

Nutanix NCP-DB Reliable Test Guide - NCP-DB New Real Test

DOWNLOAD the newest ActualTestsQuiz NCP-DB PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1GJmZ_erRzGgVfCJq8l0x8q2hYIU6ut4K

The client can try out and download our NCP-DB training materials freely before their purchase so as to have an understanding of our product and then decide whether to buy them or not. The website pages of our product provide the details of our NCP-DB learning questions. You can see the demos which are part of the all titles selected from the test bank and the forms of the questions and answers and know the form of our software on the website pages of our study materials.

Nutanix NCP-DB Exam Syllabus Topics:

Topic	Details
Topic 1	Describe NDB Concepts: It defines database and NDB terminology. The topic also explains benefits and features of NDB.
Topic 2	Deploy and Configure an NDB Solution: This topic discusses how to deploy, configure, and NDB Instance.
Topic 3	Operate and Maintain an NDB Environment: Application of procedural concepts to register database server, provision databases, and test and publish database patches. Additionally, the topic explains the right method to apply Linux OS patches. Lastly, it delves into databases and troubleshooting of NDB operations.

NCP-DB New Real Test | Reliable NCP-DB Real Test

In order to pass the Nutanix NCP-DB Exam, selecting the appropriate training tools is very necessary. And the study materials of Nutanix NCP-DB exam is a very important part. ActualTestsQuiz can provide valid materials to pass the Nutanix NCP-DB exam. The IT experts in ActualTestsQuiz are all have strength and experience. Their research materials are very similar with the real exam questions. ActualTestsQuiz is a site that provide the exam materials to the people who want to take the exam. and we can help the candidates to pass the exam effectively.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 Sample Questions (Q210-Q215):

NEW QUESTION # 210

What are two of the required steps to provision a new network in Clusters and extend it to Era? (Choose two.)

- A. Add a new.' subnet to the correct VPC.
- **B. Add the new VLAN in Era Networks.**
- C. Add the new network in Era Multi-Cluster Management
- **D. Add the new subnet and VLAN in Network Configuration in PE.**

Answer: B,D

Explanation:

According to the Nutanix Database Automation (NCP-DB) learning documents, to provision a new network in Clusters and extend it to Era, you need to:

B; Add the new subnet and VLAN in Network Configuration in PE1. C. Add the new VLAN in Era Networks1.

These steps ensure that the new network is properly configured in both the Nutanix environment and Era, allowing for seamless communication and operation. Please refer to the official Nutanix documentation and training materials for more detailed information1.

NEW QUESTION # 211

Which file type must be downloaded from the Nutanix Portal for NDB deployment?

- A. ZIP
- B. TAR
- C. QCOW2
- **D. OVA**

Answer: D

Explanation:

For deploying Nutanix Database Service (NDB), the required file type to download from the Nutanix Portal is an OVA (Open Virtual Appliance) file. The OVA format is a standardized package that includes a pre- configured virtual machine image, including the NDB software, which can be imported into supported hypervisors (e.g., VMware ESXi or Nutanix AHV). This simplifies the deployment process by providing a ready-to-use VM template with all necessary components.

* Option A (ZIP) is incorrect as ZIP files are generic archives, not deployment-specific formats for NDB.

* Option B (QCOW2) is incorrect because QCOW2 is a disk image format primarily used with KVM /QEMU, not the standard for NDB deployment.

* Option C (OVA) is correct as it is the official file type provided by Nutanix for NDB deployment.

* Option D (TAR) is incorrect as TAR files are used for archiving, not as a deployment package for NDB.

Administrators should download the OVA from the Nutanix Portal and follow the deployment guide.

References

* Nutanix Database Service (NDB) User Guide, Chapter 1: Deploying NDB, Section: Downloading and Deploying the OVA

* Nutanix Support & Insights, Knowledge Base Article: "NDB Deployment Prerequisites"

* Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 Blueprint, Section 1: Deploy NDB

NEW QUESTION # 212

An administrator would like to provide a group of users the ability to add a new VLAN or IP Pool in Era.

What minimum role should the administrator assign to this group?

- A. Database Infrastructure Admin
- B. Database Admin
- C. Super Admin
- **D. Infrastructure administrator**

Answer: D

Explanation:

In Nutanix Era, the ability to add a new VLAN or IP Pool is typically associated with the role of an Infrastructure Administrator12.

This role has the necessary permissions to manage network configurations, including the creation of VLANs and IP Pools12. It's important to note that the exact permissions may vary depending on the specific configuration and policies of your organization12.

NEW QUESTION # 213

In NDB, which two Time Machine options are available when creating a database clone? {Choose two.)

- A. Backup
- B. Restore point
- C. Point in time
- D. Snapshot

Answer: C,D

Explanation:

The correct answer is A and D because these are the two Time Machine options that are available when creating a database clone in NDB. Point in time allows the user to specify a date and time to create a clone from a specific point in the database history.

Snapshot allows the user to select a previously taken snapshot to create a clone from a consistent state of the database. Option B is incorrect because Restore point is not a Time Machine option, but a feature that allows the user to restore a source database to a previous point in time.

Option C is incorrect because Backup is not a Time Machine option, but a feature that allows the user to backup a database to a remote location.

References: The following sources provide more information about the Time Machine options and cloning features in NDB:

* Nutanix Database Management & Automation (NDMA) course, Module 4: Protecting Databases Using Time Machine, Lesson 4.2: Cloning Databases

* Nutanix Certified Professional - Database Automation (NCP-DB) v6.5, Knowledge Objectives, Section 5 - Protect NDB-managed Databases Using Time Machine

* Nutanix Database Service (NDB) User Guide, Chapter 6: Protecting Databases Using Time Machine, Section 6.2: Cloning Databases

* [Nutanix Support & Insights], NDB Time Machine Under the Hood

NEW QUESTION # 214

Which two security options are available when configuring an SMTP server for sending alert notifications via email? (Choose two.)

- A. SSL
- B. TLS
- C. S/MIME
- D. DKIM

Answer: A,B

Explanation:

When configuring an SMTP server for sending alert notifications via email in NDB, the two security options available are SSL and TLS. These protocols encrypt the email communication between NDB and the SMTP server, ensuring the confidentiality and integrity of alert notifications. NDB supports both options to accommodate different SMTP server configurations, with TLS being the more modern standard and SSL as a legacy option.

Other options are not applicable:

* B. S/MIME: This is used for email content encryption, not SMTP server configuration.

* C. DKIM: This is a domain authentication method, not a security protocol for SMTP.

Thus, the verified answers are A and D, reflecting NDB's SMTP security features.

* Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 Knowledge Objectives, Section 6: Optimize NDB Solutions, Objective 6.2: Manage Alerts (applicable to v6.10).

* Nutanix NDB Administration Guide: "Configuring SMTP for Alerts" section, listing SSL and TLS options.

NEW QUESTION # 215

.....

Under the hatchet of fast-paced development, we must always be cognizant of social long term goals and the direction of the

development of science and technology. Adapt to the network society, otherwise, we will take the risk of being obsoleted. Our Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the NCP-DB Study Tool. You can trust us and let us be your honest cooperators in your future development. Here are several advantages about our Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 exam for your reference. We sincerely suggest you to spare some time to have a glance over the following items.
