To help you get the Fortinet exam certification, we provide you with the best valid NSE7_EFW-7.2 pdf prep material. The customizable and intelligence NSE7_EFW-7.2 test engine will bring you to a high efficiency study way. The NSE7_EFW-7.2 test engine contains self-assessment features like marks, progress charts, etc. Besides, the Easy-to-use NSE7_EFW-7.2 layout will facilitate your preparation for NSE7_EFW-7.2 real test. You can pass your NSE7_EFW-7.2 certification without too much pressure.

Fortinet NSE7_EFW-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	• Routing: It covers implementing OSPF to route enterprise traffic and Border Gateway Protocol (BGP) to route enterprise traffic.
Topic 2	• Central management: The topic of Central management covers implementing central management.
Topic 3	• Security profiles: Using FortiManager as a local FortiGuard server is discussed in this topic. Moreover, it delves into configuring web filtering, application control, and the intrusion prevention system (IPS) in an enterprise network.
Topic 4	• System configuration: This topic discusses Fortinet Security Fabric and hardware acceleration. Furthermore, it delves into configuring various operation modes for an HA cluster.
Topic 5	• VPN: Implementing IPsec VPN IKE version 2 is discussed in this topic. Additionally, it delves into implementing auto-discovery VPN (ADVPN) to enable on-demand VPN tunnels between sites.

NSE7_EFW-7.2 Questions - Highly Recommended By Professionals

The certification of Fortinet NSE7_EFW-7.2 exam is what IT people want to get. Because it relates to their future fate. Fortinet NSE7_EFW-7.2 exam training materials are the learning materials that each candidate must have. With this materials, the candidates will have the confidence to take the exam. Training materials in the Exam4Tests are the best training materials for the candidates. With Exam4Tests's Fortinet NSE7_EFW-7.2 Exam Training materials, you will pass the exam easily.

Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which, three conditions are required for two FortiGate devices to form an OSPF adjacency? (Choose three.)

- A. OSPF link costs match
- B. OSPF router IDs are unique
- C. Authentication settings match
- D. OSPF interface priority settings are unique
- E. OSPF interface network types match

Answer: B,C,E

NEW QUESTION # 38

Refer to the exhibit, which shows a custom signature.

Which two modifications must you apply to the configuration of this custom signature so that you can save it on FortiGate? (Choose two.)

- A. Start options with --.
- B. Add attack_id.
- C. Add severity.
- D. Ensure that the header syntax is F-SBID.

Answer: C,D

Explanation:

For a custom signature to be valid and savable on a FortiGate device, it must include certain mandatory fields.

Severity is used to specify the level of threat that the signature represents, and attack_id is a unique identifier for the signature.

Without these, the signature would not be complete and could not be correctly utilized by the FortiGate's Intrusion Prevention System (IPS).

NEW QUESTION # 39

Which two statements about the Security fabric are true? (Choose two.)

- A. Only the root FortiGate collects network topology information and forwards it to FortiAnalyzer
- B. Only the root FortiGate sends logs to FortiAnalyzer
- C. FortiGate uses the FortiTelemetry protocol to communicate with FortiAnalyzer.
- D. Only FortiGate devices with configuration-sync receive and synchronize global CMDB objects that the root FortiGate sends

Answer: A,C

Explanation:

FortiGate uses the FortiTelemetry protocol to communicate with FortiAnalyzer and other Security Fabric devices to exchange information such as device status, network topology, and security events¹. Only the root FortiGate collects network topology information and forwards it to FortiAnalyzer, where it can be viewed and analyzed². Reference: = Security Fabric - Fortinet Documentation, Fortinet Security Fabric for Securing Digital Innovations

NEW QUESTION # 40

Exhibit.

Refer to the exhibit, which shows a partial web filter profile configuration. What can you conclude from this configuration about access to www.facebook.com, which is categorized as Social Networking?

