CompTIA Tech+ Certification Exam Sample Questions (Q72-Q77):

NEW QUESTION # 72

A user's internet speed is slow. The user logs in to the router's administrator portal and sees that unauthorized devices are connected to the network. Which of the following actions should the user take to prevent unauthorized use of the network?

- A. Decrease the Wi-Fi signal range.
- B. Reset the router.
- C. Change the password.
- D. Call the internet provider's support line.

Answer: C

Explanation:

Changing the Wi-Fi password immediately removes unauthorized devices and prevents them from reconnecting.

Other options:

*Calling support might help later but doesn't directly resolve the issue,

*Decreasing the signal range is unreliable,

*Resetting the router may help but doesn't prevent reentry without a password change.

NEW QUESTION # 73

A user is logged in but unable to access a shared folder on the network. Which of the following security concepts is in place?

- A. Authorization
- B. Authentication
- C. Accounting
- D. Non-repudiation

Answer: A

Explanation:

Authorization determines what a user is allowed to access after they have logged in. The user is already authenticated (logged in), but lacks permission to access the shared folder, indicating an authorization issue.

Other options:

*Authentication verifies identity,

*Accounting tracks user actions,

*Non-repudiation ensures actions cannot be denied later.

NEW QUESTION # 74

A user is unable to load the most recent version of a web page. The old page loads each time the screen is refreshed. Which of the following would the user most likely do to resolve the issue?

- A. Disable browser extensions.
- B. Synchronize the profile.
- C. Enable the pop-up blocker.
- D. Clear the cache.

Answer: D

Explanation:

Clearing the cache removes stored versions of web pages that the browser may be reloading instead of fetching the latest version.

This is the most likely fix when a web page displays outdated content.

Profile sync, extensions, and pop-up blockers are unrelated to loading cached pages.

NEW QUESTION # 75

A user wants to access books and does not need printed, physical copies. The solution should be portable and lightweight. Which of the following is the best solution?

- A. External drive
- B. Workstation
- C. Servers
- D. E-reader

Answer: D

Explanation:

An e-reader is portable, lightweight, and designed specifically for reading digital books, making it the best solution for accessing books without physical copies.

Other options:

*Servers and workstations are not portable devices,

*External drives store data but are not designed for reading books directly.

NEW QUESTION # 76

Which of the following can best protect a computer when an infected file has been downloaded?

- A. Firewall
- B. Permissions
- C. Patching
- D. Anti-malware

Answer: D

Explanation:

Anti-malware software is specifically designed to detect, block, and remove malicious files, making it the best defense when an infected file has been downloaded.

Other options:

*Firewall controls network traffic,

*Patching prevents exploitation of known vulnerabilities but doesn't address already-downloaded malware,

*Permissions limit access but don't actively remove threats.
