- D. Small
- A. Moist

It's universally acknowledged that in order to obtain a good job in the society, we must need to improve the ability of the job. If you want a job, some may have the requirements for the certificate, the a certificate for the Category-7A-General-and-Household-Pest-Control exam is inevitable. Our product provide you the practice materials for the Category-7A-General-and-Household-Pest-Control exam, the materials are revised by the experienced experts of the industry with high-quality. Besides the price of our product is also reasonable, no matter the students or the employees can afford it. Free update and pass guarantee and money back guarantee is available of our product. Choose us we will help you pass your next Certification Category-7A-General-and-Household-Pest-Control Exam fast.

We are now in an era of technological development. Category-7A-General-and-Household-Pest-Control had a deeper impact on our work. Passing the Category-7A-General-and-Household-Pest-Control exam is like the vehicle's engine. Only when we pass the exam can we find the source of life and enthusiasm, become active and lasting, and we can have better jobs in today's highly competitive times. To pass the Category-7A-General-and-Household-Pest-Control Exam, careful planning and preparation are crucial to its realization. Of course, the path from where you are to where you want to get is not always smooth and direct. Therefore, this is the point of our Category-7A-General-and-Household-Pest-Control exam materials, designed to allow you to spend less time and money to easily pass the exam.

OCPE - Category-7A-General-and-Household-Pest-Control –The Best Latest Exam Materials

The remarkably distinguished results Category-7A-General-and-Household-Pest-Control are enough to provide a reason for Prep4sureExam's huge clientele and obviously the best proof of its outstanding products. This is the reason that professionals find our Category-7A-General-and-Household-Pest-Control exam questions and answers products worthier than exam collection's or Prep4sureExam's dumps. Above all, it is the assurance of passing the exam with Prep4sureExam 100% money back guarantee that really distinguishes our Top Category-7A-General-and-Household-Pest-Control Dumps.

OCPE Pesticide Applicator Category 7A General and Household Pest Control Exam Sample Questions (Q16-Q21):

NEW QUESTION # 16

For an indoor application of TEMPRID for bed bugs, ____ application rate.

- A. Do not exceed the 0.075% per gallon of water
- B. Use the 0.15% per gallon of water
- C. Use 0.54% per gallon of water

Answer: B

Explanation:

The TEMPRID SC label specifies that for indoor bed bug applications, the recommended concentration is 0.15% per gallon of water (equivalent to 16 mL per gallon) to ensure efficacy against resistant bed bug populations. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Bedbugs) aligns with label instructions for effective treatment. Option A (0.075%) is the rate for general pests like roaches, not bed bugs. Option C (0.54%) exceeds the label rate and is incorrect.

NEW QUESTION # 17

When used in integrated bed bug elimination programs, TEMPRID:

- A. Efficacy is not affected by heat treatment; therefore TEMPRID can be applied before heat treatments
- B. Efficacy is affected by heat treatments
- C. Applications cannot be made prior to heat treatments

Answer: A

Explanation:

TEMPRID SC's efficacy is not affected by heat treatments, as its active ingredients (imidacloprid and beta-cyfluthrin) remain stable under high temperatures used in bedbug heat treatments. The TEMPRID SC label and the General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Bedbugs) confirm that TEMPRID can be applied before heat treatments as part of an integrated approach, as heat drives bedbugs out of hiding, increasing their contact with the pesticide. Option A (cannot be made prior to heat treatments) is incorrect, as the label allows this. Option B (efficacy affected by heat) is incorrect, as TEMPRID's performance is not diminished by heat.

NEW QUESTION # 18

Which answer best completes the following statement?

For interior bedbug applications:

- A. Reapply every 7-10 days until infestation is eliminated
- B. Apply to flat surfaces where prolonged human contact will occur
- C. Use a high-pressure system with a fan nozzle

Answer: A

Explanation:

The TEMPRID SC label and the General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Bedbugs) recommend that for interior bedbug applications, applicators should reapply every 7-10 days until the infestation is eliminated. This is because bedbugs have a life cycle where eggs hatch over time, and multiple treatments are needed to target newly emerged nymphs.

Option A (high-pressure system with a fan nozzle) is incorrect, as high-pressure systems can disperse bedbugs and are not suitable for indoor applications; low-pressure, targeted applications (e.g., crack- and-crevice) are preferred. Option B (apply to flat surfaces with prolonged human contact) is incorrect, as the TEMPRID label prohibits application to surfaces like mattresses or furniture where prolonged contact occurs, to avoid human exposure.

NEW QUESTION # 19

____ toxicity has become an important issue to pesticide applicators based on their repeated use or exposure to pesticides.

- A. Periodic
- B. Acute
- C. Chronic

Answer: C

Explanation:

Chronic toxicity refers to the adverse effects of long-term, repeated exposure to a pesticide, which is a significant concern for applicators who handle pesticides regularly. This can lead to health issues like cancer, neurological disorders, or reproductive problems, as noted in the General Pest Management:

Guide for Commercial Applicators - Category 7A (Chapter 3: Pesticide Safety). Option B (acute toxicity) refers to effects from a single, high-dose exposure, which is less relevant to repeated use.

Option C (periodic) is not a recognized term in toxicology.

NEW QUESTION # 20

The second most common cause of pesticide poisoning to applicators is:

- A. Fire
- B. Inhalation
- C. Dermal exposure

Answer: B

Explanation:

The second most common cause of pesticide poisoning for applicators is inhalation, as pesticides can be inhaled as vapors, mists, or dusts during mixing or application, especially in enclosed spaces. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 3: Pesticide Safety) notes that inhalation exposure often follows dermal exposure (the most common cause, see Question 18) in frequency. Option A (fire) is not a common cause of poisoning, though it poses other risks. Option C (dermal exposure) is the most common cause, not the second.

NEW QUESTION # 21

.....

When you decide to pass the Category-7A-General-and-Household-Pest-Control exam and get relate certification, you must want to find a reliable exam tool to prepare for exam. That is the reason why I want to recommend our Category-7A-General-and-Household-Pest-Control prep guide to you, because we believe this is what you have been looking for.
