

OGA-031 Actual Exams - OGA-031 Valid Exam Sample

BONUS!!! Download part of Real4dumps OGA-031 dumps for free: https://drive.google.com/open?id=1pKK9-ZJ_IN-JtmedZ9o5aUkypyp_vqUSC

Even in a globalized market, the learning material of similar OGA-031 doesn't have much of a share, nor does it have a high reputation or popularity. In this dynamic and competitive market, the OGA-031 learning questions can be said to be leading and have absolute advantages. In order to facilitate the user real-time detection of the learning process, we OGA-031 Exam Material provided by the questions and answers are all in the past. It is closely associated, as our experts constantly update products every day to ensure the accuracy of the problem, so all OGA-031 practice materials are high accuracy.

The OGA-031 exam is designed to test the candidate's knowledge of the ArchiMate 3.0 specification, which was released in 2016. This specification builds on the previous versions of ArchiMate and introduces new concepts, relationships, and viewpoints that enable architects to model a wider range of enterprise structures and behaviors. OGA-031 Exam covers topics such as the ArchiMate language structure, modeling principles, concepts and relationships, viewpoints, and the use of ArchiMate in different scenarios.

100% Pass Quiz 2025 The Open Group Marvelous OGA-031 Actual Exams

As we all know, through the judicial examination, you need to become a lawyer, when the teacher is need through the teachers' qualification examinations. If you want to be an excellent elites in this line, you need to get the ArchiMate 3 Part 1 Exam certification, thus it can be seen through the importance of qualification examination. Only through qualification examination, has obtained the corresponding qualification certificate, we will be able to engage in related work, so the OGA-031 Test Torrent is to help people in a relatively short period of time a great important tool to pass the qualification test. Choose the OGA-031 study tool, can help users quickly analysis in the difficult point, high efficiency of review, and high quality through the ArchiMate 3 Part 1 Exam exam, work for our future employment and increase the weight of the promotion, to better meet the needs of their own development.

The ArchiMate 3 Part 1 Certification Exam consists of 40 multiple-choice questions that need to be completed within 60 minutes. OGA-031 exam covers various topics, including the ArchiMate 3 modeling language, its structure, and its application in EA domains such as business, application, and technology. OGA-031 Exam also assesses the candidate's ability to analyze and interpret ArchiMate 3 models and diagrams, and their understanding of the relationships between different ArchiMate 3 concepts.

The Open Group ArchiMate 3 Part 1 Exam Sample Questions (Q72-Q77):

NEW QUESTION # 72

Consider the following diagram:

What correctly describes the elements E, F and I?

- A. Communication network E passes data from server B through the path F to communication network I
- B. The two communication networks E and I together realize a path F.
- C. Users on servers B and D trigger data from communication network E to I through path F.
- D. Technology collaboration F aggregates the two communication networks E and I.

Answer: A

Explanation:

Based on the ArchiMate 3 documents or objectives, a communication network represents a set of structures that connects devices or system software for transmission, routing, and reception of data. A path models the relation between two or more technology internal active structure elements, through which these can exchange information. The diagram uses a flow relationship to indicate that data flows from server B to communication network E, then through path F to communication network I. The notation for a flow relationship is a dashed line with an open arrowhead at the end that points to the direction of the flow.

References: ArchiMate 3.2 Specification, Chapter 11 Technology Layer, Section 11.2 Active Structure Elements 1; ArchiMate 3.2 Specification, Chapter 5 Relationships, Section 5.4 Dynamic Relationships 1; ArchiMate communication network 2.

NEW QUESTION # 73

Consider the diagram:

(A diagram showing three goals: Increase Premium by 12%, Reduce Usage of Consultants by 25%, and Increase Internal Labor Expense by no more than 4%, all connected to Reduce Expense Ratio from 15% to 10% using aggregation relationships.) What is the best description of the diagram?

- A. The goal "Reduce Expense Ratio from 15% to 10%" combines three other goals.
- B. The goal "Reduce Expense Ratio from 15% to 10%" must be achieved before any of the other three goals is achieved.
- C. The goal "Reduce Expense Ratio from 15% to 10%" will be achieved if at least one of the other three goals is achieved.
- D. The goal "Reduce Expense Ratio from 15% to 10%" is similar to the three other goals.

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

This diagram represents a goal decomposition model in ArchiMate, specifically illustrating how multiple lower-level goals contribute to

a higher-level goal.

* The top three goals ("Increase Premium," "Reduce Consultant Usage," and "Increase Internal Labor Expense") are connected to "Reduce Expense Ratio" using an aggregation relationship.

* Aggregation in ArchiMate indicates that multiple elements together contribute to forming a larger whole.

* This means "Reduce Expense Ratio from 15% to 10%" is composed of these three contributing goals.

Analysis of Answer Choices:

#A. The goal "Reduce Expense Ratio from 15% to 10%" combines three other goals.##Correct Answer

* The aggregation relationship used in the diagram indicates that the three top-level goals together support or combine to form the "Reduce Expense Ratio" goal.

* ArchiMate 3.2 Specification, Section 6.4.1, states that Aggregation represents a "whole-part" relationship, meaning the main goal (Reduce Expense Ratio) is achieved by achieving the contributing goals.

