These features of the GitHub Administration GH-100 PDF format enable you to prepare for the test anywhere, anytime. By using the GH-100 desktop practice exam software, you can sit in real exam like scenario. This Microsoft GH-100 Practice Exam simulates the complete environment of the actual test so you can overcome your fear about appearing in the GitHub Administration GH-100 exam. Exam4Free has designed this software for your Windows laptops and computers.

Microsoft GitHub Administration Sample Questions (Q64-Q69):

NEW QUESTION # 64

What is the new capability of GitHub's billing dashboard?

- A. Automatically removes unused users from billing
- **B. Enables tracking of GitHub Copilot usage by user**
- C. Offers real-time Slack alerts for billing
- D. Allows self-service plan upgrades

Answer: B

Explanation:

The revamped Billing&Licensing dashboard now includes a dedicated "Copilot" tab that shows per-user seat assignments, usage counts, and estimated costs for your organization's GitHub Copilot licenses, enabling you to track Copilot consumption by individual users.

NEW QUESTION # 65

Which practice helps avoid service disruption when consuming GitHub APIs at scale?

- A. Using multiple tokens to bypass limits
- B. Ignoring secondary rate limits
- C. Caching all API responses permanently
- **D. Designing your application to work within GitHub's rate limits**

Answer: D

Explanation:

Designing your integration to stay within GitHub's documented rate limits-by batching requests, using conditional requests, handling 429 responses with back-off, and monitoring the X-RateLimit-* headers - ensures you won't be temporarily throttled or cut off when you hit secondary limits.

NEW QUESTION # 66

When a user becomes a member of multiple GitHub organizations, which THREE of the following are important considerations for administrators? (Choose three.)

- A. The user's profile information becomes private to non-organization members.
- **B. The user will need to authorize credentials separately for each SAML-enabled organization.**
- C. The user will automatically have the same role across all organizations.
- **D. The user will have different permission levels in each organization.**
- E. The user's personal repositories will become accessible to all organizations.
- **F. The user's repository access and/or team membership needs to be managed separately for each organization.**

Answer: B,D,F

Explanation:

A user's repository access and team memberships are scoped to each organization, so admins must configure permissions separately per org.

When an organization enforces SAML SSO, each member must authorize their personal access tokens or SSH keys for that org, requiring separate approval for each SAML-enabled organization Roles and permission levels (owner, member, billing manager, repository roles, etc.) are assigned on a per-organization basis, so a user often has different permissions in different organizations.

NEW QUESTION # 67

What distinguishes Enterprise Managed Users (EMUs) from standard GitHub accounts?

- A. EMUs can only be created using email invites
- **B. EMUs are fully controlled by an IdP and cannot log in with personal credentials**
- C. EMUs are managed in GitHub and use GitHub authentication

- D. EMUs are only available for GitHub Enterprise Server

Answer: B

Explanation:

EMU accounts are provisioned and authenticated exclusively through your identity provider - users sign in via the IdP and cannot use or manage GitHub-native credentials.

NEW QUESTION # 68

A token was used to access an organization's resource via API. What fields in the audit log help determine who used it?

- A. The token's permissions and the geographic region of access
- **B. The token ID, requesting IP address, and associated user**
- C. The token expiration date
- D. The GitHub Actions runner name

Answer: B

Explanation:

The audit log records the token's identifier (the hashed token value), the source IP address of the request, and the actor (the user or app) associated with that token, allowing you to trace exactly who used it.

NEW QUESTION # 69

.....

For certificates who will attend the exam, some practice is evitable. But sometimes, time for preparation is quite urgent. GH-100 exam braindumps of us will help you to use the least time to pass the exam. If you choose the GH-100 exam dumps of us, you just need to spend about 48 to 72 hours to practice and you can pass the exam successfully. In addition, GH-100 Exam Dumps are verified by experienced experts, and the accuracy and correctness can be guaranteed. And we pass guarantee and money back guarantee if can't pass the exam.

Reliable GH-100 Braindumps Sheet: <https://www.exam4free.com/GH-100-valid-dumps.html>
