## Reliable NSE5\_FSM-6.3 Dumps Pdf - NSE5\_FSM-6.3 Study Guide Pdf

With the development of artificial intelligence, we have encountered more challenges. Only by improving our own soft power can we ensure we are not eliminated by the market. Select NSE5\_FSM-6.3 study questions to improve your work efficiency. And you won't regret for your wise choice. Because our NSE5\_FSM-6.3 Exam Materials contain the newest knowledge in this subject. And our NSE5\_FSM-6.3 training guide is beeing updated from time to time to be up-to-date. What is more, you will get the certification with the help of our NSE5\_FSM-6.3 practice engine.

## Fortinet NSE 5 - FortiSIEM 6.3 Sample Questions (Q17-Q22):

### NEW QUESTION # 17

Device discovery information is stored in which database?

- A. SVN DB
- **B. CMDB**
- C. Event DB
- D. Profile DB

**Answer: B**

Explanation:

\* Device Discovery Information: Information about discovered devices, including their configurations and statuses, is stored in a specific database.

\* CMDB: The Configuration Management Database (CMDB) is used to store detailed information about the devices discovered by FortiSIEM.

Function: It maintains comprehensive details about device configurations, relationships, and other metadata essential for managing the IT infrastructure.

\* Significance: Storing discovery information in the CMDB ensures that the FortiSIEM system has a centralized repository of device information, facilitating efficient management and monitoring.

\* Reference: FortiSIEM 6.3 User Guide, Configuration Management Database (CMDB) section, which details the storage and usage of device discovery information.

### NEW QUESTION # 18

Refer to the exhibit.

The screenshot shows the 'Edit SubPattern' window. The 'Name' field is 'DomainAcctLockout'. The 'Filters' section contains two rows: 'Event Type' with operator 'IN' and value 'EventTypes: Domain Account Lockout', and 'Reporting IP' with operator 'IN' and value 'Applications: Domain Controller'. The 'Aggregate' section contains one row: 'COUNT( Matched Events )' with operator '>=' and value '1'. The 'Group By' section lists three attributes: 'Reporting Device', 'Reporting IP', and 'User', each with a 'Move' column containing up and down arrows.

Which section contains the sortings that determine how many incidents are created?

- A. Group By
- B. Filters
- C. Actions
- D. Aggregate

**Answer: A**

Explanation:

Incident Creation in FortiSIEM: Incidents in FortiSIEM are created based on specific patterns and conditions defined within the system.

Group By Function: The "Group By" section in the "Edit SubPattern" window specifies how the data should be grouped for analysis and incident creation.

Impact of Grouping: The way data is grouped affects the number of incidents generated. Each unique combination of the grouped attributes results in a separate incident.

Exhibit Analysis: In the provided exhibit, the "Group By" section lists "Reporting Device," "Reporting IP," and "User." This means incidents will be created for each unique combination of these attributes.

References: FortiSIEM 6.3 User Guide, Rule and Pattern Creation section, which details how grouping impacts incident generation.

### NEW QUESTION # 19

FortiSIEM is deployed in disaster recovery mode.

When disaster strikes, which two tasks must you perform manually to achieve a successful disaster recovery operation? (Choose two.)

- A. Promote the secondary workers to the primary roles using the `phSecworker2priworker` command.

- B. Change the DNS configuration to ensure that users, devices, and collectors log in to the secondary FortiSIEM.
- C. Promote the secondary supervisor to the primary role using the phSecondary2primary command.
- D. Change the configuration for shared storage NFS configured for EventDB to the secondary FortiSIEM.

**Answer: A,B**

Explanation:

- \* Disaster Recovery Mode: FortiSIEM's disaster recovery (DR) mode ensures that there is a backup system ready to take over in case the primary system fails.
- \* Manual Tasks for DR Operation: In the event of a disaster, certain tasks must be performed manually to ensure a smooth transition to the secondary system.
- \* Promoting the Secondary Supervisor:  
Use the command phSecondary2primary to promote the secondary supervisor to the primary role. This command reconfigures the secondary supervisor to take over as the primary supervisor, ensuring continuity in management and coordination.
- \* Changing DNS Configuration:  
Update the DNS configuration to direct all users, devices, and collectors to the secondary FortiSIEM instance. This ensures that all components in the environment can communicate with the newly promoted primary supervisor without manual reconfiguration of individual devices.
- \* Reference: FortiSIEM 6.3 Administration Guide, Disaster Recovery section, provides detailed steps on promoting the secondary supervisor and updating DNS configurations during a disaster recovery operation.

## NEW QUESTION # 20

Refer to the exhibit.

Which section contains the subpattern configuration settings that determine how many matching events are needed to trigger the rule?

- A. Aggregate
- B. Filters
- C. Group By
- D. Actions

**Answer: A**

## NEW QUESTION # 21

A FortiSIEM supervisor at headquarters is struggling to keep up with an increase of EPS (Events Per Second) being reported across the enterprise.

What components should an administrator consider deploying to assist the supervisor with processing data?

- A. Supervisor
- B. Worker
- C. Collector
- D. Agent

**Answer: B**

## NEW QUESTION # 22

.....

You will get real questions and accurate answers from NSE5\_FSM-6.3 exam pdf torrent for your preparation of NSE5\_FSM-6.3 certification. When you choose BootcampPDF NSE5\_FSM-6.3 exam dumps, you will enjoy instant access to the NSE5\_FSM-6.3 practice papers. Moreover, free updates for NSE5\_FSM-6.3 latest dumps are available for 1 year after the purchase. With the help of the NSE5\_FSM-6.3 Test Engine, you can not only revisit the mistakes you made, but also can retake tests until you are satisfied. With the practice and NSE5\_FSM-6.3 valid study material, you will get your Fortinet NSE5\_FSM-6.3 certification with ease.
