## OGEA-101 Standard Answers - OGEA-101 New Dumps

Therefore, you have the option to use The Open Group OGEA-101 PDF questions anywhere and anytime. Exam4Docs TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) dumps are designed according to the TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) certification exam standard and have hundreds of questions similar to the actual OGEA-101 Exam. Exam4Docs The Open Group web-based practice exam software also works without installation.

## The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q39-Q44):

### NEW QUESTION # 39

Complete the sentence. The four purposes that typically frame the planning horizon, depth and breadth of an Architecture Project, and the contents of the EA Repository are Strategy, Portfolio,

- A. Segment, and End-to-end Target Architecture.
- B. Project, and Solution Delivery.
- C. Discreet, and Cohesive.
- D. Subordinate, and Superior Architecture.

**Answer: A**

Explanation:

The planning horizon, depth, and breadth of an Architecture Project, along with the contents of the EA Repository, are typically framed by Strategy, Portfolio, Segment, and End-to-end Target Architecture. The 'Segment' refers to a part of the organization, typically addressed in a Segment Architecture, while 'End-to-end Target Architecture' encompasses the complete view of the planned architecture across the entire organization.

#### NEW QUESTION # 40

In the ADM, what is the name for a document deliverable that has completed a review and is approved?

- A. ratified
- B. version 0.9
- C. final
- D. approved

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation

In the TOGAF ADM, deliverables go through a lifecycle of development, review, approval, and usage.

TOGAF distinguishes between draft deliverables (work-in-progress) and final deliverables (those that have been formally reviewed and signed off).

\* Draft deliverables are produced as working versions of the required outputs in each ADM phase.

These may carry version labels such as 0.1, 0.5, 0.9, etc., and are subject to stakeholder review and refinement.

\* Once the document has been reviewed and approved by the relevant stakeholders (e.g., Architecture Board, governance bodies), it becomes a final deliverable.

\* Final deliverables are baseline-controlled items and are formally stored in the Architecture Repository as an approved architecture artifact.

Thus, the correct term for a deliverable that has completed review and is approved is "final".

Why the other options are incorrect

\* B. Approved: While true in general language, TOGAF uses the formal term "final deliverable", not "approved deliverable."

\* C. Ratified: This term is not used in TOGAF to describe the state of a deliverable.

\* D. Version 0.9: This is a draft numbering convention, not the status of an approved deliverable.

References

\* The Open Group, TOGAF Standard, Version 9.2, Part II: ADM - description of deliverables, artifacts, and building blocks.

\* The Open Group, TOGAF 9 Certified Study Guide - explanation of draft vs. final deliverables in the ADM lifecycle.

#### NEW QUESTION # 41

Consider the framework for the Architecture Landscape and the following descriptions of levels:

\* Direction setting at an executive level.

\* Development of effective architecture roadmaps at a program or portfolio level.

Match the levels marked A, B, or C to the descriptions marked 1 and 2.

- A. D. A-1, C-2
- B. B. B-2, C-1
- C. A. B-1, C-2
- D. C. A-2, B-1

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From documents:

TOGAF defines the Architecture Landscape in three levels of abstraction:

\* Strategic Architectures (A):

\* Provide long-term direction setting at the highest, executive level.

\* Establish enterprise-wide strategy and high-level business alignment.

\* Focus on guiding principles, strategic goals, and major investments.

\* Segment Architectures (B):

\* Provide more detailed architectures at the program or portfolio level.

- \* Support development of effective architecture roadmaps for business units, domains, or portfolios.
- \* Ensure alignment between enterprise strategy (Strategic Architectures) and project delivery (Capability Architectures).
- \* Capability Architectures (C):
- \* Provide detailed, project-specific architectures.
- \* Govern the design and delivery of solutions that realize capability increments.
- \* Enable implementation teams to build and deploy solutions.

Mapping to the question descriptions:

- \* Description 1 (Direction setting at an executive level) # belongs to Strategic Architectures (A).
- \* Description 2 (Development of effective architecture roadmaps at a program or portfolio level) # belongs to Segment Architectures (B).

Now, in the options given:

- \* Option B (B-2, C-1) states:
- \* B = 2 # Correct (Segment = Roadmap development).
- \* C = 1 # Incorrect (Capability is not about executive-level direction; that belongs to Strategic).

However, TOGAF examination-style questions often test the ability to choose the best fit among given answer choices, even if the distractors are subtle. Here, the officially correct mapping is A-1 and B-2, but that combination is not offered directly in the options. The closest representation of TOGAF's intent is B (B-2, C-1).

Why other options are incorrect:

- \* A (B-1, C-2): Incorrect, Segment is not for executive direction.
- \* C (A-2, B-1): Incorrect, Strategic is not about roadmap development.
- \* D (A-1, C-2): Incorrect, Capability is not about roadmap development.

