OGEA-101 Exam Study Guide & OGEA-101 PDF prep material & OGEA-101 Exam Training Test

What's more, part of that ExamDiscuss OGEA-101 dumps now are free: https://drive.google.com/open?id=15iU3phPwdMB4XCLp2H40XeFtX6Pdd65z

For candidates who will attend an exam, some practice for it is necessary. OGEA-101 Exam Dumps of us will give you the practice you need. OGEA-101 exam dumps of us contain the knowledge point of the exam. Skilled professionals will verify the questions and answers, which will guarantee the correctness. Besides, we also offer you free update for one year after purchasing, and the update version will send to your email address automatically.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	• ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.
Topic 2	• Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.
Topic 3	• Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.
Topic 4	• Architecture Governance: This topic of The Open Group OGEA-101 Exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.
Topic 5	• Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.

Topic 6	• Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.

Although the passing rate of our OGEA-101 simulating exam is nearly 100%, we can refund money in full if you are still worried that you may not pass. You don't need to worry about the complexity of the refund process at all, we've made it quite simple. As long as you provide us with proof that you failed the exam after using our OGEA-101, we can refund immediately. If you encounter any problems during the refund process, you can also contact our customer service staff at any time. They will help you solve the problem as quickly as possible. That is to say, our OGEA-101 Exam Questions almost guarantee that you pass the exam. Even if you don't pass, you don't have to pay any price for our OGEA-101 simulating exam. I hope we have enough sincerity to impress you.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q94-Q99):

NEW QUESTION # 94
Which one of the following classes of information within the Architecture Repository would typically contain a list of the applications in use within the enterprise?

- A. Architecture Landscape
- B. Architecture Metamodel
- C. Reference Library
- D. Governance Log

Answer: A

Explanation:
The Architecture Landscape is a class of information within the Architecture Repository that shows an architectural view of the building blocks that are in use within the organization today (the Baseline Architecture), as well as those that are planned for the future (the Target Architecture). The Architecture Landscape typically contains a list of the applications in use within the enterprise, along with their relationships and dependencies, as well as other relevant architectural information. The Architecture Landscape helps to identify opportunities for re-use, consolidation, or retirement of existing applications, as well as gaps or overlaps in the current or future architecture.
The TOGAF Standard, Version 9.2, Part IV: Architecture Content Framework, Chapter 34: Architecture Landscape : The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 47:
Architecture Repository

NEW QUESTION # 95
Consider the following statement:
According to the TOGAF Standard a governed approach of a particular deliverable will ensure a system of continuous monitoring to check integrity changes decision-making and audit of all architecture-related activities Which deliverable is being referred to?

- A. The Architecture Vision
- B. The Architecture Definition Document
- C. The Statement of Architecture Work
- D. An Architecture Contract

Answer: D

Explanation:

An Architecture Contract is a deliverable that specifies the responsibilities and obligations of the parties involved in the implementation and governance of an architecture. It ensures a system of continuous monitoring to check integrity changes decision-making and audit of all architecture-related activities.
Reference: The TOGAF Standard | The Open Group Website, Section 3.3.4 Architecture Contracts.

