NSE7_LED-7.0 Certification Exam Infor | Valid NSE7_LED-7.0 Braindumps

Our track record is outstanding. With our actual Fortinet NSE 7 - LAN Edge 7.0 (NSE7_LED-7.0) exam questions, we have helped hundreds of NSE7_LED-7.0 exam applicants in achieving success. We guarantee that if you use our real Fortinet NSE 7 - LAN Edge 7.0 (NSE7_LED-7.0) exam dumps you will clear the test in one go. And if you fail in this objective you can claim a full refund (terms and conditions apply). Excellent offers of ExamsReviews don't stop here.

Free domo for NSE7_LED-7.0 exam materials is available, we recommend you to have a try before buying NSE7_LED-7.0 exam dumps, so that you can have a deeper understanding of what you are going to buy. NSE7_LED-7.0 training materials contain both questions and answers, and you can have a quickly check after practicing. We have a professional team to collect and research the latest information for the exam, and you can receive the latest information for NSE7_LED-7.0 Exam Dumps if you choose us. We have online and offline service for NSE7_LED-7.0 exam dumps, and the staff possesses the professional knowledge for the exam, if you have any questions, you can consult us.

Fortinet NSE 7 - LAN Edge 7.0 Sample Questions (Q61-Q66):

NEW QUESTION # 61
Which FortiSwitch VLANs are automatically created on FortGate when the first FortiSwitch device is discovered1?

- A. default quarantine rspan voice video and nac_segment
- B. default quarantine, rspan voice video onboarding and nac_segment
- C. fortilink. quarantine erspan voice video and onboarding
- D. access, quarantine, rspan. voice, video, and onboarding

Answer: B

Explanation:
Based on LAN Edge 7.0 Study Guide page 217 When FortiGate discovers the first switch, it automatically adds to its configuration some settings that are default, quarantine, rspan, voice, video, onboarding, and nac_segment

NEW QUESTION # 62
Which CLI command should an administrator use on FortiGate to view the RSSO authentication process in real time?

- A. diagnose debug application authd -1
- B. diagnose debug application fnbamd -1
- C. diagnose debug application foauthd -1
- D. diagnose debug application radiusd -1

Answer: B

NEW QUESTION # 63
Refer to the exhibits.

```
# get wireless-controller rf-analysis
WTP: Office   0-192.168.5.98:5246
   channel    rssi-total    rf-score    overlap-ap    interfere-ap    chan-utilizaion
      1           66            8           11            11              32%
      2           13           10            0            20              44%
      3            6           10            0            20              16%

rId=0 chan=13   2472 util=50 ( 22%)
```

Examine the troubleshooting outputs shown in the exhibits

Users have been reporting issues with the speed of their wireless connection in a particular part of the wireless network The interface that is having issues is the 2 4 GHz interface that is currently configured on channel 6 The administrator of the wireless network has investigated and surveyed the local RF environment using the tools available at the AP and FortiGate Which configuration would improve the wireless connection?

- A. Change the AP 2 4 GHz channel to 11
- B. Change the AP 2 4 GHz channel to 13.
- C. Change the AP 2 4 GHz channel to 9.
- D. Change the AP 2 4 GHz channel to 1.

Answer: D

Explanation:
Explanation
According to the exhibits, the AP 2.4 GHz interface is currently configured on channel 6, which is overlapping with other nearby APs on channels 4 and 8. This can cause interference and reduce the wireless performance.
Therefore, changing the AP 2.4 GHz channel to 1 would improve the wireless connection, as it would avoid the overlapping channels and use a non-overlapping channel instead. Option A is false because changing the AP 2.4 GHz channel to 11 would still overlap with other nearby APs on channels 9 and 13. Option C is false because changing the AP 2.4 GHz channel to 9 would still overlap with other nearby APs on channels 6, 8, and 11. Option D is false because changing the AP 2.4 GHz channel to 13 would still overlap with other nearby APs on channels 9 and 11.

NEW QUESTION # 64
Which two statements about FortiSwitch manager are true1? (Choose two)

- A. Per-device management is the default management mode on FortiManager
- B. If the administrator makes any changes on FortiSwitch manager they must also install those changes on FortiGate so that those changes are applied on the managed switches
- C. FortiManager obtains the FortiSwitch status information by querying the FortiGate REST API every three minutes
- D. Any switch discovered or authorized on FortiGate must be added manually on FortiSwitch manager

Answer: B,C

Explanation:
According to the FortiManager Administration Guide1, "FortiManager obtains the FortiSwitch status information by querying the FortiGate REST API every three minutes." Therefore, option B is true because it describes how FortiManager gets the information about the managed switches. According to the same guide2,
"If you make any changes in this module, you must install them on your managed device so that they are applied on your managed switches." Therefore, option C is true because it describes what the administrator must do after making any changes on FortiSwitch manager. Option A is false because central management is the default management mode on FortiManager, not per-device management. Option D is false because any switch discovered or authorized on FortiGate will be automatically added on FortiSwitch manager, not manually.

