As the content of the PT0-002 exam is changing from time to time, you may feel anxious that it seems too hard to know the changes. Now, all complicate tasks have been done by our experts. They have rich experience in predicating the PT0-002 exam. Then you are advised to purchase the study materials on our websites. Also, you can begin to prepare the PT0-002 Exam. You are advised to finish all exercises of our PT0-002 preparation questions and pass the exam by the first attempt very easily.

How much is the salary of a CompTIA PT0-002 certified professional?

The salary of the CompTIA PT0-002 certified professional is dependent on the experience of the candidate, the type of organization they work for, the skills and qualifications they have, the company, location, and the certification. The average salary of a CompTIA PT0-002 certified professional who prepared himself with the help of the **PT0-002 Dumps** is as follows:

- In the United Kingdom: 59,000 GBP
- In Australia: 55,000 AUD
- In Canada: 50,000 CAD
- In India: 40,000 INR
- In the United States: 65,000 USD

CompTIA PT0-002, also known as CompTIA PenTest+ Certification Exam, is a certification exam that validates the skills and knowledge required to plan, perform, report, and communicate results of a penetration test. CompTIA PenTest+ Certification exam focuses on penetration testing methodologies, including planning and scoping, gathering intelligence, vulnerability identification, exploitation, post-exploitation, and reporting. CompTIA PenTest+ Certification certification is designed for IT professionals who are interested in pursuing a career in penetration testing or other security-related roles.

CompTIA PT0-002 Certification Exam is a vendor-neutral certification program that validates IT professionals' skills in planning, performing, and reporting penetration testing. It covers a range of topics on the penetration testing methodology, including technical skills, legal and compliance issues, and risk analysis. CompTIA PenTest+ Certification certification validates the candidate's proficiency in identifying and exploiting vulnerabilities, and it provides a useful foundation for a successful career in the cybersecurity industry.

CompTIA PenTest+ Certification valid study guide & PT0-002 torrent vce & CompTIA PenTest+ Certification dumps pdf

These PT0-002 exam questions braindumps are designed in a way that makes it very simple for the candidates. Each and every PT0-002 topic is elaborated with examples clearly. Use Pass4suresVCE top rate CompTIA PT0-002 Exam Testing Tool for making your success possible. PT0-002 exam preparation is a hard subject. Plenty of concepts get mixed up together due to which student feel difficult to identify them. There is no similar misconception in PT0-002 Dumps because we have made it more interactive for you. The candidates who are less skilled may feel difficult to understand the PT0-002 questions can take help from these braindumps. The tough topics of PT0-002 certification have been further made easy with examples, simulations and graphs. Candidates can avail the opportunity of demo of free PT0-002 dumps.

CompTIA PenTest+ Certification Sample Questions (Q426-Q431):

NEW QUESTION # 426

During a penetration test, a tester is in close proximity to a corporate mobile device belonging to a network administrator that is broadcasting Bluetooth frames.

Which of the following is an example of a Bluesnarfing attack that the penetration tester can perform?

- A. Transmit text messages to the device.
- B. Break a connection between two Bluetooth devices.
- C. Sniff and then crack the WPS PIN on an associated WiFi device.
- **D. Dump the user address book on the device.**

Answer: D

Explanation:

Explanation

Bluesnarfing is the unauthorized access of information from a wireless device through a Bluetooth connection, often between phones, desktops, laptops, and PDAs. This allows access to calendars, contact lists, emails and text messages, and on some phones, users can copy pictures and private videos.

NEW QUESTION # 427

A penetration tester has gained access to part of an internal network and wants to exploit on a different network segment. Using Scapy, the tester runs the following command:

```
sendp(Ether()/dot1q(vlan=100)/dotq(vlan=50)/IP(dst="172.16.50.10")/ICMP())
```

Which of the following represents what the penetration tester is attempting to accomplish?

- A. DNS cache poisoning
- **B. Double-tagging attack**
- C. ARP poisoning
- D. MAC spoofing

Answer: B

Explanation:

<https://scapy.readthedocs.io/en/latest/usage.html>

NEW QUESTION # 428

A penetration tester created the following script to use in an engagement:

```
#!/usr/bin/python
import socket

ports = [21,22,23,25,80,139,443,445,3306,3389]

if len(sys.argv) == 2:
    target = socket.gethostbyname(sys.argv[1])
else:
    print("Few arguments.")
    print("Syntax: python {} <>".format(sys.argv[0]))
    sys.exit()

try:
    for port in ports:
        s = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
        s.settimeout(2)
        result = s.connect_ex((target,port))
        if result == 0:
            print("Port {} is opened".format(port))

except KeyboardInterrupt:
    print("Exiting...")
    sys.exit()
```

However, the tester is receiving the following error when trying to run the script:

```
$ python script.py 192.168.0.1
Traceback (most recent call last):
  File "script.py", line 7, in <module>
    if len(sys.argv) == 2:
NameError: name 'sys' is not defined
```

Which of the following is the reason for the error?

- A. The sys variable was not defined.
- B. The argv variable was not defined.
- C. The sys module was not imported.
- D. The argv module was not imported.

Answer: C

Explanation:

The sys module is a built-in module in Python that provides access to system-specific parameters and functions, such as command-line arguments, standard input/output, and exit status. The sys module must be imported before it can be used in a script, otherwise an error will occur. The script uses the sys.argv variable, which is a list that contains the command-line arguments passed to the script. However, the script does not import the sys module at the beginning, which causes the error "NameError: name 'sys' is not defined". To fix this error, the script should include the statement "import sys" at the top. The other options are not valid reasons for the error.

NEW QUESTION # 429

Which of the following tools would be MOST useful in collecting vendor and other security-relevant information for IoT devices to support passive reconnaissance?

- A. Nessus
- B. WebScarab-NG
- C. Nmap
- D. Shodan

Answer: C

NEW QUESTION # 430

A penetration tester ran a simple Python-based scanner. The following is a snippet of the code:

```
...
<LINE NUM.>
<01> portlist: list[int] = [*range(1, 1025)]
<02> try:
<03>     port: object
<04>     resultList: list[Any] = []
<05>     for port in portList:
<06>         sock = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
<07>         sock.settimeout(20)
<08>         result = sock.connect_ex((remoteSvr, port))
<09>         if result == 0:
<10>             resultList.append(port)
<11>         sock.close()
...
```

Which of the following BEST describes why this script triggered a 'probable port scan' alert in the organization's IDS?

- A. The remoteSvr variable has neither been type-hinted nor initialized.
- B. sock.settimeout(20) on line 7 caused each next socket to be created every 20 milliseconds.
- C. Line 6 uses socket.SOCK_STREAM instead of socket.SOCK_DGRAM
- D. *range(1, 1025) on line 1 populated the portList list in numerical order.

Answer: D

Explanation:

Port randomization is widely used in port scanners. By default, Nmap randomizes the scanned port order (except that certain commonly accessible ports are moved near the beginning for efficiency reasons)

NEW QUESTION # 431

.....

When preparing for the test PT0-002 certification, most clients choose our products because our PT0-002 study materials enjoy high reputation and boost high passing rate. Our products are the masterpiece of our company and designed especially for the certification. Our PT0-002 Study Materials have gone through strict analysis and verification by the industry experts and senior published authors. The clients trust our products and place great hopes on our PT0-002 study materials.
