Many exam candidates feel hampered by the shortage of effective Professional-Cloud-Database-Engineer preparation quiz, and the thick books and similar materials causing burden for you. Serving as indispensable choices on your way of achieving success especially during this Professional-Cloud-Database-Engineer Exam, more than 98 percent of candidates pass the exam with our Professional-Cloud-Database-Engineer training guide and all of former candidates made measurable advance and improvement.

To earn the Google Professional-Cloud-Database-Engineer certification, candidates must pass a two-hour exam that consists of multiple-choice and multiple-select questions. Professional-Cloud-Database-Engineer exam fee is \$200, and it can be taken online or at a testing center. Professional-Cloud-Database-Engineer exam is available in English, Japanese, Spanish, and Portuguese. Professional-Cloud-Database-Engineer exam is designed to test the candidate's understanding of key concepts related to database engineering on the Google Cloud Platform.

Google Professional-Cloud-Database-Engineer Exam is a certification exam designed to test the skills and knowledge of database engineers who work with Google Cloud Platform (GCP). Professional-Cloud-Database-Engineer exam is part of Google's Cloud Certified program, which offers certification for various roles in cloud computing.

Exam Topics Professional-Cloud-Database-Engineer Pdf & Test Professional-Cloud-Database-Engineer Pass4sure

We've always put quality of our Professional-Cloud-Database-Engineer study guide on top priority. We don't strongly chase for the number of products we have manufactured. Each Professional-Cloud-Database-Engineer test engine will go through strict inspection from many aspects such as the operation, compatibility test and so on. Also, we have final random sampling survey before we sale our Professional-Cloud-Database-Engineer practice material to our customers. The quality inspection process is completely strict. The most professional experts of our company will check the study guide and deal with the wrong parts. What you have bought will totally have no problem. That is why we can survive in the market now. Our company is dedicated to carrying out the best quality

Professional-Cloud-Database-Engineer Test Engine. Any small mistake is intolerant. You can buy our products at ease.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q38-Q43):

NEW QUESTION # 38

You are managing a small Cloud SQL instance for developers to do testing. The instance is not critical and has a recovery point objective (RPO) of several days. You want to minimize ongoing costs for this instance.

What should you do?

- A. Take no backups, and turn off transaction log retention.
- B. Turn on automated backup, and turn on transaction log retention.
- C. Take one manual backup per day, and turn off transaction log retention.
- **D. Turn on automated backup, and turn off transaction log retention.**

Answer: D

Explanation:

<https://cloud.google.com/sql/docs/mysql/backup-recovery/backups>

NEW QUESTION # 39

You want to migrate your on-premises PostgreSQL database to Compute Engine. You need to migrate this database with the minimum downtime possible. What should you do?

- A. Perform a full backup of your on-premises PostgreSQL, and then, in the migration window, perform an incremental backup.
- B. Create a read replica on Cloud SQL, and then promote it to a read/write standalone instance.
- C. Use Database Migration Service to migrate your database.
- **D. Create a hot standby on Compute Engine, and use PgBouncer to switch over the connections.**

Answer: D

Explanation:

PgBouncer maintains a pool for connections for each database and user combination. PgBouncer either creates a new database connection for a client or reuses an existing connection for the same user and database.

+ PgBouncer is a simple PostgreSQL connection pool that allows for several thousand connections at a time.

Using Kubernetes Engine to run a Helm Chart w/ PgBouncer based on the great article from futuretech- industries, we were able to set up an easily deployable system to get the most out of our CloudSQL DBs without breaking the bank. <https://medium.com/google-cloud/increasing-cloud-sql-postgresql-max-connections-w-pgbouncer-kubernetes-engine-49b0b2894820#:~:text=That%20is%20where,breaking%20the%20bank.>

NEW QUESTION # 40

Your company has PostgreSQL databases on-premises and on Amazon Web Services (AWS). You are planning multiple database migrations to Cloud SQL in an effort to reduce costs and downtime. You want to follow Google-recommended practices and use Google native data migration tools. You also want to closely monitor the migrations as part of the cutover strategy. What should you do?

- A. Use a combination of Database Migration Service and partner tools to support the data migration strategy.
- B. Use data replication tools and CDC tools to enable migration.
- **C. Use Database Migration Service to migrate all databases to Cloud SQL.**
- D. Use Database Migration Service for one-time migrations, and use third-party or partner tools for change data capture (CDC) style migrations.

Answer: C

Explanation:

<https://cloud.google.com/blog/products/databases/tips-for-migrating-across-compatible-database-engines>

NEW QUESTION # 41

You are managing a small Cloud SQL instance for developers to do testing. The instance is not critical and has a recovery point objective (RPO) of several days. You want to minimize ongoing costs for this instance. What should you do?

- A. Take no backups, and turn off transaction log retention.
- B. Turn on automated backup, and turn on transaction log retention.
- C. Take one manual backup per day, and turn off transaction log retention.
- **D. Turn on automated backup, and turn off transaction log retention.**

Answer: D

Explanation:

<https://cloud.google.com/sql/docs/mysql/backup-recovery/backups>

NEW QUESTION # 42

Your organization stores marketing data such as customer preferences and purchase history on Bigtable. The consumers of this database are predominantly data analysts and operations users. You receive a service ticket from the database operations department citing poor database performance between 9 AM-10 AM every day.

The application team has confirmed no latency from their logs. A new cohort of pilot users that is testing a dataset loaded from a third-party data provider is experiencing poor database performance. Other users are not affected. You need to troubleshoot the issue. What should you do?

- A. Isolate the data analysts and operations user groups to use different Bigtable instances.
- B. Check the Cloud Monitoring table/bytes_used metric from Bigtable.
- **C. Use Key Visualizer for Bigtable.**
- D. Add more nodes to the Bigtable cluster.

Answer: C

Explanation:

<https://cloud.google.com/bigtable/docs/performance#troubleshooting>

NEW QUESTION # 43

.....

Google certification Professional-Cloud-Database-Engineer exam can give you a lot of change. Such as work, life would have greatly improve. Because, after all, Professional-Cloud-Database-Engineer is a very important certified exam of Google. But Professional-Cloud-Database-Engineer exam is not so simple.