- A. The access is blocked based on the Content Filter configuration
- **B. The access is blocked based on the URL Filter configuration**
- C. The access is allowed based on the FortiGuard Category Based Filter configuration
- D. The access is blocked if the local or the public FortiGuard server does not reply

Answer: B

Explanation:

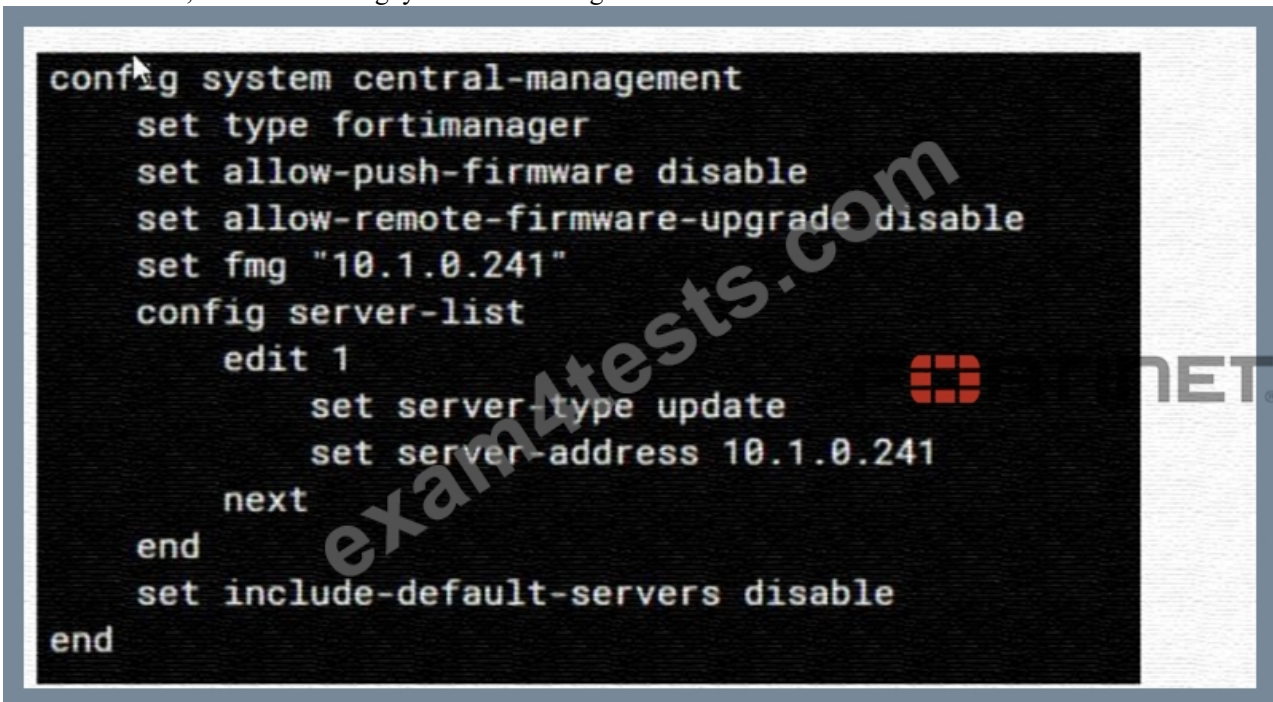

The access to www.facebook.com is blocked based on the URL Filter configuration. In the exhibit, it shows that the URL "www.facebook.com" is specifically set to "Block" under the URL Filter section.

= Fortigate: How to configure Web Filter function on Fortigate, Web filter | FortiGate / FortiOS 7.0.2 | Fortinet Document Library, FortiGate HTTPS web URL filtering ... - Fortinet ... - Fortinet Community

NEW QUESTION # 41

Refer to the exhibit, which shows config system central-management information.

Which setting must you configure for the web filtering feature to function?

- A. Set update-server-location to automatic.

- Answer: D**

For the web filtering feature to function effectively, the FortiGate device needs to have a server configured for rating services. The rating option in the server-type setting specifies that the server is used for URL rating lookup, which is essential for web filtering. The displayed configuration does not list any FortiGuard web filtering servers, which would be necessary for web filtering. The setting set include-default-servers disable indicates that the default FortiGuard servers are not being used, and hence, a specific server for web filtering (like securewf.fortiguard.net) needs to be configured.