#B. The goal "Reduce Expense Ratio from 15% to 10%" will be achieved if at least one of the other three goals is achieved.##Incorrect

* This would require an Influence or Contribution relationship rather than Aggregation.

* Aggregation means all three goals contribute to the overall goal, not just one of them.

#C. The goal "Reduce Expense Ratio from 15% to 10%" must be achieved before any of the other three goals is achieved.##Incorrect

* This would imply a triggering or dependency relationship, which is not present in the diagram.

* The diagram does not indicate a sequence of achievements.

#D. The goal "Reduce Expense Ratio from 15% to 10%" is similar to the three other goals.##Incorrect

* The relationship shown is not equivalence or similarity, but aggregation, meaning the three smaller goals form part of the main goal.

#A. The goal "Reduce Expense Ratio from 15% to 10%" combines three other goals.

References:

* ArchiMate 3.2 Specification: Sections 6.4.1 (Aggregation) and 6.2.2 (Goal Decomposition).

* Archi User Guide: Understanding goal decomposition and strategic planning.

NEW QUESTION # 74

Relationships are classified in a number of categories as shown below. What are A, B and C?

- A. Passive, Behavior, Active
- B. Derived, Internal, External
- C. Aggregation, assignment, realization
- D. Structural, dependency, dynamic

Answer: D

Explanation:

This is because the diagram shows the three main categories of relationships in ArchiMate: structural relationships, which model the static construction or composition of concepts; dependency relationships, which model how elements depend on or use other elements; and dynamic relationships, which model the temporal or causal connections between elements.

NEW QUESTION # 75

Consider the diagram, where X and Z are servers located in the ArchiSurance data center:

(A diagram showing X and Z (servers) connected to E (a shared technology element).) What correctly describes the diagram?

- A. Technology collaboration E represents a point of access for services offered by the servers.
- **B. The servers share a common network area storage device E.**
- C. The servers are shown in the technology interaction E, where they collectively process data.
- D. The servers, represented by devices, are connected by a communication network.

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

This diagram represents a Technology Layer model in ArchiMate, where X and Z are servers, and E is a shared technology component.

* X and Z are likely hardware devices (Servers), which are typically represented as Technology Nodes or Devices in ArchiMate.

* E is a shared resource that both servers connect to, implying a common storage or network area storage device.

According to ArchiMate 3.2, Technology Objects like Storage Devices or Infrastructure Services can be shared across multiple devices.

Analysis of Answer Choices:

#A. The servers, represented by devices, are connected by a communication network. ##Incorrect

* There is no explicit network symbol (e.g., a communication path or a network node).

* The relationship between X, Z, and E indicates a shared resource rather than a network connection.

* ArchiMate 3.2 Specification, Section 6.6.4, defines Communication Networks separately, and none are present here.

#B. The servers are shown in the technology interaction E, where they collectively process data.

##Incorrect

* Technology Interaction represents behavior in ArchiMate, meaning two or more active elements are collaborating on a process.

* E is a shared object, not an interaction process.

#C. The servers share a common network area storage device E. ##Correct Answer

* E is a shared resource, meaning it is likely a storage device used by both servers.

* ArchiMate 3.2 Specification, Section 6.6.2, states that Technology Objects can represent storage elements used by multiple devices.

* This matches the pattern of a shared Network Attached Storage (NAS) or Storage Area Network (SAN).

#D. Technology collaboration E represents a point of access for services offered by the servers.

##Incorrect

* Technology Collaboration elements represent active behavior, not a static resource like a shared storage system.

* E does not behave as a collaboration element but as a shared infrastructure object.

#C. The servers share a common network area storage device E.

References:

* ArchiMate 3.2 Specification: Sections 6.6.2 (Technology Object), 6.6.4 (Communication Network), and 6.6.7 (Technology Collaboration).

* Archi User Guide: Understanding shared technology infrastructure and storage modeling.

NEW QUESTION # 76

Consider the following diagram showing a system used for settling injury claims:

Which answer correctly describes this diagram?

- A. The MEDINFO application serves the Medical Information department, and accesses a data object called MEDBASE_
- B. The Medical Information application uses a back-end module called MEDINFO to access a data object called MEDBASE.
- C. The MEDBASE application uses MEDINFO middleware to present the Medical Information user interface.
- **D. The MEDINFO application realizes the Medical Information service, and accesses a data object called MEDBASE-**

Answer: D

Explanation:

Based on the ArchiMate 3 documents or objectives, an application component represents a modular, deployable, and replaceable part of a software system that encapsulates its behavior and data. An application service represents an explicitly defined exposed application behavior. A data object represents data structured for automated processing. A realization relationship indicates that an entity plays a critical role in the creation, achievement, sustenance, or operation of a more abstract entity. An access relationship models the ability of behavior and active structure elements to observe or act upon passive structure elements. The diagram uses a realization relationship from the MEDINFO application component to the Medical Information service to indicate that the application component realizes the service. The diagram also uses an access relationship from the MEDINFO application component to the MEDBASE data object to indicate that the application component accesses the data object.
