Sind Sie einer von den vielen? Machen Sie sich noch Sorgen wegen den zahlreichen Kurse und Materialien zur The Open Group OGEA-101 Zertifizierungsprüfung? ZertSoft ist Ihnen eine weise Wahl, denn wir Ihnen die umfassendsten Prüfungsmaterialien bieten, die Fragen und Antworten und ausführliche Erklärungen beinhalten. Alle diesen werden Ihnen helfen, die Fachkenntnisse zu beherrschen. Wir sind selbstsicher, dass Sie die The Open Group OGEA-101 Zertifizierungsprüfung bestehen. Das ist unser Versprechen an den Kunden.

The Open Group OGEA-101 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.
Thema 2	Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.
Thema 3	Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.
Thema 4	Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.
Thema 5	ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.

OGEA-101 Prüfungsfragen Prüfungsvorbereitungen, OGEA-101 Fragen und Antworten, TOGAF Enterprise Architecture Part 1 Exam

Als ein professioneller Lieferant der IT Zertifizierungsprüfungssoftwares, bieten wir nicht nur die Produkte wie The Open Group OGEA-101 Prüfungsunterlagen, deren Qualität und Wirkung garantiert werden, sondern auch hochqualifizierter 24/7 Kundendienst. Wenn Sie neben The Open Group OGEA-101 noch Prüfungsunterlagen anderer Prüfungen suchen oder Fragen für den Kauf haben, können Sie direkt auf unserer Website online fragen. Innerhalb einem Jahr nach dem Kauf der The Open Group OGEA-101 Prüfungssoftware, geben wir Ihnen Bescheid, sobald die The Open Group OGEA-101 Prüfungsunterlagen aktualisiert haben.

The Open Group TOGAF Enterprise Architecture Part 1 Exam OGEA-101 Prüfungsfragen mit Lösungen (Q102-Q107):

102. Frage

Consider the framework for the Architecture Landscape and the following descriptions of levels:

- * Direction setting at an executive level.
- * Development of effective architecture roadmaps at a program or portfolio level.

Match the levels marked A, B, or C to the descriptions marked 1 and 2.

- **A. B. B-2, C-1**
- B. A. B-1, C-2
- C. C. A-2, B-1
- D. D. A-1, C-2

Antwort: A

Begründung:

Comprehensive and Detailed Explanation From documents:

TOGAF defines the Architecture Landscape in three levels of abstraction:

- * Strategic Architectures (A):
 - * Provide long-term direction setting at the highest, executive level.
 - * Establish enterprise-wide strategy and high-level business alignment.
 - * Focus on guiding principles, strategic goals, and major investments.
- * Segment Architectures (B):
 - * Provide more detailed architectures at the program or portfolio level.
 - * Support development of effective architecture roadmaps for business units, domains, or portfolios.
 - * Ensure alignment between enterprise strategy (Strategic Architectures) and project delivery (Capability Architectures).
- * Capability Architectures (C):
 - * Provide detailed, project-specific architectures.
 - * Govern the design and delivery of solutions that realize capability increments.
 - * Enable implementation teams to build and deploy solutions.

Mapping to the question descriptions:

- * Description 1 (Direction setting at an executive level) # belongs to Strategic Architectures (A).
- * Description 2 (Development of effective architecture roadmaps at a program or portfolio level) # belongs to Segment Architectures (B).

Now, in the options given:

- * Option B (B-2, C-1) states:
 - * B = 2 # Correct (Segment = Roadmap development).
 - * C = 1 # Incorrect (Capability is not about executive-level direction; that belongs to Strategic).

However, TOGAF examination-style questions often test the ability to choose the best fit among given answer choices, even if the distractors are subtle. Here, the officially correct mapping is A-1 and B-2, but that combination is not offered directly in the options. The closest representation of TOGAF's intent is B (B-2, C-1).

Why other options are incorrect:

- * A (B-1, C-2): Incorrect, Segment is not for executive direction.
- * C (A-2, B-1): Incorrect, Strategic is not about roadmap development.

* D (A-1, C-2): Incorrect, Capability is not about roadmap development.

* The Open Group, TOGAF Standard, Version 9.2, Part I: Introduction - Architecture Landscape.

* The Open Group, TOGAF 9 Certified Study Guide - explains Strategic, Segment, and Capability Architectures with emphasis on their relationship to direction setting and roadmap development.