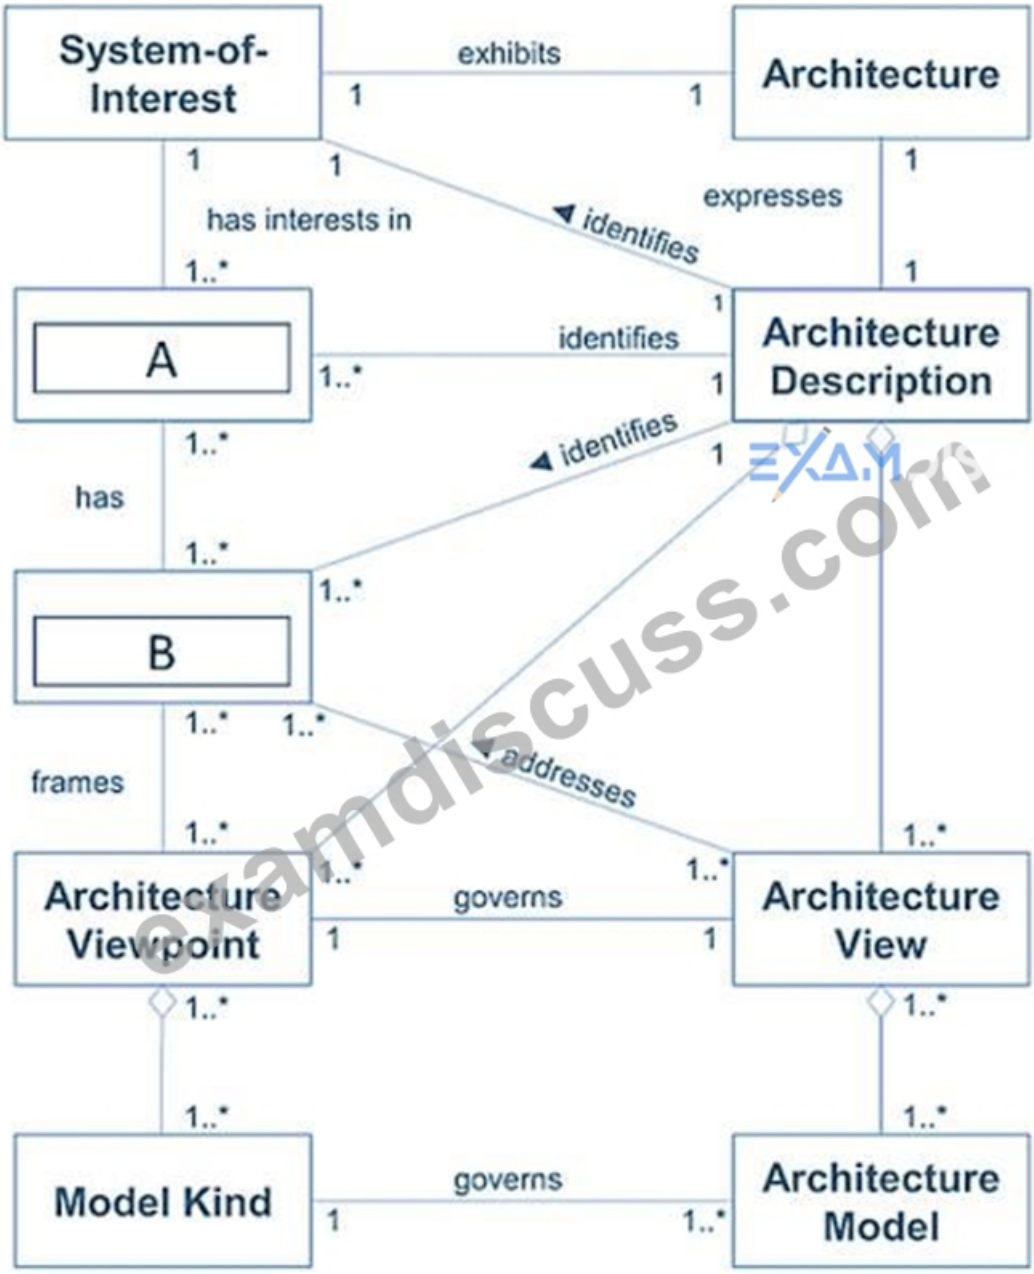
NEW QUESTION # 96
Which of the following is a responsibility of an Architecture Board?

- A. Creating the Statement of Architecture Work
- B. Conducting assessments of the maturity level of architecture discipline within the organization
- C. Establishing targets for re-use of components
- D. Allocating resources for architecture projects

Answer: C

Explanation:
An Architecture Board is an executive-level group responsible for the review and maintenance of the strategic architecture and all of its sub-architectures1. It is a key element in a successful Architecture Governance strategy2.
An Architecture Board is typically made responsible, and accountable, for achieving some or all of the following goals2:
Providing the basis for all decision-making with regard to the architectures Consistency between sub-architectures Establishing targets for re-use of components Flexibility of the Enterprise Architecture: To meet changing business needs To leverage new technologies Enforcement of Architecture Compliance Improving the maturity level of architecture discipline within the organization Ensuring that the discipline of architecture-based development is adopted Supporting a visible escalation capability for out-of-bounds decisions Therefore, the correct answer is option D, which captures one of the goals of an Architecture Board as stated in the TOGAF Standard, Version 9.22.
Option A is incorrect, because conducting assessments of the maturity level of architecture discipline within the organization is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Capability Framework3.
Option B is incorrect, because allocating resources for architecture projects is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Governance Framework4.
Option C is incorrect, because creating the Statement of Architecture Work is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Development Method5. References:
1: Architecture Board - The Open Group3
2: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Board
3: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Capability Framework
4: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Governance Framework
5: TOGAF Standard, Version 9.2 - Part II: Architecture Development Method - Phase A: Architecture Vision

NEW QUESTION # 97
Exhibit:



Consider the image showing basic architectural concepts.
What are items A and B?

- A. A-User, B-Requirement
- B. A-Base Architecture, B-Target Architecture
- C. A-Stakeholder, B-Concern
- D. A-Candidate Architecture, B-Trade-off

Answer: C

Explanation:
In the context of TOGAF, a stakeholder is any individual, team, or organization who has interests in, or concerns relative to, the outcome of the architecture. Concerns are those interests which pertain to any aspect of the system's functioning, development or operation, including considerations such as performance, reliability, and security1. References:
*The TOGAF Standard, Version 9.2 - Definitions - The Open Group

NEW QUESTION # 98
Consider the following extract of the purpose of an ADM Phase:
Phase Output & Outcome / Essential Knowledge
? - "A set of work packages that address the set of gaps, with an indication of value produced and effort required, and dependencies between the work packages to reach the adjusted target." What ADM Phase is this?

- A. Phase B
- B. Phase E
- C. Phase C
- D. Phase A

Answer: B

Explanation:
Phase E: Opportunities & Solutions - Steps/Outputs emphasize grouping work packages, dependencies, and planning the roadmap/plan that reflect value/effort:
"Identify and group major work packages... Refine and validate dependencies... Create the Architecture Roadmap & Implementation and Migration Plan." www.opengroup.org Reference: The Open Group, TOGAF Conformance Requirements- Phase E steps and outputs.

NEW QUESTION # 99
