The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q101-Q106):

NEW QUESTION # 101

According to the TOGAF Standard, what are the two levels of risk that should be monitored?

- A. Mitigated and Revised level
- B. Technical and Financial level
- **C. Initial and Residual level**
- D. Operational and Strategic level

Answer: C

Explanation:

"There are two levels of risk that should be considered namely: Initial Level of Risk [and] Residual Level of Risk."

archive.opengroup.org Reference: The Open Group Conference Proceedings, From Architecture to Execution with TOGAF 9 (R. Weisman) - Risk Management section.

NEW QUESTION # 102

Refer to the exhibit.

Consider the illustration of an architecture development cycle.

Select the correct phase names corresponding to the labels 1, 2 and 3?

- A. 1 Requirements Management - 2 Implementation Governance - 3 Preliminary
- **B. 1 Requirements Management - 2 Change Management - 3 Strategy**
- C. 1 Continuous Improvement - 2 Migration Planning - 3 Architecture Vision

- D. 1 Architecture Governance - 2 Implementation Governance - 3 Preliminary

Answer: B

NEW QUESTION # 103

Which of the following best describes purpose of the Business Scenarios?

- A. To identify and understand requirements
- B. To identify risk when implementing an architecture project
- C. To guide decision making throughout the enterprise
- D. To catch errors in a project architecture early

Answer: A

Explanation:

Business scenarios are a technique for capturing, clarifying, and communicating the functional and non-functional requirements of a system. Business scenarios describe the business environment, the actors involved, the desired outcomes, and the processes or rules that govern the behavior of the system. Business scenarios are useful for ensuring that the architecture addresses the real needs and concerns of the stakeholders, and for validating and testing the architecture against expected situations. Business scenarios are developed in Phase A: Architecture Vision of the ADM cycle, and refined and updated throughout the other phases. References: 3: The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 26: Business Scenarios; The TOGAF Standard, Version 9.2, Part II: Architecture Development Method (ADM), Chapter 18: Phase A: Architecture Vision

NEW QUESTION # 104

Complete the following sentence. In the ADM, documents which are under development and have not undergone any formal review and approval process are called _____. Documents which have been reviewed and approved are called _____.

- A. "Version 0.1" - "Version 1.0"
- B. "draft" - "finalized"
- C. "concept" - "deliverable"
- D. "draft" - "approved"

Answer: D

Explanation:

According to the TOGAF Standard, 10th Edition, documents which are under development and have not undergone any formal review and approval process are called draft documents, while documents which have been reviewed and approved are called approved documents. Draft documents are typically marked with a version number of 0.x, indicating that they are incomplete or provisional. Approved documents are typically marked with a version number of 1.0 or higher, indicating that they have been finalized and authorized. The other options are not correct, as they are not the terms used by the TOGAF Standard to distinguish between documents under development and documents that have been reviewed and approved. The terms "finalized", "concept", "deliverable", and "Version 0.1" and "Version 1.0" are not specific to the TOGAF Standard, and they may have different meanings or interpretations in different contexts. Reference: 1: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 7: Applying Iteration to the ADM, Section 7.2.3 Document Categorization.

NEW QUESTION # 105

Which of the following is a responsibility of an Architecture Board?

- A. Conducting assessments of the maturity level of architecture discipline within the organization
- B. Allocating resources for architecture projects
- C. Creating the Statement of Architecture Work
- D. Establishing targets for re-use of components

Answer: D

Explanation:

* An Architecture Board is an executive-level group responsible for the review and maintenance of the strategic architecture and all of its sub-architectures. It is a key element in a successful Architecture Governance strategy.

* An Architecture Board is typically made responsible, and accountable, for achieving some or all of the following goals2:

oProviding the basis for all decision-making with regard to the architectures
oConsistency between sub-architectures
oEstablishing targets for re-use of components
oFlexibility of the Enterprise Architecture: To meet changing business needs
To leverage new technologies
oEnforcement of Architecture Compliance
oImproving the maturity level of architecture discipline within the organization
oEnsuring that the discipline of architecture-based development is adopted
oSupporting a visible escalation capability for out-of-bounds decisions

* Therefore, the correct answer is option D, which captures one of the goals of an Architecture Board as stated in the TOGAF Standard, Version 9.22.

* Option A is incorrect, because conducting assessments of the maturity level of architecture discipline within the organization is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Capability Framework3.

* Option B is incorrect, because allocating resources for architecture projects is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Governance Framework4.

* Option C is incorrect, because creating the Statement of Architecture Work is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Development Method5. Reference:

* 1: Architecture Board - The Open Group3

* 2: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Board

* 3: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Capability Framework

* 4: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Governance Framework

* 5: TOGAF Standard, Version 9.2 - Part II: Architecture Development Method - Phase A: Architecture Vision