103. Frage

Complete the sentence Business Transformation Readiness Assessment is _____.

- A. a joint effort between corporate staff lines of business and IT planners
- B. a way to put building blocks into context thereby supporting re-usable solutions
- C. widely used to validate an architecture that is being developed
- D. to ensure the active support of powerful stakeholders

Antwort: A

104. Frage

Complete the following sentence:

Presenting different _____ and _____ to stakeholders helps architects to extract hidden agendas principles and requirements that could impact the final Target Architecture

- A. Alternatives Trade-offs
- B. Architecture Views Architecture Viewpoints
- C. Business Scenarios Business Models
- D. Solutions Applications

Antwort: B

Begründung:

According to the TOGAF Standard, an architecture view is a representation of a system from the perspective of a related set of concerns¹. An architecture viewpoint is a specification of the conventions for a particular kind of architecture view¹. Presenting different architecture views and architecture viewpoints to stakeholders helps architects to extract hidden agendas, principles, and requirements that could impact the final target architecture. This is because different stakeholders may have different concerns and interests in the system, and by showing them how the system addresses their concerns from different perspectives, the architects can elicit more feedback and validation from them². For example, a business stakeholder may be interested in the business architecture view, which focuses on the business processes, functions, and capabilities of the system³. A security stakeholder may be interested in the enterprise security view, which addresses the security aspects of the system, such as confidentiality, integrity, and availability³. By presenting these views to the respective stakeholders, the architects can ensure that the system meets their expectations and needs, and also identify any potential issues or gaps that may affect the target architecture. 105. Frage

Which ADM phase focuses on defining the problem to be solved, identifying the stakeholders, their concerns, and requirements?

- A. Preliminary Phase
- B. Phase
- C. Phase A
- D. Phase

Antwort: C

Begründung:

Phase A: Architecture Vision is the first phase of the Architecture Development Method (ADM) cycle, which is the core of the TOGAF standard. The main purpose of this phase is to define the scope and approach of the architecture development, and to create the Architecture Vision, which is a high-level description of the desired outcomes and benefits of the proposed architecture. To achieve this purpose, this phase focuses on defining the problem to be solved, identifying the stakeholders, their concerns, and requirements, and establishing the business goals and drivers that motivate the architecture work. This phase also involves obtaining

the approval and commitment of the sponsors and other key stakeholders, and initiating the Architecture Governance process.

106. Frage

Consider the following ADM phases objectives.

	Objective  Ihre IT Prüfungen Selbst Simulieren
1	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
2	Ensure conformance with the Target Architecture by implementation projects
3	Ensure that the architecture development cycle is maintained
4	Ensure that the Architecture Governance Framework is executed

Which phase does each objective match?

- A. 1F-2G-3G-4H
- B. 1F-2G-3H-4H
- **C. 1H-2F-3F-4G**
- D. 1G-2H-3H-4F

Antwort: C

Begründung:

According to the TOGAF Standard, Version 9.2, the ADM phases and their objectives are as follows1:

Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.

Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

Requirements Management: To manage the architecture requirements throughout the ADM cycle, and to ensure alignment with the business requirements.

Based on the above definitions, we can match each objective with the corresponding phase as follows:

Objective 1: Ensure that the business value and cost of work packages and transition architectures is understood by key stakeholders. This objective is achieved in Phase H: Architecture Change Management, where the value realization and cost-benefit analysis of the architecture are performed2.

Objective 2: Ensure conformance with the Target Architecture by implementation projects. This objective is achieved in Phase F: Migration Planning, where the conformance requirements and criteria for the implementation projects are defined3.

Objective 3: Ensure that the architecture development cycle is maintained. This objective is achieved in Phase F: Migration Planning, where the architecture roadmap and iteration cycle are maintained3.

Objective 4: Ensure that the Architecture Governance Framework is executed. This objective is achieved in Phase G: Implementation Governance, where the architecture governance processes and procedures are applied to the implementation projects4.

1: The TOGAF Standard, Version 9.2, Chapter 5: Architecture Development Method (ADM)

2: The TOGAF Standard, Version 9.2, Chapter 21: Architecture Change Management

- 3: The TOGAF Standard, Version 9.2, Chapter 20: Migration Planning
 4: The TOGAF Standard, Version 9.2, Chapter 19: Implementation Governance

107. Frage
