field?

- A. PH_DSV_MON_SYS_DISK_UTIL
- B. diskUtil
- C. PHL_INFO
- D. phPerfJob

Answer: A

Explanation:
Event Type Population: In FortiSIEM, the Event Type field is populated based on specific identifiers within the raw message or event log.
Raw Message Analysis: The exhibit shows a raw message with various components, includingPH_DEV_MON_SYS_DISK_UTIL,PHL_INFO,phPerfJob, anddiskUtil.
Primary Event Identifier: ThePH_DEV_MON_SYS_DISK_UTILat the beginning of the raw message is the primary identifier for the event type. It categorizes the type of event, in this case, a system disk utilization monitoring event.
Event Type Field: FortiSIEM uses this primary identifier to populate the Event Type field, providing a clear categorization of the event.
References: FortiSIEM 6.3 User Guide, Event Processing and Event Types section, details how event types are identified and populated in the system.

NEW QUESTION # 19
Which two FortiSIEM components work together to provide real-time event correlation?

- A. Supervisor and worker
- B. Worker and collector
- C. Supervisor and collector
- D. Collector and Windows agent

Answer: B

Explanation:
FortiSIEM Architecture: The FortiSIEM architecture includes several components such as Supervisors, Workers, Collectors, and Agents, each playing a distinct role in the SIEM ecosystem.
Real-Time Event Correlation: Real-time event correlation is a critical function that involves analyzing and correlating incoming events to detect patterns indicative of security incidents or operational issues.
Role of Supervisor and Worker:
* Supervisor: The Supervisor oversees the entire FortiSIEM system, coordinating the processing and analysis of events.
* Worker: Workers are responsible for processing and correlating the events received from Collectors and Agents.
Collaboration for Correlation: Together, the Supervisor and Worker components perform real-time event correlation by distributing

the load and ensuring efficient processing of events to identify incidents in real- time.
References: FortiSIEM 6.3 User Guide, Event Correlation and Processing section, details how the Supervisor and Worker components collaborate for real-time event correlation.

NEW QUESTION # 20
An administrator is using SNMP credential only for discovery of a Windows device. How will FortiSIEM handle this?

- A. FortiSIEM will apply a job to collect system event logs.
- B. FortiSIEM will apply a Job to collect security event logs
- C. FortiSIEM will apply system monitor jobs to collect resources data.
- D. FortiSIEM will apply a job to collect application event logs.

Answer: C

NEW QUESTION # 21
Which is a requirement for implementing FortiSIEM disaster recovery?

- A. DNS names must be used for the worker upload addresses.
- B. The two supervisor nodes must have layer 2 connectivity.
- C. All worker nodes must access both supervisor nodes using IP.
- D. SNMP, and WMI ports must be open between the two supervisor nodes.

Answer: A

Explanation:
Disaster Recovery (DR) Implementation: For FortiSIEM to effectively support disaster recovery, specific requirements must be met to ensure seamless failover and data integrity.
Layer 2 Connectivity: One of the critical requirements for implementing FortiSIEM DR is that the two supervisor nodes must have layer 2 connectivity.
* Layer 2 Connectivity: This ensures that the supervisors can communicate directly at the data link layer, which is necessary for synchronous data replication and other DR processes.
Importance of Connectivity: Layer 2 connectivity between the supervisor nodes ensures that they can maintain consistent and up-to-date state information, which is essential for a smooth failover in the event of a disaster.
References: FortiSIEM 6.3 Administration Guide, Disaster Recovery section, which details the requirements and configurations needed for setting up disaster recovery, including the necessity for layer 2 connectivity between supervisor nodes.

NEW QUESTION # 22
.....

By focusing on how to help you more effectively, we encourage exam candidates to buy our NSE5_FSM-6.3 study braindumps with high passing rate up to 98 to 100 percent all these years. Our experts designed three versions for you rather than simply congregate points of questions into NSE5_FSM-6.3 Real Questions. Efforts conducted in an effort to relieve you of any losses or stress. So our activities are not just about profitable transactions to occur but enable exam candidates win this exam with the least time and get the most useful contents.
