Topic 5	Introduction to TOGAF Business Architecture Foundation: This topic gives aspiring TOGAF business architects basic knowledge about the Business Architecture Foundation.

The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q48-Q53):

NEW QUESTION # 48

Complete the sentence. The four dimensions used to scope an architecture are:

- A. Business, Data, Application, Technology
- B. Strategy, Portfolio, Project, Solution Delivery
- **C. Breadth, Depth, Time Period, Architecture Domains**
- D. Strategy, Segment, Capability, Budget

Answer: C

Explanation:

In TOGAF, the dimensions for scoping an architecture are Breadth (coverage across the organization), Depth (level of detail), Time Period (horizon of the architecture), and Architecture Domains (the four architecture domains of Business, Data, Application, and Technology). These dimensions ensure comprehensive scoping and contextual alignment.

References: TOGAF Standard, Chapter on Scoping the Architecture.

According to TOGAF, defining the scope of an architecture involves considering these four key dimensions:

* Breadth: This refers to how much of the enterprise is covered by the architecture. It defines the boundaries of the architecture, which could range from a single department to the entire organization, or even extending to external partners.

* Depth: This dimension determines the level of detail included in the architecture. It can range from high-level conceptual models to detailed specifications of individual components.

* Time Period: This specifies the timeframe for the architecture, including the intended lifespan of the architecture and any planned phases or iterations. It addresses questions like "What is the architecture for now?" and "What should the architecture look like in the future?"

* Architecture Domains: This dimension defines which of the four architecture domains (Business, Data, Application, Technology) are included in the scope. The selection of domains depends on the specific needs and objectives of the architecture development effort.

NEW QUESTION # 49

Which of the following is a benefit of information mapping?

- A. It enables improved business process integration.
- **B. It highlights information requirements not addressed by a business architecture.**
- C. It provides a basis to support decision-making throughout the business.
- D. It provides a framework for effective business requirements analysis.

Answer: B

NEW QUESTION # 50

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

1	General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission
2	A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.
3	A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle
4	The scope and approach that will be used to complete an architecture development cycle

Complete the sentence. Deliverable 1 is an output from the _____, deliverable 2 is a companion to the _____

- A. Phase A, Request for Architecture Work
- B. Preliminary Phase, Architecture Requirements Specification
- C. Preliminary Phase, Architecture Definition Document
- D. Phase A, Architecture Principles

Answer: D

NEW QUESTION # 51

Consider the following graphic illustrating a method supporting the TOGAF ADM.

What does the method help identify?

- A. Solution Building Blocks
- B. Architecture Solutions
- C. Alternative Target Architectures

- D. Business Scenarios

Answer: C

Explanation:

The graphic illustrates a method for developing alternative target architectures in Phase E of the TOGAF ADM1. The method involves identifying and evaluating candidate architectures based on criteria such as business value, cost, risk, and feasibility1. The method helps to identify the most suitable architecture solution for the enterprise.

The graphic illustrates a method that supports the TOGAF ADM by identifying and evaluating alternative target architectures. The process begins with a vision, influenced by principles and requirements, leading to the consideration of alternatives. Each alternative is assessed based on different criteria, leading to the selection of the most suitable target architecture. This is consistent with the TOGAF approach of developing a set of potential architectures and then selecting the one that best meets the enterprise's needs.

NEW QUESTION # 52

Which of the following is a purpose of mapping capabilities to value stream stages?

- A. To classify, group, and align capabilities into categories for a deeper understanding.
- B. To provide a self-contained business description that is independent of the organizational structure.
- C. To identify and eliminate business capabilities that do not contribute to the business.
- D. To describe the business in terms of services provided and consumed.

Answer: C

Explanation:

The purpose of this activity is to identify which business capabilities (out of the total set of capabilities) are critical to delivering stakeholder value, and therefore which ones need to be performed to a sufficient standard of quality to meet stakeholder expectations. It also helps to identify those business capabilities that do not contribute toward any of the core value streams, and which may be eliminated from the business.

The primary purpose of mapping capabilities to value stream stages within the TOGAF framework is to analyze how each capability contributes to delivering value to the customer. This process helps to identify:

* Capabilities essential for value creation: These are the capabilities that directly contribute to the activities within the value stream and are critical for delivering customer value.

* Capabilities with indirect or unclear contributions: These may require further investigation to determine their role in the value stream.

* Non-contributing capabilities: These capabilities do not play a role in the value stream and may be candidates for elimination or optimization to improve efficiency and reduce costs.

NEW QUESTION # 53

.....

The high quality and high efficiency of OGBA-101 study guide make it stand out in the products of the same industry. Our OGBA-101 exam materials have always been considered for the users. If you choose our products, you will become a better self. OGBA-101 Actual Exam want to contribute to your brilliant future. With our OGBA-101 learning brandumps, you can not only get the certification but also learn a lot of the professional knowledge.
