The aim of our service is to provide the OmniStudio-Consultant Exam Torrent to the client and help them pass the exam and not to disclose their privacy to others and seek illegal interests.

Salesforce Certified OmniStudio Consultant Sample Questions (Q124-Q129):

NEW QUESTION # 124

A company wants to create a new customer buying journey for their website. The buying journey should include the following functionality:

- * Allow the user to enter contact and address information
- * Require the user to enter age, gender, and optionally income bracket
- * Compute a discount percentage per product based on the customer data provided
- * Save the list of suggested products including discounts

Which three OmniStudio tools should the consultant use to design a solution that meets these requirements? Choose 3 answers

- A. OmniScript
- B. FlexCard
- C. Calculation Procedures and Matrices

- **D. OmniStudio Action**
- E. Integration Procedures

Answer: A,C,D

Explanation:

The correct OmniStudio tools to design a solution that meets these requirements are OmniScript, Calculation Procedures and Matrices, and OmniStudio Action. OmniScript can be used to create a user interface for capturing customer information and displaying suggested products. Calculation Procedures and Matrices can be used to compute the discount percentage per product based on the customer data provided. OmniStudio Action can be used to save the list of suggested products including discounts to Salesforce or an external system. Integration Procedures are not needed for this scenario, as there is no data integration involved. FlexCard is not relevant for this scenario, as it is used to display contextual data on record pages.

NEW QUESTION # 125

A business has the following requirements:

- * To display cases for an account
- * The user should see all of the cases on the canvas
- * The user should be able to create a new case from the canvas

The consultant decides to use states to enable this functionality.

Which type of state should the consultant recommend to allow users to create a new case from the canvas?

- A. Edit Mode State
- B. Blank Card State
- C. New Card State
- **D. Active Card State**

Answer: D

NEW QUESTION # 126

An investment portfolio manager wants to build a console to display:

- * Client information
- * Profile attributes
- * Investment instrument information

There are more than 20 profile attributes. Each investment instrument has 15 fields of information to display.

The fields should be grouped logically.

How should the consultant design a solution to meet the requirements?

- **A. * An OmniScript with a Step for client information**
* **Block Elements for investment instruments**
- B. * A header FlexCard for client information and profile attributes
* Child FlexCards for investment instruments with a Flyout for additional information
- C. * A header FlexCard for client information with a Flyout for profile attributes
* Child FlexCards for investment instruments with a Flyout for additional information
- D. * A header FlexCard for client information and profile attributes
* FlexCards for investment instrument information

Answer: A

NEW QUESTION # 127

A Consultant is working on a project that involves using OmniStudio tools to design solutions that meet customer business requirements. The solutions need to be maintainable, scalable, and contribute to long-term customer success. Which OmniStudio tool should the Consultant use to display data and launch actions?

- **A. FlexCards**
- B. DataRaptors
- C. OmniScripts
- D. Integration Procedures

Answer: A

Explanation:

- * FlexCards (B) - FlexCards are designed to display data from Salesforce or external sources and launch actions such as OmniScripts, Integration Procedures, or other system interactions.
 - * FlexCards provide a reusable, scalable UI component that aligns with the requirements of maintainability and long-term success.
 - * A. OmniScripts - OmniScripts are used for guided interactions but are not meant for displaying static or dynamic data as FlexCards do.
 - * C. Integration Procedures - These are used for server-side processing and data transformation, not for directly displaying UI elements.
 - * D. DataRaptors - DataRaptors are data extraction and transformation tools but do not display data or launch actions on their own.
- Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:
- * FlexCards Overview
 - * Launching OmniScripts and Actions from FlexCards

NEW QUESTION # 128

A company has a requirement to create a 360° view of their customers using FlexCards. At this company, customer data is stored in Salesforce but also in external legacy systems. A consultant reviews the use cases needed and recommends a FlexCard canvas that contains 5 child FlexCards inside the state of the parent FlexCard.

How many different data sources can be configured using FlexCards in this scenario?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

The number of different data sources that can be configured using FlexCards in this scenario is 6. A FlexCard can have one data source per state, and a state can have multiple child FlexCards, each with its own data source. Therefore, the parent FlexCard can have one data source for its state, and each of the 5 child FlexCards can have a different data source, making a total of 6 data sources

NEW QUESTION # 129

.....

The service of OmniStudio-Consultant test guide is very prominent. It always considers the needs of customers in the development process.