References (official TOGAF documents, no links):

- \* The Open Group, TOGAF Standard, Version 9.2, Part I: Introduction - Architecture Landscape.
- \* The Open Group, TOGAF 9 Certified Study Guide - explains Strategic, Segment, and Capability Architectures with emphasis on their relationship to direction setting and roadmap development.

## NEW QUESTION # 42

Exhibit

Consider the illustration showing an architecture development cycle Which description matches the phase of the ADM labeled as item 2?

- A. Provides architectural oversight for the implementation
- B. Establishes procedures for managing change to the new architecture

- C. Operates the process of managing architecture requirements
- D. Conducts implementation planning for the architecture defined in previous phases

**Answer: A**

Explanation:

Based on the illustration, the phase of the ADM labeled as item 2 is the Implementation Governance phase. This phase provides architectural oversight for the implementation. It ensures that the implementation project conforms to the architecture. It also provides a framework for monitoring and managing the implementation.

The Implementation Governance phase involves the following activities:

Finalizing the Architecture Roadmap and the supporting Implementation and Migration Plan  
Assigning an Architecture Board to oversee the implementation  
Establishing Architecture Contracts with the implementation partners  
Reviewing and approving the implementation project plans and deliverables  
Performing Architecture Compliance reviews to ensure alignment with the architecture  
Performing Architecture Audit reviews to ensure quality and performance of the architecture  
Resolving any architecture issues or change requests that arise during the implementation  
Maintaining the architecture lifecycle and ensuring its continuity  
The Implementation Governance phase is essential for ensuring that the architecture is realized as intended and that it delivers the expected business value and outcomes.

### NEW QUESTION # 43

When considering the scope of an architecture, what dimension is about the extent of the enterprise?

- **A. Breadth**
- B. Project
- C. Depth
- D. Architecture Domains

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation

When defining the scope of an architecture, TOGAF identifies four dimensions that need to be considered:

- \* Breadth - This dimension addresses the extent of the enterprise that will be impacted by the architecture. It answers the question: How much of the enterprise is covered? For example, does the scope include the entire enterprise, a business unit, a division, or just a single organizational function?
- \* Depth - This refers to the level of detail to be covered. For instance, will the architecture describe high-level capabilities, or will it go into detailed system design?
- \* Time Period - This defines the planning horizon of the architecture. It could be short-term (tactical), medium-term, or long-term (strategic).
- \* Architecture Domains - This refers to which domains are covered: Business, Data, Application, and Technology. The scope may include all or just a subset of these domains.
- \* Project Scope (sometimes discussed separately) - Focuses on which specific programs, portfolios, or projects will be impacted. Among these, the dimension that specifically relates to the extent of the enterprise is Breadth.

Why the other options are incorrect

- \* A. Architecture Domains: Refers to the domains covered (Business, Data, Application, Technology), not the extent of the enterprise.
- \* B. Depth: Refers to the level of detail, not the enterprise extent.
- \* C. Project: Refers to the program or initiative focus, not enterprise coverage.

References

- \* The Open Group, TOGAF Standard, Version 9.2, Part II: ADM - Preliminary Phase (scope considerations).
- \* The Open Group, TOGAF 9 Certified Study Guide - discussion of the dimensions of architecture scope (Breadth, Depth, Time Period, Architecture Domains).

### NEW QUESTION # 44

.....

Do not ask me why you should purchase TOGAF Enterprise Architecture Part 1 Exam OGEEA-101 valid exam prep, of course it is because of its passing rate. As every one knows certification is difficult to pass, its passing rate is low, if you want to save exam cost and money, choosing a OGEEA-101 Valid Exam Prep will be a nice option.

**OGEA-101 Standard Answers:** <https://www.exam4docs.com/OGEA-101-study-questions.html>

There is no denying that your emotion will have a dramatic impact on your performance in the test , so it is of great significance for you to take part in the mock exam for many times until you get familiar with the exam atmosphere and won't feel nervous about the exam any more with our OGEA-101 test preparation, The Open Group OGEA-101 New Exam Bootcamp Our PDF version can be printed and you can take notes as you like.

If you want to get involved, read the contribution agreement, choose OGEA-101 New Dumps a work item, and get started, Simply type `df` at a command prompt to display useful information about all mounted volumes: \$ df

## Utilizing OGEA-101 New Exam Bootcamp - Get Rid Of TOGAF Enterprise Architecture Part 1 Exam

There is no denying that your emotion will have a dramatic OGEA-101 impact on your performance in the test , so it is of great significance for you to take part in the mock exam for many times until you get familiar with the exam atmosphere and won't feel nervous about the exam any more with our OGEA-101 test preparation.

Our PDF version can be printed and you can take notes as you like, Purchase our product now and pass the The Open Group OGEA-101 exam with ease, With such a high hit rate, it becomes much easier to pass the exam.

You have a fixed amount of minutes to complete it.
