

NSE7_EFW-7.2 Zertifizierungsfragen, Fortinet

NSE7_EFW-7.2 PrüfungFragen

Übrigens, Sie können die vollständige Version der ZertSoft NSE7_EFW-7.2 Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=1COHkuSCO4vTB2qvUiFmD7MoBNBh3pTJP>

ZertSoft hat schon einen guten Ruf in vielen Zertifizierungsbranchen erhalten, weil wir die Testfragen, die Lernhilfe und Dumps zur NSE7_EFW-7.2 Zertifizierungsprüfung haben. Zur Zeit als der professionellster Anbieter im Internet bieten wir perfekten Kundenservice und einen einjährigen kostenlosen Update-Service. Wenn der Fragenkataloge zur Fortinet NSE7_EFW-7.2 Zertifizierungsprüfung geändert werden, bieten wir den Kunden Schutz. Die Fragen zur NSE7_EFW-7.2 Zertifizierungsprüfung werden von den IT-Experten sorgfältig bearbeitet. Mit den Prüfungsmaterialien zur NSE7_EFW-7.2 Zertifizierungsprüfung von ZertSoft wird Ihre Zukunft sicher glänzend sein.

Fortinet NSE7_EFW-7.2 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Security profiles: Using FortiManager as a local FortiGuard server is discussed in this topic. Moreover, it delves into configuring web filtering, application control, and the intrusion prevention system (IPS) in an enterprise network.
Thema 2	System configuration: This topic discusses Fortinet Security Fabric and hardware acceleration. Furthermore, it delves into configuring various operation modes for an HA cluster.
Thema 3	Routing: It covers implementing OSPF to route enterprise traffic and Border Gateway Protocol (BGP) to route enterprise traffic.
Thema 4	Central management: The topic of Central management covers implementing central management.
Thema 5	VPN: Implementing IPsec VPN IKE version 2 is discussed in this topic. Additionally, it delves into implementing auto-discovery VPN (ADVPN) to enable on-demand VPN tunnels between sites.

NSE7_EFW-7.2 Prüfungsunterlagen & NSE7_EFW-7.2 Prüfungssimulationen

ZertSoft genießt schon guten Ruf auf dem IT-Prüfungssoftware Markt Deutschlands, Japans und Südkoreas. Wenn es für Sie das erste Mal, unsere Marke zu hören, können Sie zuerst auf unserer Webseite die Demos der Fortinet NSE7_EFW-7.2 gratis probieren. Dann können Sie das kundenorientierte Design von uns ZertSoft erkennen und die ausführliche Deutungen empfinden. Wenn auch die Unterlagen der Fortinet NSE7_EFW-7.2 schon am neuesten sind, werden wir immer weiter die Aktualisierungssituation überprüfen. Innerhalb einem Jahr nach Ihrem Kauf, bieten wir Ihnen gratis immer weiter die neueste Version von Fortinet NSE7_EFW-7.2 Prüfungssoftware.

Fortinet NSE 7 - Enterprise Firewall 7.2 NSE7_EFW-7.2 Prüfungsfragen mit Lösungen (Q68-Q73):

68. Frage

Refer to the exhibit which shows two configured FortiGate devices and peering over FGSP.

The main link directly connects the two FortiGate devices and is configured using the `set session- syn-dev <interface>` command. What is the primary reason to configure the main link?

- A. To have both sessions and configuration synchronization in layer 3
- B. To have both sessions and configuration synchronization in layer 2**
- C. To have only configuration synchronization in layer 3
- D. To load balance both sessions and configuration synchronization between layer 2 and 3

Antwort: B

Begründung:

When peering over FGSP, by default, the FortiGate devices or FGCP clusters, share information over layer 3 between the interfaces that are configured with peer IP addresses. You can also specify the interfaces used to synchronize session in layer 2 instead of layer 3 using the "session- sync-dev" setting. When a session synchronization interface is configured and FGSP peers are directly connected on this interface, then session synchronization is done over layer 2, only falling back to layer 3 if the session synchronization interface becomes unavailable.

69. Frage

Which two statements about bfd are true? (Choose two)

- A. It can support neighbor only over the next hop in BGP
- **B. It works for OSPF and BGP**
- **C. You can disable it at the protocol level**
- D. You must configure n globally only

Antwort: B,C

Begründung:

BFD (Bidirectional Forwarding Detection) is a protocol that can quickly detect failures in the forwarding path between two adjacent devices. You can disable BFD at the protocol level by using the "set bfd disable" command under the OSPF or BGP configuration. BFD works for both OSPF and BGP protocols, as well as static routes and SD-WAN rules. References := BFD | FortiGate / FortiOS 7.2.0 - Fortinet Document Library, section "BFD".

70. Frage

Refer to the exhibit, which provides information on BGP neighbors.

```
# get router info bgp neighbors
VRF 0 neighbor table:
BGP neighbor is 10.2.0.254, remote AS 65100, local AS 65200, external link
  BGP version 4, remote router ID 0.0.0.0
  BGP state = Idle
  Not directly connected EBGP
  Last read 00:04:40, hold time is 180, keepalive interval is 60 seconds
  Configured hold time is 180, keepalive interval is 60 seconds
  Received 5 messages, 0 notifications, 0 in queue
  Sent 4 messages, 1 notifications, 0 in queue
  Route refresh request received 0, sent 0
  NLRI treated as withdraw: 0
  Minimum time between advertisement runs is 30 seconds...
```

What can you conclude from this command output?

- **A. BGP is attempting to establish a TCP connection with the BGP peer.**
- B. The bfd configuration is set to enable.
- C. You must change the AS number to match the remote peer.
- D. The routers are in the same area ID of 0.0.0.0.

Antwort: A

Begründung:

The BGP state is "Idle", indicating that BGP is attempting to establish a TCP connection with the peer. This is the first state in the BGP finite state machine, and it means that no TCP connection has been established yet. If the TCP connection fails, the BGP state will reset to either active or idle, depending on the configuration.

71. Frage

Which two statements about IKE vision 2 are true? (Choose two.)

- **A. It supports the extensible authentication protocol (EAP)**
- B. It supports the XAuth protocol.
- C. Phase 1 includes main mode

Antwort: A,D

72. Frage

Which two statements about the Security Fabric are true? (Choose two.)

- A. Only the root FortiGate collects network topology information and forwards it to FortiAnalyzer.
- B. Each member of the Security Fabric maintains the shared Security Fabric map.
- C. Only FortiGate devices with configuration-sync sel to Local receive and synchronize the global CMDB objects that the root FortiGate sends.
- D. Each FortiGate device in the Security Fabric must have bidirectional FortiTelemetry connectivity.
- E. FortiGate uses the FortiTelemetry protocol to communicate with FortiAnalyzer.

Antwort: A,D

73. Frage

• • • • •

Nun ist eine Gesellschaft, die mit den fähigen Leuten überschwemmt. Aber viele Fachleute fehlen trotzdem doch. Beispielsweise fehlen in der IT-Branche Techniker. Und die Fortinet NSE7_EFW-7.2 Zertifizierungsprüfung ist eine Prüfung, die IT-Technik testet. ZertSoft ist eine Website, die Ihnen Kenntnisse zur Fortinet NSE7_EFW-7.2 Zertifizierungsprüfung liefert.