NEW QUESTION # 65
Refer to the exhibit

```
ortiGate # diagnose switch-controller switch-info 802.1X
anaged Switch : S224EPTF19006016

  port2 : Mode: port-based (mac-by-pass disable)
          Link: Link up
          Port State: unauthorized: (  )
          Dynamic Authorized Vlan : 0
          Dynamic Allowed Vlan list:
          Dynamic Untagged Vlan list:
          EAP pass-through : Enable
          EAP egress-frame-tagged : Enable
          EAP auto-untagged-vlans : Enable
          Allow MAC Move : Disable
          Dynamic Access Control List : Disable
          Quarantine VLAN (4093) detection : Enable
          Native Vlan : 10
          Allowed Vlan list: 10,4093
          Untagged Vlan list: 4093
          Guest VLAN :
          Auth-Fail Vlan :
          AuthServer-Timeout Vlan :

          Sessions info:
          00:09:0f:02:02:02    Type=802.1x,,state=AUTHENTICATING,etime=0,eap_cnt=0 params:reAuth=3600
```

A device connected to port2 on FortiSwitch cannot access the network The port is assigned a security policy to enforce 802 1X authentication While troubleshooting the issue, the administrator obtains the debug output shown in the exhibit Which two scenarios are likely to cause this issue? (Choose two.)

- A. The device has been quarantined for 3600 seconds.
- B. The device does not support 802 1X authentication
- C. The device is not configured for 802 IX authentication.
- D. The device has been assigned the guest VLAN

Answer: B,C

Explanation:
According to the exhibit, the debug output shows that the device connected to port2 on FortiSwitch is sending an EAPOL-Start message, which is the first step of the 802.1X authentication process. However, the output also shows that the device is not sending any EAP-Response messages, which are required to complete the authentication process. Therefore, option A is true because the device is not configured for 802.1X authentication, which means that it does not have the correct credentials or settings to authenticate with the RADIUS server. Option D is also true because the device does not support 802.1X authentication, which means that it does not have the capability or software to perform 802.1X authentication. Option B is false because the device has not been quarantined for 3600 seconds, but rather has a session timeout of 3600 seconds, which is the default value for 802.1X sessions. Option C is false because the device has not been assigned the guest VLAN, but rather has been assigned the default VLAN, which is VLAN 1.

NEW QUESTION # 66
......

Do you want to pass your Fortinet NSE 7 - LAN Edge 7.0 exam? If so, ExamsReviews is the ideal place to begin. ExamsReviews provides comprehensive NSE7_LED-7.0 exam questions preparation in two simple formats: a pdf file format and an Fortinet NSE7_LED-7.0 online practice test engine. If you fail your Fortinet NSE 7 - LAN Edge 7.0 (NSE7_LED-7.0) Exam, you can obtain a full refund and a 20% discount! Continue reading to discover more about the essential aspects of these excellent NSE7_LED-7.0 exam questions.

Valid NSE7_LED-7.0 Braindumps: https://www.examsreviews.com/NSE7_LED-7.0-pass4sure-exam-review.html

Fortinet NSE7_LED-7.0 Certification Exam Infor Nothing will stop you as long as you are rich, You will find that every detail of our NSE7_LED-7.0 study braindumps is perfect and excellent not only on the content but also on the displays, If you really long for recognition and success, you had better choose our NSE7_LED-7.0 Exam Sims exam demo since no other exam demo has better quality than ours, High quality NSE7_LED-7.0 exam material for you.

Getting NSE7_LED-7.0 certification means you will work in big famous companies with considerable salary and your career will have a bright prospect, To keep the text readable, only code excerpts are usually shown.

High Pass-Rate NSE7_LED-7.0 Certification Exam Infor & Effective Valid NSE7_LED-7.0 Braindumps & Practical Authorized NSE7_LED-7.0 Pdf

Nothing will stop you as long as you are rich, You will find that every detail of our NSE7_LED-7.0 study braindumps is perfect and

excellent not only on the content but also on the displays.

If you really long for recognition and success, you had better choose our NSE7_LED-7.0 Exam Sims exam demo since no other exam demo has better quality than ours, High quality NSE7_LED-7.0 exam material for you.

Fortinet NSE7_LED-7.0 test guide materials point test braindumps type and key knowledge out clearly.
