New Nutanix NCP-US Mock Test | NCP-US Exam Review

You only need 20-30 hours to learn our NCP-US test braindumps and then you can attend the exam and you have a very high possibility to pass the NCP-US exam. For many people whether they are the in-service staff or the students they are busy in their job, family lives and other things. But you buy our NCP-US prep torrent you can mainly spend your time energy and time on your job, the learning or family lives and spare little time every day to learn our Nutanix Certified Professional - Unified Storage v6.5 exam torrent. And you will pass the NCP-US exam as it is a piece of cake to you with our NCP-US exam questions.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q43-Q48):

NEW QUESTION # 43

What is the minimum and maximum file size limitations for Smart Tiering?

- A. 64 KiB minimum and 15 TiB maximum

- B. 64 KiB minimum and 5 TiB maximum
- C. 128 KiB minimum and 13 TiB maximum
- D. 128 IOB minimum and 5 TiB maximum

Answer: B

NEW QUESTION # 44

An administrator successfully installed Objects and was able to create a bucket. When using the reference URL to access this Objects store, the administrator is unable to write data in the bucket when using an Active Directory account. Which action should the administrator take to resolve this issue?

- A. Verify Access Keys for the user.
- B. Reset the Active Directory user password.
- C. Verify sharing policies at the bucket level.
- D. Replace SSL Certificates at the Objects store level.

Answer: C

NEW QUESTION # 45

An administrator needs to analyze data created by a custom application, which writes data into an SMB share hosted on Files. This application uses custom-built file extensions such as .zyx, .zzz, the administrator needs to provide a collapsed view of space usage, number of files, and changes within a given time frame.

How should the administrator provide the required information?

- A. Configure SNMP server with Nutanix MIBS and use Excel to analyze traps.
- B. Add a new file category in File Analytics and use File Distribution View,
- C. Create a File Server Resource Manager MMC and use File Screens,
- D. Go to Files, select the share used by the application and point to Usage View.

Answer: B

Explanation:

According to File Auditing and Analytics for your Nutanix Files Enterprise Cloud1, File Analytics is a feature that captures real-time user audit data and file metadata for Nutanix Files environments. It allows you to create custom reports based on various criteria such as file type, size, owner, access time, etc.

According to Nutanix Files 3.8 and File Analytics 3.0 | Nutanix Community2, File Analytics allows you to add new file categories based on custom file extensions such as .zyx or .zzz. You can then use File Distribution View to see a collapsed view of space usage, number of files, and changes within a given time frame for each file category.

Therefore, if the administrator needs to analyze data created by a custom application that uses custom-built file extensions such as .zyx or .zzz, they can add a new file category in File Analytics and use File Distribution View to provide the required information.

NEW QUESTION # 46

An administrator needs to configure a Files share with these requirements:

Supports 100 virtual desktop users

Share would host user data

Share is limited to 1 TB, evenly distributed across users

Optimized for best I/O performance within the current environment

Which two configuration actions should the administrator take to meet these requirements? (Choose two.)

- A. Create a distributed share.
- B. Add a quote policy to the share.
- C. Configure a standard share.
- D. Enable ABE on the share.

Answer: A,B

Explanation:

According to Nutanix Files SMB Share Default Permission1, a standard share is created with default permissions for three built-in

groups: Administrators, Users, and Backup Operators. This may not be suitable for hosting user data that needs to be evenly distributed across users.

According to Nutanix Support & Insights², a distributed share is a type of SMB share that allows you to distribute files across multiple file servers for better performance and scalability. This can help optimize the I/O performance within the current environment.

According to Nutanix File and NFS Mount Examples³, a quota policy is a way to limit the amount of space that a user or group can consume on a share. This can help enforce the 1 TB limit on the share and ensure that each user gets an equal amount of space. <https://portal.nutanix.com/page/documents/solutions/details?targetId=TN-2041-Nutanix-Files%3ATN-2041-Nutanix-Files>

NEW QUESTION # 47

In a Nutanix cluster based on AHV, multiple Nutanix unified Storage services such as Volumes, Files and Objects are deployed. After performing an LCM inventory, MSP is listed as an update.

Which storage service requires MSP to be updated?

- A. Files
- **B. Objects**
- C. Prism
- D. Volumes

Answer: B

Explanation:

"Kubernetes is not correctly reporting its storage usage." The NCC checks run on the nodes in the cluster and may report storage usage differently based on how they are being executed. Additionally, the administrator notes that the Kubernetes pod reports that the usage is 55% used disk space, which is different than what the NCC checks report.

One possible cause of this discrepancy is that Kubernetes is not correctly reporting its storage usage. It is recommended that the administrator checks the Kubernetes storage configuration to ensure it is set up correctly and that Kubernetes is able to accurately report the storage usage. It may also be necessary to update or reinstall Kubernetes if there are any issues with the installation. Nutanix Objects is a software-defined object storage solution that provides scalable and secure data storage for unstructured data¹. MSP is responsible for routing requests from clients to Objects clusters and providing load balancing and high availability¹. To update MSP, you need to perform an LCM inventory and select MSP from the software updates list¹.

NEW QUESTION # 48

.....

First and foremost, you can get the latest version of our NCP-US study materials for free during the whole year. Second, our responsible after sale service staffs are available in twenty four hours a day, seven days a week, so if you have any problem after purchasing NCP-US study materials, you can contact our after sale service staffs on our NCP-US Study Guide at any time. Last but not least, we have installed the most advanced operation machines in our website, so the most effective and the latest NCP-US study materials is right here waiting for you.

New NCP-US Mock Test: <https://www.examboosts.com/Nutanix/NCP-US-practice-exam-dumps.html>

Nutanix NCP-US Latest Dumps If you have any doubts or questions you can contact us by mails or the online customer service personnel and we will solve your problem as quickly as we can, The New NCP-US Mock Test - Nutanix Certified Professional - Unified Storage v6.5 certification is proof of their competence and skill, Before purchasing, you can download and try any NCP-US exam questions format, You can pass NCP-US exam in the shortest time and obtain a certification soon.
