And you will definite pass your exam for our NCA-6.10 pass guide has high pass rate as 99%!

Nutanix Certified Associate v6.10 Sample Questions (Q38-Q43):

NEW QUESTION # 38
Which Nutanix Support case priority level indicates that the system is available but experiencing issues that directly impact productivity?

- A. P1
- B. P2

- C. P3
- D. P4

Answer: C

NEW QUESTION # 39
When is deduplication recommended?

- A. Linked Clone VMs
- B. Cold data
- C. Full clone VMs
- D. Server workloads

Answer: D

NEW QUESTION # 40
An administrator receives the alert:
What is the most likely cause?

- A. This node in the cluster is already in maintenance mode.
- B. This node in the cluster may not have enough resources available.
- C. Other nodes in the cluster may not have enough resource available.
- D. Another node in this cluster is already in maintenance mode.

Answer: C

Explanation:
When a Nutanix cluster alert occurs, indicating maintenance mode issues, the most likely cause is that another node in the cluster is already in maintenance mode. Nutanix clusters enforce restrictions to prevent more than one node from entering maintenance mode simultaneously. This ensures the cluster can maintain resiliency and availability, adhering to the redundancy factor (RF) policy.
If another node is already in maintenance mode, the cluster cannot afford to have additional nodes enter maintenance without compromising data and service availability.
:
Nutanix Cluster Best Practices Documentation - Maintenance Mode.
Nutanix Alerts and Events Guide, accessible via Prism UI.

NEW QUESTION # 41
Which option is supported by Nutanix for Data-at-Rest encryption?

- A. Storage Pool-only Encryption
- B. Data-only Encryption
- C. Software-only Encryption
- D. Cluster-only Encryption

Answer: C

Explanation:
The correct answer isD. Software-only Encryption.
Nutanix supportsData-at-Rest Encryption (DARE)through bothhardware-basedandsoftware-based methods. Among the supported solutions,software-only encryptionis a widely used and officially supported method, especially whenSelf-Encrypting Drives (SEDs)are not in use.
Key facts about Nutanix DARE:
* Enables encryption of data written to physical media.
* Works at theCVM and controller layer, ensuring all I/O is encrypted before being persisted.
* Software-based encryptioncan be enabled via Prism Central or command-line usingNative Key Management (NKM)orexternal KMIP-compliant key managers.
* Hardware encryption (SED)is optional and not required for DARE.
Clarifications:

* A. Storage Pool-only Encryption: Not valid; encryption applies at the cluster level, not only to storage pools.
* B. Data-only Encryption: Ambiguous and not a Nutanix-supported term.
* C. Cluster-only Encryption: Misleading; encryption is applied to data at rest, not to the "cluster" object.
Prism UI Navigation Path:
Settings > Security > Encryption
Official Reference:
* Nutanix Security Guide - Data-at-Rest Encryption
* Nutanix Bible - Encryption Section
* Excerpt: "Nutanix supports software-only data-at-rest encryption using Native Key Management or external KMIP key managers, without requiring self-encrypting drives."

NEW QUESTION # 42
What is the purpose of the OpLog?

- A. Persistent data storage
- B. Persistent write buffer
- C. Global metadata
- D. Dynamic read cache

Answer: B

NEW QUESTION # 43
......
