

OGEA-101 Test Dumps Free & Exam OGEA-101 Papers

The screenshot shows the Open Group OGEA-101 exam interface. The title bar reads "The Open Group OGEA-101 (TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam)". The main heading is "Question 1 of 5". The question text is "Consider the following ADM phases objectives." Below this is a table with 4 rows and 2 columns: "Objective" and "Description". The objectives are: 1. Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan; 2. Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders; 3. Define the overall Solution Building Blocks (SBBs) to finalize the Target Architecture based on the ABIs; 4. Ensure conformance with the Target Architecture by implementation projects. Below the table is the question "Which phase does each objective match?". There are four radio button options: A. 1F-2G-3F-4F, B. 1E-2F-3E-4G (selected), C. 1G-2E-3F-4E, and D. 1F-2F-3E-4G. Below the options is the "Answer: B" and a "Explanation:" field. At the bottom are buttons for "Previous", "Next", "Show Answer", "Review", "Show List", "Save Session", and "End Exam". On the right side, there is a list of question numbers from 1 to 30.

OGEA-101 Preparation materials will be the good helper for your qualification certification. We are concentrating on providing high-quality authorized OGEA-101 study guide all over the world so that you can clear exam one time. OGEA-101 reliable exam bootcamp materials contain three formats: PDF version, Soft test engine and APP test engine so that our products are enough to satisfy different candidates' habits and cover nearly full questions & answers of the real test.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.
Topic 2	Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.
Topic 3	Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.
Topic 4	Architecture Governance: This topic of The Open Group OGEA-101 Exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.
Topic 5	ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.
Topic 6	Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.

Topic 7	• Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.

Pass Guaranteed Quiz Fantastic OGEA-101 - TOGAF Enterprise Architecture Part 1 Exam Test Dumps Free

All questions in our The Open Group OGEA-101 pass guide are at here to help you prepare for the certification exam. We have developed our learning materials with accurate The Open Group OGEA-101 exam answers and detailed explanations to ensure you pass test in your first try. Our PDF files are printable that you can share your The Open Group OGEA-101 free demo with your friends and classmates.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q25-Q30):

NEW QUESTION # 25

Complete the sentence A set of architecture principles that cover every situation perceived meets the recommended criteria of _____

- A. stability
- B. robustness
- C. consistency
- D. completeness

Answer: D

Explanation:

A set of architecture principles that cover every situation perceived meets the recommended criteria of completeness. Completeness is one of the six criteria that should be applied when developing or assessing architecture principles. Completeness means that there are no gaps or overlaps in the coverage of principles across all relevant aspects of the enterprise's architecture. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.7 Architecture Principles.

NEW QUESTION # 26

Which of the following does the TOGAF standard describe as a package of functionality defined to meet business needs across an organization?

- A. A solution architecture
- B. A deliverable
- C. A building block
- D. An application

Answer: C

NEW QUESTION # 27

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

1	General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission
2	A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.
3	A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle
4	The scope and approach that will be used to complete an architecture development cycle

Which deliverables match these descriptions?

- A. 1 Architecture Requirements Specification - 2 Request for Architecture Work - 3 Statement of Architecture Work - 4 Architecture Principles
- B. 1 Statement of Architecture Work - 2 Architecture Principles - 3 Architecture Requirements Specification - 4 Request for Architecture Work
- C. 1 Request for Architecture Work - 2 Statement of Architecture Work - 3 Architecture Principles - 4 Architecture Requirements Specification
- D. 1 Architecture Principles - 2 Architecture Requirements Specification - 3 Request for Architecture Work - 4 Statement of Architecture Work

Answer: C

Explanation:

The Request for Architecture Work is a deliverable that is sent from the sponsor and triggers the start of an architecture development cycle. It defines the scope, budget, schedule, and deliverables for a specific architecture project. The Statement of Architecture Work is a deliverable that is produced by the architect and defines the approach and resources needed to complete an architecture project. It forms the basis of a contractual agreement between the sponsor and the architecture organization. The Architecture Principles are a deliverable that is produced by the architect and defines the general rules and guidelines for the architecture work. They reflect the business principles, business goals, and business drivers of the organization. The Architecture Requirements Specification is a deliverable that is produced by the architect and defines the requirements that govern the architecture work. It covers both functional and non-functional requirements as well as constraints and assumptions.

NEW QUESTION # 28

The _____ ensures that a project transitioning into implementation also smoothly transitions into appropriate Architecture Governance.

- A. Implementation Governance Model
- B. Migration Plan
- C. Implementation Strategy
- D. Transition Plan

Answer: A

Explanation:

The Implementation Governance Model is a framework that defines the roles, responsibilities, processes, and standards for governing the implementation of the target architecture. It ensures that a project transitioning into implementation also smoothly transitions into appropriate Architecture Governance, which is the practice of ensuring compliance with the enterprise architecture and its principles, standards, and goals. The Implementation Governance Model is part of the Implementation and Migration Plan, which is the output of Phase F: Migration Planning of the Architecture Development Method (ADM)¹² References: 1: The TOGAF Standard, Version 9.2, Part II: Architecture Development Method (ADM), Chapter 21: Phase F: Migration Planning 2: The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 50: Architecture Governance

NEW QUESTION # 29

Exhibit

Consider the illustration showing an architecture development cycle. Which description matches the phase of the ADM labeled as item 1?

- A. Establishes procedures for managing change to the new architecture
- B. Provides architectural oversight for the implementation
- **C. Operates the process of managing architecture requirements**
- D. Conducts implementation planning for the architecture defined in previous phases

Answer: C

Explanation:

The illustration shows an architecture development cycle based on the TOGAF ADM (Architecture Development Method), which is a method for developing and managing an enterprise architecture.

The ADM consists of nine phases, each with a specific purpose and output. The phases are:

Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.

Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

In addition to these phases, there is a central process called Requirements Management, which is labeled as item 1 in the illustration. This process operates throughout the ADM cycle, and its purpose is to manage the architecture requirements throughout the architecture development, ensuring that they are aligned with the business requirements and the stakeholder concerns².

Therefore, the description that matches the phase of the ADM labeled as item 1 is C. Operates the process of managing architecture requirements.
