The Open Group ArchiMate 3 Part 1 Exam Sample Questions (Q33-Q38):

NEW QUESTION # 33

Complete the sentence. The passive counterpart of the application component in the application layer is called a(n)_____

- A. Product
- B. Meaning
- C. Application event
- **D. Data object**

Answer: D

Explanation:

According to the application layer metamodel, the passive counterpart of the application component is the data object, which represents data structured for automated processing. A data object can be accessed or manipulated by an application component or

an application function.

References: ArchiMate 3.2 Specification, Chapter 8: Application Layer1; Application Layer in ArchiMate Part 1 - Metamodel2.

NEW QUESTION # 34

What physical element is used to model buildings that have an important role in production processes?

- A. Distribution node
- B. Manufacturing Plant
- C. Facility
- D. Equipment

Answer: C

Explanation:

According to the ArchiMate 3.2 Specification1, a facility is a physical element that is used to model buildings that have an important role in production processes. A facility represents a physical structure or environment1. Therefore, the correct answer is A. Facility.

NEW QUESTION # 35

Consider the following symbol, which represents information about a transformation project at ArchiSurance_

Which statement correctly expresses the meaning of this symbol?

- A. The assessment is that customers are defecting to competitors with superior digital experiences
- B. The driver is that customers are defecting to competitors with superior digital experiences
- C. The outcome is that customers are defecting to competitors with superior digital experiences.
- D. The concern is that customers are defecting to competitors with superior digital experiences

Answer: A

Explanation:

Based on the ArchiMate 3 documents or objectives, an assessment represents the result of an analysis of the state of affairs of the enterprise with respect to some driver. An assessment may reveal strengths, weaknesses, opportunities, or threats for some area of interest. An assessment is a motivation element that can be associated with other motivation elements such as stakeholders, drivers, goals, outcomes, etc. The notation for an assessment is a rectangle with a rounded top and a horizontal line inside it. The symbol in this question is an assessment that expresses the analysis of ArchiSurance's situation.

NEW QUESTION # 36

Consider the following diagram:

What element is used to represent the Chief Marketing Officer in this diagram?

- A. Business Actor
- B. Stakeholder
- C. Role
- D. Actor

Answer: A

Explanation:

Based on the ArchiMate 3 documents or objectives, a business actor represents a business entity that is capable of performing behavior. A business actor is a business entity as opposed to a technical entity; i.e., it belongs to the Business Layer. The notation for a business actor is a circle with a stick figure inside it. The Chief Marketing Officer in this diagram is a business actor that performs the behavior assigned to the Marketing Manager role.

NEW QUESTION # 37

Complete the sentence. The ArchiMate standard provides a set of entities and relationships for

- A. modeling detailed workflow
- B. providing fine-grained descriptions of business motivation
- C. representing Architecture Description
- D. supporting a fixed set of diagram types

Answer: C

Explanation:

Based on the ArchiMate 3 documents or objectives, the ArchiMate standard provides a set of entities and relationships for representing Architecture Description. Architecture Description is a work product used to express an architecture for a system-of-interest. The ArchiMate language is an open and independent modeling language for Enterprise Architecture that is supported by different tool vendors and consulting firms.
